

# Commonwealth of Pennsylvania

## Compulsive and Problem Gambling Annual Report

# 2014

Dear Members of the General Assembly:

Legalized gambling is one of the fastest growing industries in the United States. For most of the industry's patrons, gambling is a form of harmless entertainment; however, it can create devastating consequences for those who become unable to control their addiction.

The Department of Drug and Alcohol Programs is pleased to present the *2014 Compulsive and Problem Gambling Annual Report* to the Governor and the members of the General Assembly on the impact of the programs funded by the Compulsive and Problem Gambling Treatment Fund. You may also access this document electronically by visiting <http://www.ddap.pa.gov/gamblingaddiction> and clicking on the link for our **2014 Compulsive and Problem Gambling Annual Report**.

Please feel free to contact me if you have any questions. Thank you.

Sincerely,

A handwritten signature in black ink that reads "Gary Tennis". The signature is written in a cursive style with a prominent flourish at the end.

Gary Tennis  
Secretary, Pennsylvania Department of Drug and Alcohol Programs

## **MISSION**

The mission of the Compulsive and Problem Gambling Program is to increase public awareness of services available for problem and compulsive gamblers and their family members, ensure the widespread availability of treatment programs for problem and compulsive gamblers and their families, and implement problem gambling prevention programs based upon findings throughout Pennsylvania.

## **COMPULSIVE AND PROBLEM GAMBLING TREATMENT FUND OVERVIEW**

The Department of Drug and Alcohol Programs (Department) implements a comprehensive, coordinated and effective compulsive and problem gambling program for the Commonwealth. As stated in Act 2010-01, the sum of \$2 million or an amount equal to .002 multiplied by the total gross terminal revenue of all active and operating licensed gaming entities (whichever is greater), shall be transferred annually into the Compulsive and Problem Gambling Treatment Fund for the compulsive and problem gambling program.

From these funds, the Department annually distributes 50 percent of the monies to the Single County Authorities (SCA) to be expended solely for problem gambling needs assessment, prevention programs, outreach, educational programs, and other Department approved services.

Additionally, Act 2010-01 created a requirement to transfer \$3 million annually from the State Gaming Fund for treatment. Specifically, the full amount of these funds are allocated to the SCAs solely for financing drug and alcohol addiction assessments, including drug and alcohol addiction assessments associated or related to compulsive and problem gambling, as well as for the related addiction treatment in non-hospital residential detoxification facilities, non-hospital residential rehabilitation facilities and halfway houses licensed by the Department to provide addiction treatment.

## **HELPLINE**

The Department contracts with the Council on Compulsive Gambling of Pennsylvania (CCGP) to administer the Pennsylvania Gambling Helpline. Calls can be answered in English, Spanish and more than 60 other languages utilizing the American Telephone and Telegraph (AT&T) language service. The helpline provides crisis counseling and referral services to problem and compulsive gamblers and their families who may be experiencing difficulty as a result of problem or compulsive gambling. The helpline employs professionally-trained operators to take calls 24 hours a day, seven days a week, in a free and confidential manner. The operators collect as much data from each caller as the context of the call allows. Each call is assessed for the most appropriate referral information, and the caller is given names, phone numbers, descriptors, etc., for the resources being suggested.

Helpline resources include referrals to Pennsylvania gambling treatment providers and Gamblers Anonymous (GA) and Gam-Anon meetings. The helpline is also able to provide GA and Gam-Anon meeting information for New Jersey, Ohio, New York, West Virginia and Maryland that may be helpful and convenient for each caller. These meeting lists are updated no less than quarterly and often on a per change basis, meaning that as soon as the CCGP becomes aware of a change in meeting schedule(s), an update is sent to the helpline. Pennsylvania gambling treatment providers are licensed/certified behavioral health care specialists (psychiatrists, psychologists, social workers, counselors, etc.).

A small sample of test calls was made by the Department, and on each occasion, our test caller was treated with respect, sensitivity, professionalism and kindness. Each operator went an extra step or more to be of assistance. All of the test callers were given correct and current referral information for GA meetings, counseling and types of available services. The Gambling Helpline Information on the following charts (Figure A through Figure H below) reflects values over a 12-month span (July 1, 2013 through June 30, 2014).

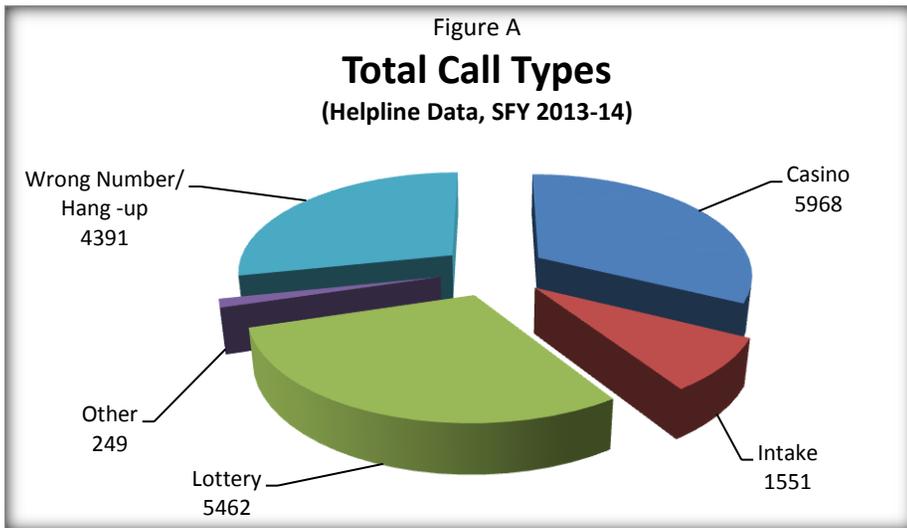

Figure A, left, identifies the total of all call types. Incoming calls to the helpline are identified and recorded in one of five categories. Calls pertaining to “Intake” identify callers seeking treatment, or general questions regarding the treatment process. Figure B through Figure H will reflect calls from the “Intake” category.

Figure B displays the *precipitating event* of the caller who contacted the Gambling Helpline. At right, you will see a breakdown of each problem that resulted from gambling. Some callers identified more than one event.

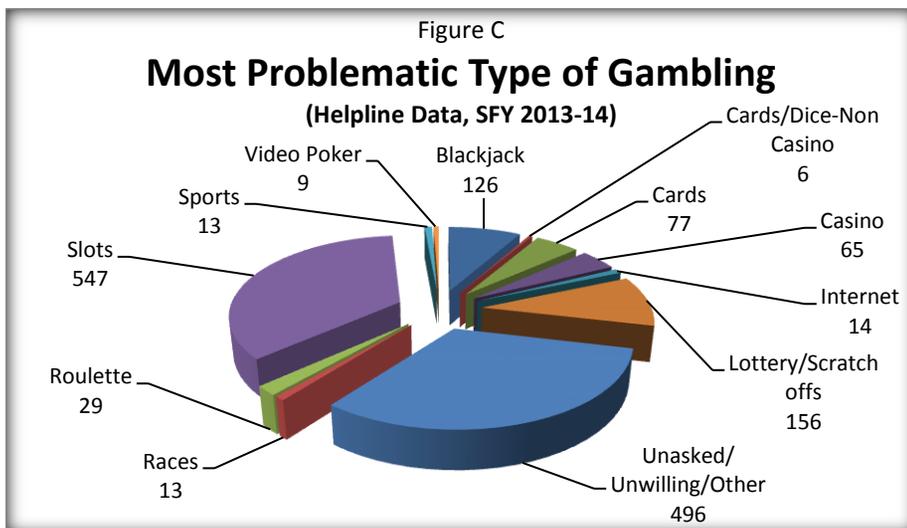

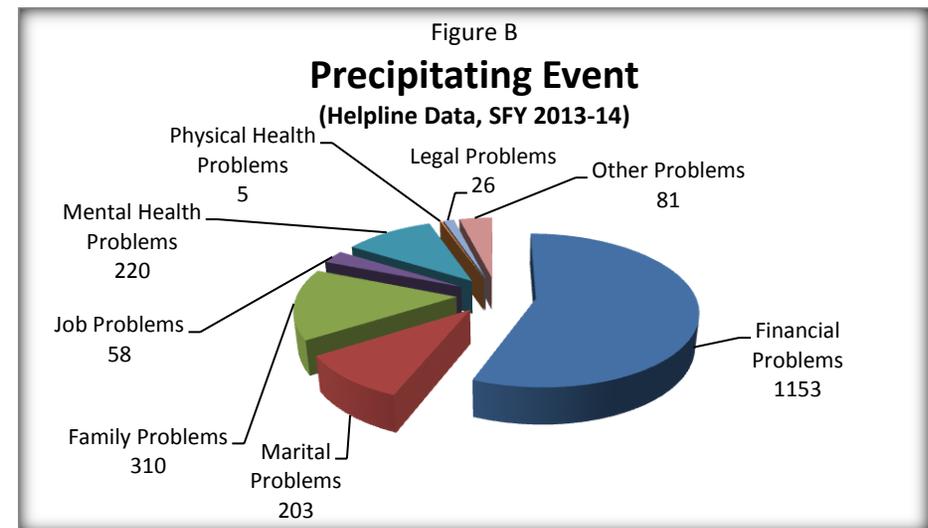

Figure C, at left, displays the *most problematic type of gambling*. This data is gathered to identify games of preference. The majority of helpline callers identified slot machines as being most problematic.

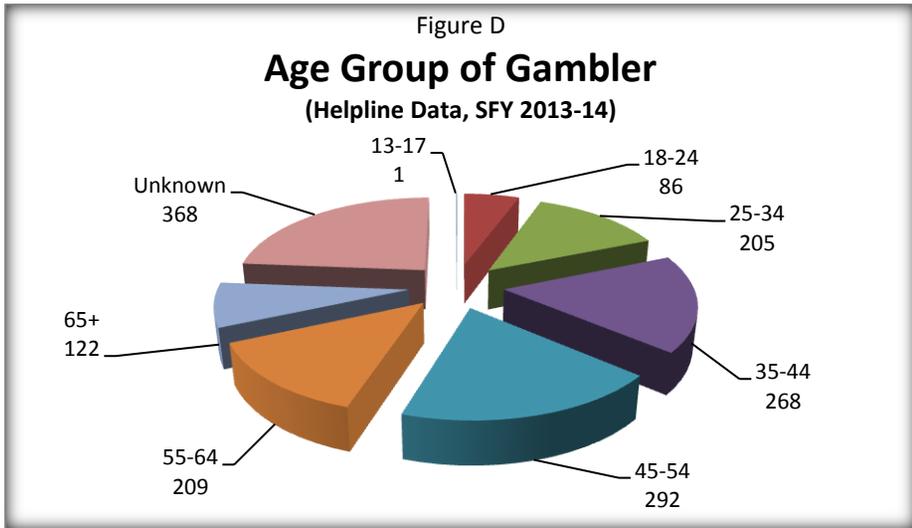

Figure D, left, displays the *age group* of the gambler. The top value is a breakdown of each age (years) group, with the number of calls taken noted below each age group.

Figure E, right, breaks down the *other problems identified*. The possibility of skewed data exists due to the caller being able to answer “yes” to more than one question. In some cases, the caller may not present other problems.

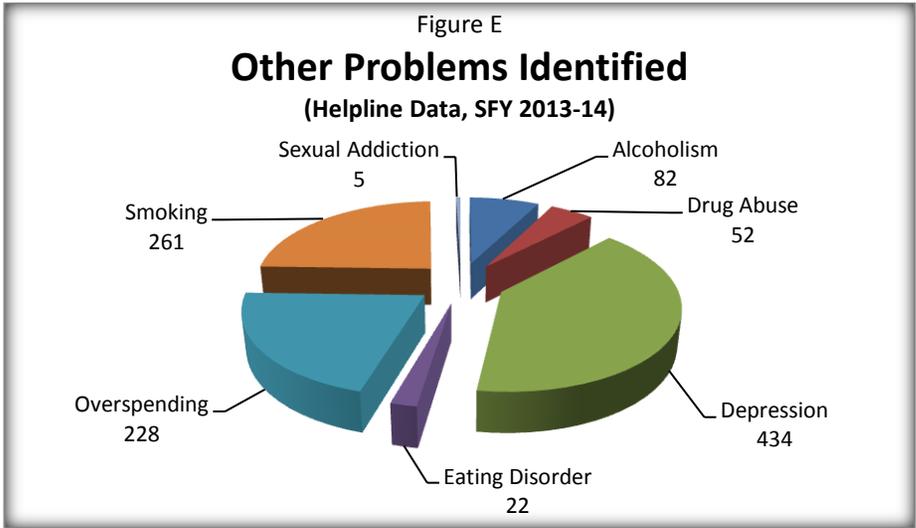

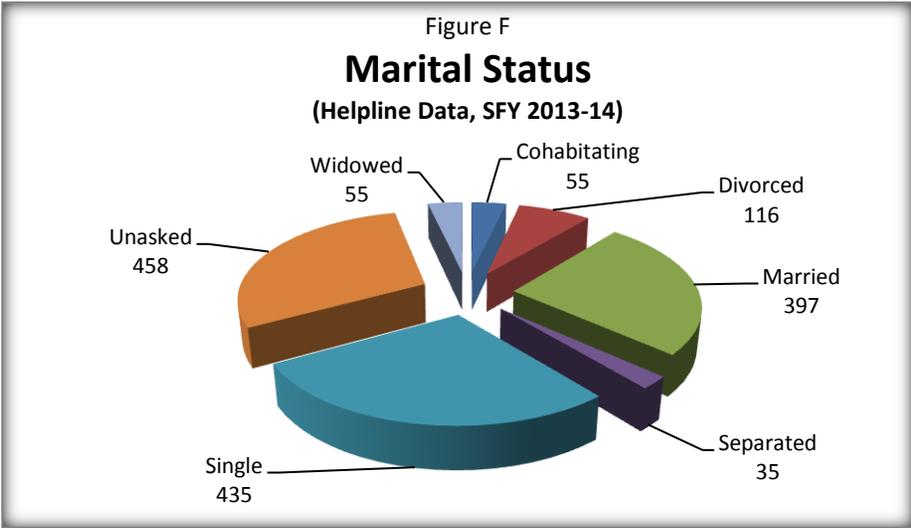

Figure F, left, displays the *marital status* of the gambler. Seven choices are identified, and the numeric value below each choice indicates the number of helpline callers selecting that option.

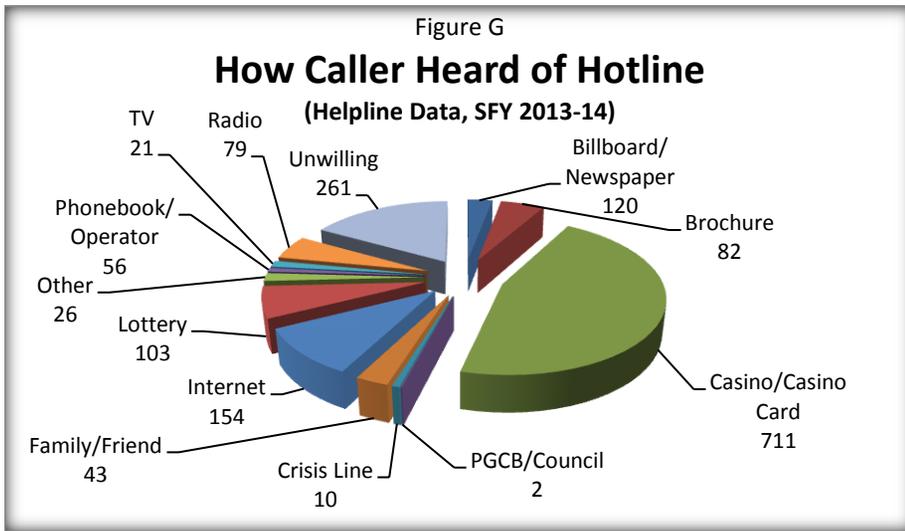

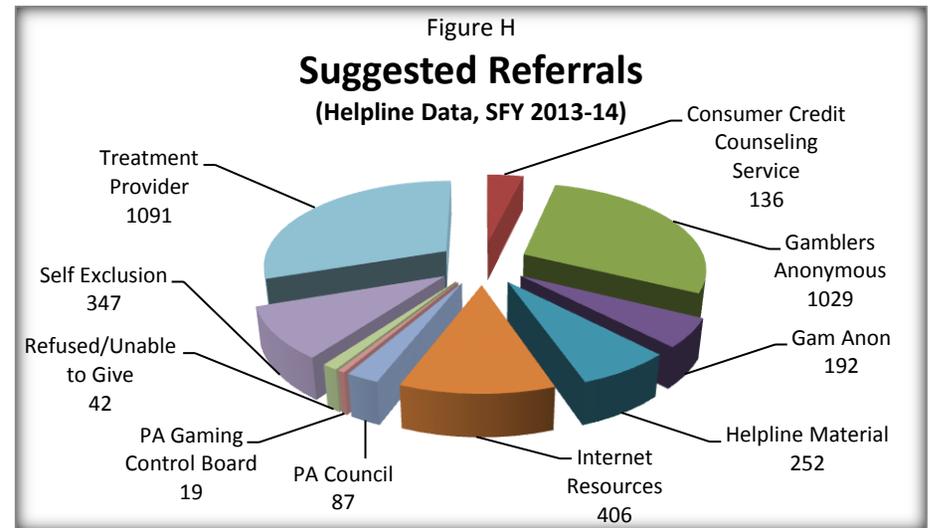

Figure G, at left, reveals *different sources* through which the caller was informed of the helpline. Each response is listed under the corresponding category name.

Figure H, right, breaks down the *suggested referrals*. The majority of callers were referred to a Treatment Provider (1,091). Callers often receive multiple choices of referral information, as indicated by the data shown. Callers may choose more than one category, and may sometimes request specific programs.

## **PROBLEM GAMBLING CONSORTIUM**

The Problem Gambling Consortium was convened in 2006 as a method to work in concert with other state agencies involved in gaming, including the Pennsylvania Lottery and the Pennsylvania Gaming Control Board (PGCB). Other agencies have been added to include the Pennsylvania Behavioral Health and Aging Coalition, Pennsylvania Commission on Crime and Delinquency (PCCD) and the Council on Compulsive Gambling of Pennsylvania (CCGP). The purpose of this consortium is to share information about member organizations as gambling develops across the Commonwealth, to collaborate on efforts and problems facing the gaming public, and to share resources.

During National Problem Gambling Awareness Month (NPGAM), held annually during the month of March, the Problem Gambling Consortium's collaborative efforts included the CCGP conducting training seminars in Pittsburgh and Philadelphia. Also, the PGCB and the Department manned an informational booth at Strawberry Square in Harrisburg on March 5 and 6, 2014, and the Capitol Mini-Rotunda on March 19 and 20, 2014, to disseminate informational materials and answer questions.

Additional information is available through the Department's problem gambling website ([www.PaProblemGambling.com](http://www.PaProblemGambling.com)). The assortment of educational information can be accessed by contacting the Department, calling the toll-free Helpline 877-565-2112 or visiting the web site. This site also includes self-tests, information on how to access help and a list of problem gambling treatment providers.

## **TRAINING**

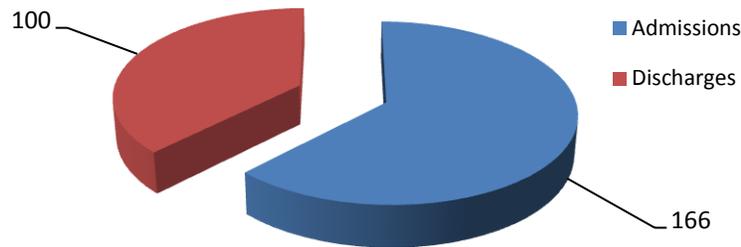

The Department continues to provide problem gambling training through on-site training events, as well as through the Department's specialized training initiative (i.e., addressing a statewide need or new initiative). The Department provides trainings to all interested participants in order to increase the number of problem gambling treatment providers throughout the Commonwealth. By providing these trainings, the Department hopes to increase the number of qualified professionals who are eligible to provide problem gambling counseling services. During State Fiscal Year (SFY) 2013- 2014 there were 10 trainings held and 141 people completed problem gambling training courses.

National certification standards require that certified gambling counselors have at least four hours of clinical oversight by a board-approved clinical consultant. As such, the Department contracted with the Council on Compulsive Gambling of Pennsylvania (CCGP) to provide clinical oversight. Clinicians participate in a 1 hour clinical oversight call per month. Consultation oversight calls for gambling clinicians, led by a board approved clinical consultant, have been occurring since June 2010. Sixteen (16) qualified gambling counselors participated in consultation oversight sessions during SFY 2013/14 and 8 oversight sessions occurred.

# STATUS OF GAMBLING ADDICTION TREATMENT IN PENNSYLVANIA

Figure 1

## Overall Gambling Admissions/Discharges (Shown as actual figure, SFY 2013-14 data)

Outpatient problem gambling counseling services have been made available within the Commonwealth since September 2008. Providers who have been approved under the Department's Participating Provider Agreement (PPA) have been receiving reimbursement for these services since that date. As of July 31, 2014, the Department has PPAs with 96 providers. During SFY 2013-14, there were 166 unique DDAP-funded admissions to compulsive and problem gambling treatment (Figure 1). The total amount invoiced for services provided in SFY 2013-14 was \$262,670.

The data in this section is based on clients who were admitted to, or discharged from, our gambling addiction treatment system.

An admission occurs when a client presents to receive gambling addiction treatment with a provider. Each time a client receives a new type of service or goes to a new provider, he/she is discharged and a new admission occurs. Therefore, each unique client can have multiple admissions. Figure 2 displays the percentage of unique admissions by gender. When a client has completed a particular type of treatment or changes providers, a discharge record is submitted with an associated discharge status. Demographic data such as gender (Figure 2), race/ethnicity (Figure 5), income (Figure 6), employment status (Figure 7) and gambling methods (Figure 8) are captured for reporting purposes.

Figure 2

## Admissions by Gender (Shown as percentage, SFY 2013-14 data)

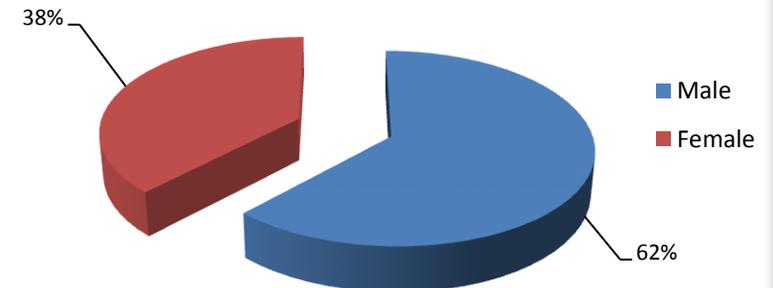

Figure 3

### Admissions by County

(Shown as actual figure, SFY 2013-14 data)

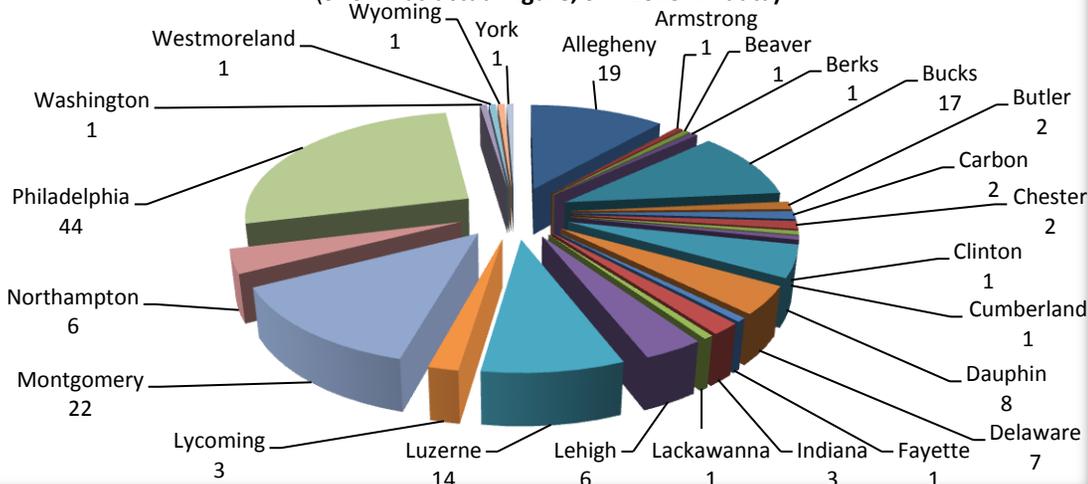

Figure 3, left, displays the problem gambling treatment admissions by County. Allegheny, Montgomery and Philadelphia Counties account for 51% of treatment admissions statewide. This is consistent with prior year's data.

Figure 4, at right, shows the discharges from problem gambling treatment by County. It is important to note that clients may have been admitted to problem gambling treatment during a previous fiscal year. Collectively, Allegheny and Philadelphia Counties accounted for 57% of the 100 reported statewide problem gambling treatment discharges.

Figure 4

### Discharges by County

(Shown as actual figure, SFY 2013-14 data)

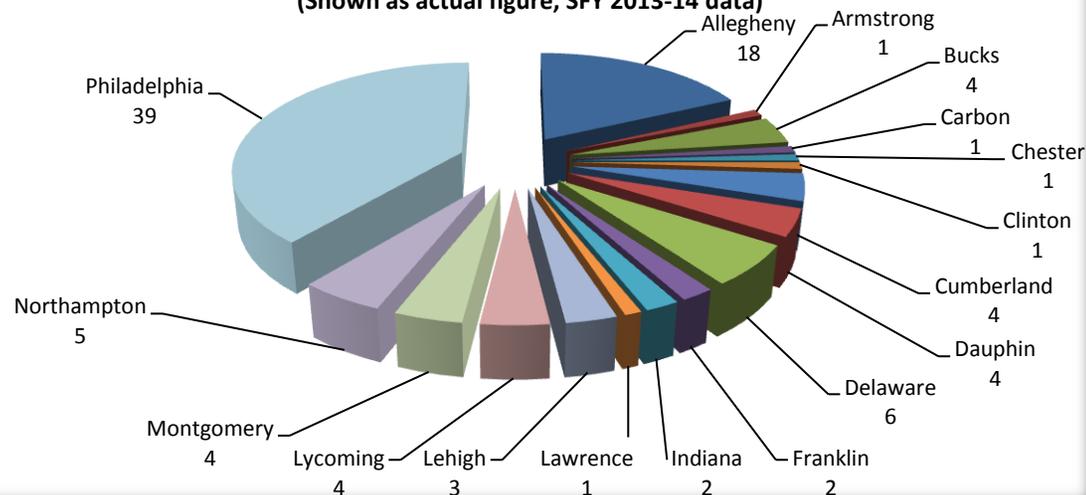

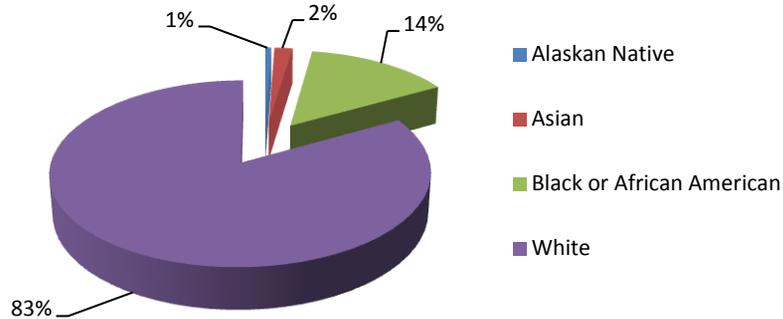

Figure 5  
**Admissions by Race/Ethnicity**  
 (Shown as percentage, SFY 2013-14 data)

The vast majority of admissions (83 percent) were white, while 14 percent were black or African American (Figure 5).

Figure 6 displays admissions by level of income. About half of all clients admitted to treatment reported an income of \$0 - \$29,999. The percentages are a figure of the statewide compulsive and problem gambling unique admissions.

Figure 6  
**Admissions by Income**  
 (Shown as percentage, SFY 2013-14 data)

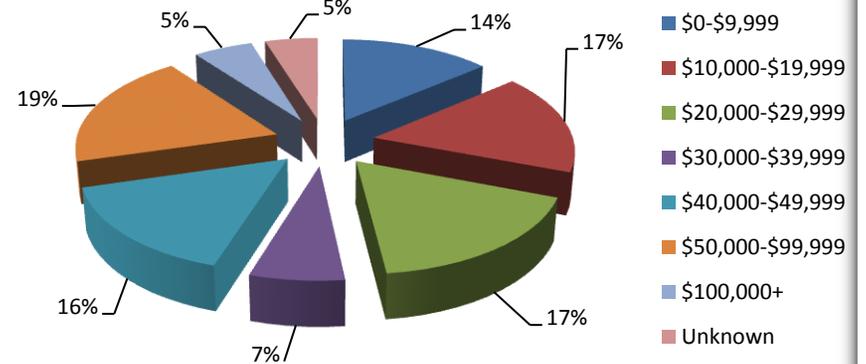

Figure 7  
**Admissions by Employment Status**  
 (Shown as percentage, SFY 2013-14 data)

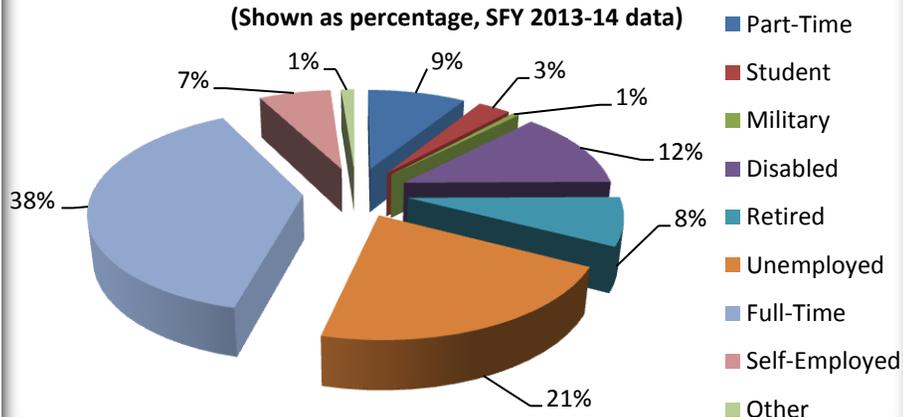

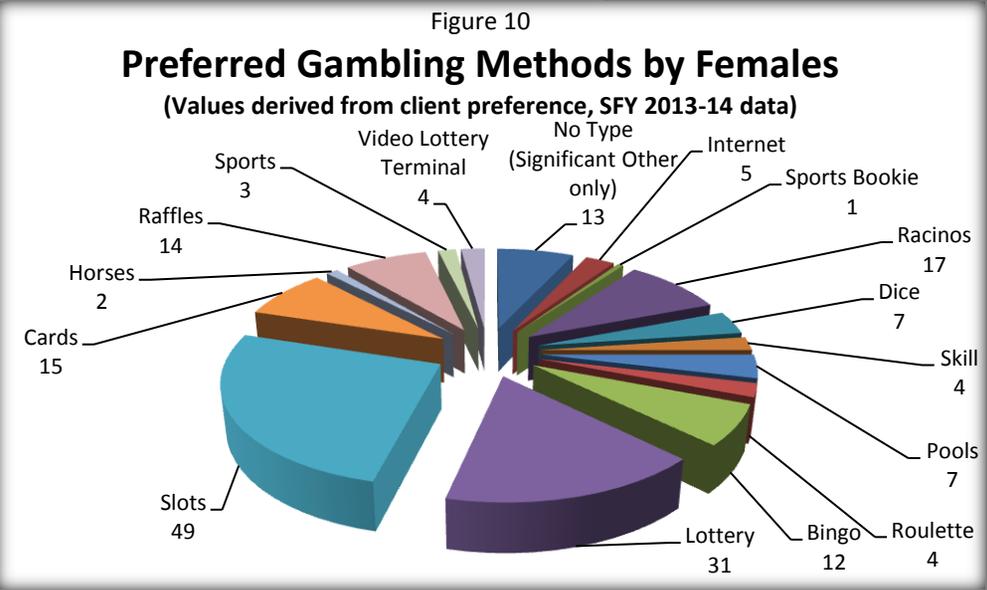

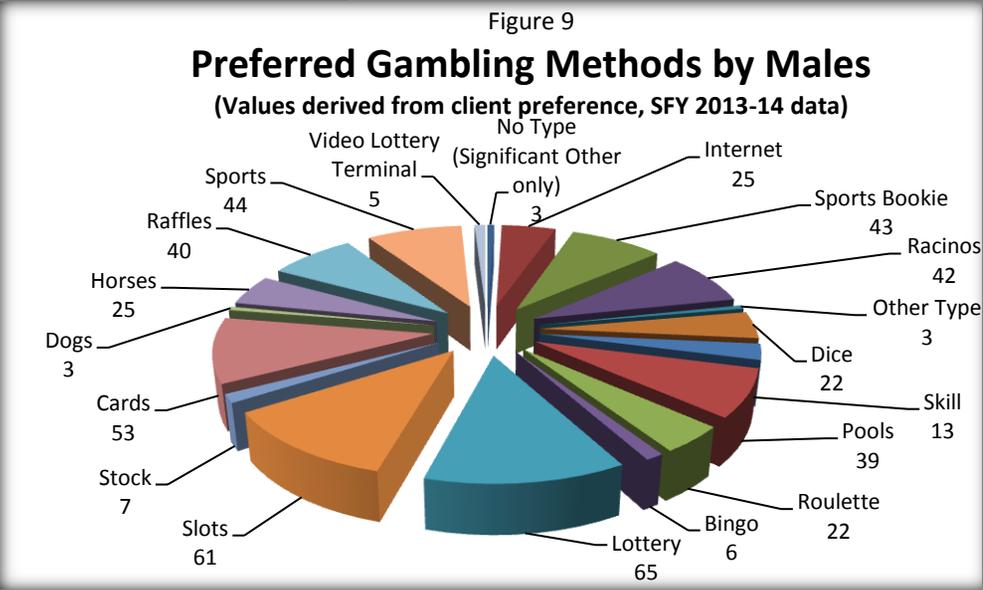

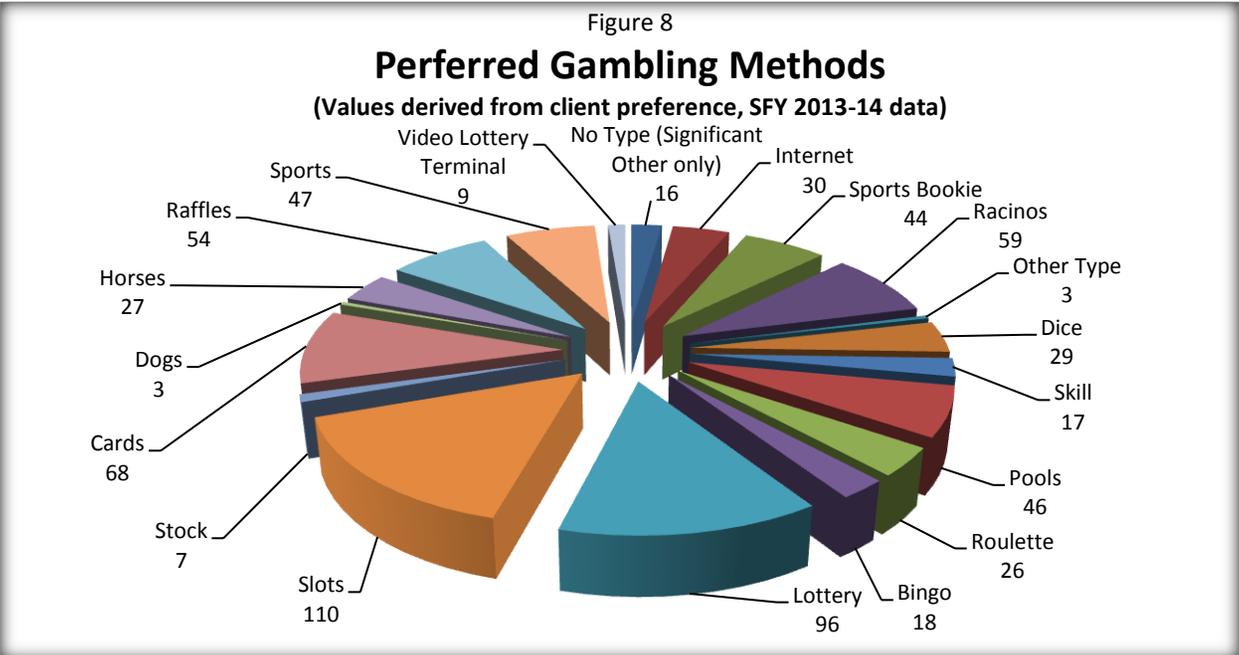

Figure 7 shows the employment status per client admitted to compulsive and problem gambling treatment. The majority of clients (47%) reported full or part-time employment.

Figures 8, 9, and 10 display the preferred gambling methods amongst clients admitted to compulsive and problem gambling treatment. Figure 9 shows a breakdown of preferred gambling method by the male gender, while Figure 10 shows the preferred gambling method by the female gender. It is important to note that clients are able to choose more than one gambling method, as more than one may exist.

## GAMBLING ADDICTION OUTCOMES

One method in which we use to measure the effectiveness of the gambling disorder treatment program is through the evaluation of performance measures. Performance measures may indicate a client's engagement in the treatment process, treatment goals having been met or unmet, and ultimately, the client's ability to maintain abstinence or reduce gambling habits during the treatment process. Figure 11 displays the average number of sessions used by a client. This element indicates whether or not a client is fully engaged and interested in the treatment process. As is evident, over the past several years, clients have been using more treatment sessions while the achievement of treatment goals has increased. Figure 12 indicates the change in employment status for the client during treatment. The employment status is captured during admission to treatment and during discharge from treatment. Figure 12 shows that 17 clients who were discharged from treatment were unemployed upon admission and had a job at treatment discharge, or worked part-time at admission to treatment and were working full-time at discharge. Figure 13 exemplifies client success with gambling disorder treatment. Only 11 clients discharged from treatment during SFY 2013-14 did not achieve any goals.

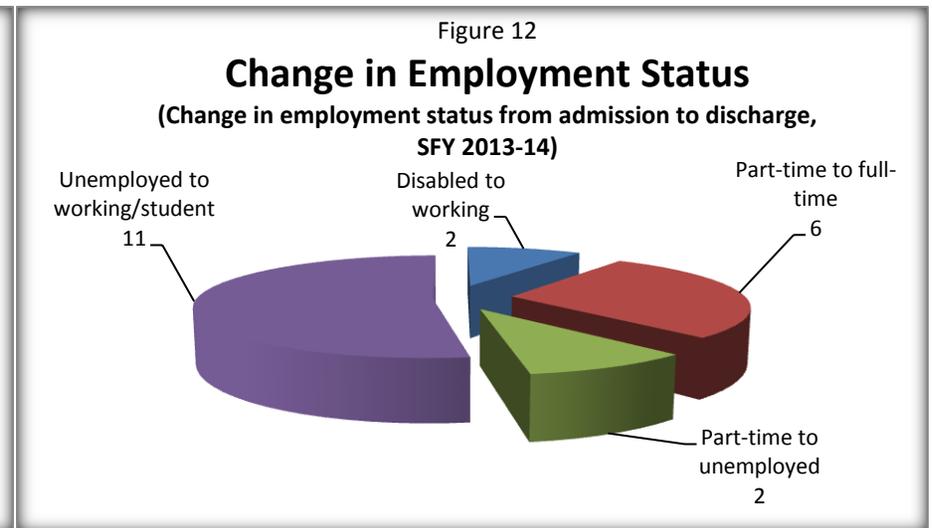

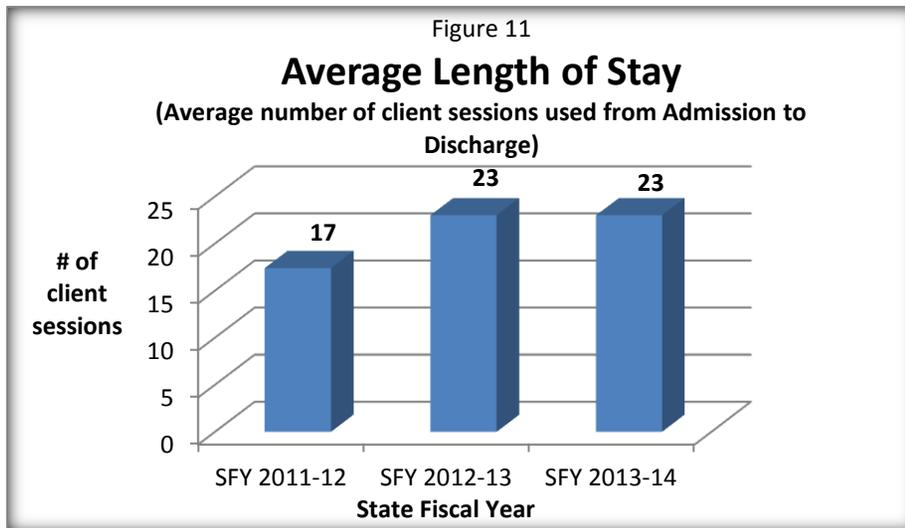

Figure 13

### Gambling Status at Discharge

(Status of gambling treatment goals at discharge, SFY 2013-14)

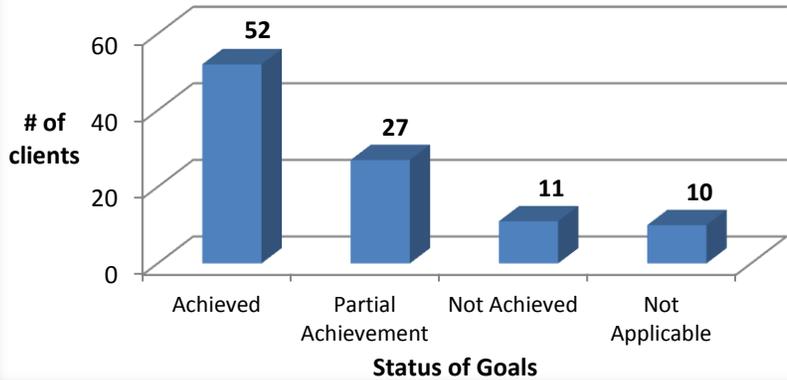

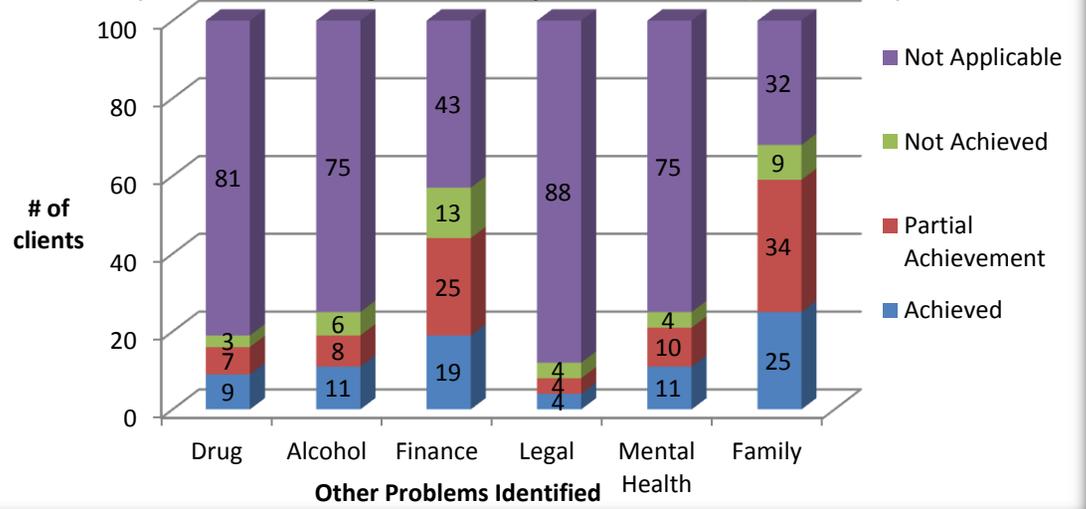

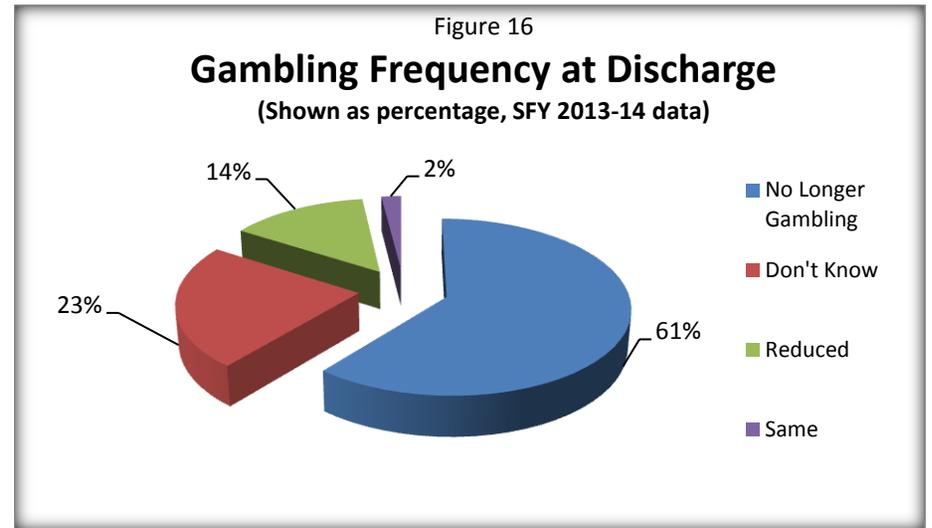

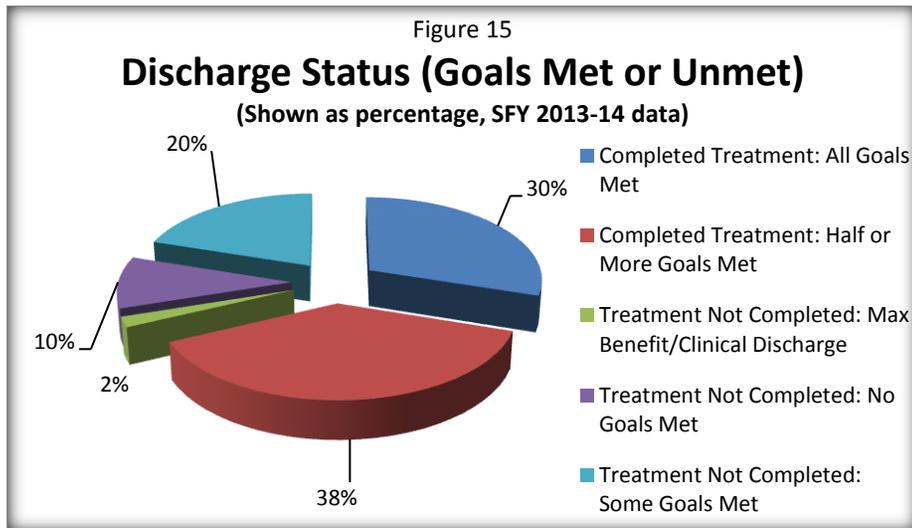

Figure 14

### Status of Other Problems Identified

(Status of treatment goals for other problems identified, SFY 2013-14)

Often times, a client presents for gambling disorder treatment with other problems needing to be addressed. Some of the more common problems aside of gambling are shown in Figure 14. Clinicians are having success in treating other problems identified by the client, as the majority of clients achieve or partially achieve treatment goals for other issues. In Figure 14, the purple area within each bar indicates that a particular co-occurring issue (found along the x-axis) was not applicable to the client. The green area suggests the goals for that particular issue were “not achieved.” The red area displays the number of clients who “partially achieved” goals pertaining to that issue. The blue area indicates the number of clients who achieved their goals for the corresponding issue.

## **PREVENTION**

Act 2010-01 created a requirement to transfer dollars in the sum of \$2 million or an amount equal to .002 multiplied by the total gross terminal revenue of all active and operating licensed gaming entities (whichever is greater) into the Compulsive and Problem Gambling Treatment Fund for the compulsive and problem gambling program.

From these funds, the Department annually distributes 50 percent of the monies to the Single County Authorities (SCA) through the Problem Gambling Funding Initiative (detailed below) to be expended solely for problem gambling needs assessment, prevention programs, outreach, educational programs, and other Department approved services.

## PROBLEM GAMBLING FUNDING INITIATIVE

Forty SCAs were awarded a total of \$4,659,695 for SFY 2013-2014. Below is a breakdown of each of the 40 SCAs and their respective award amounts.

Allegheny	\$385,114	Fayette	\$57,762
Armstrong/Indiana/Clarion	\$134,446	Forest/Warren	\$73,124
Beaver	\$46,753	Greene	\$2,753
Bedford	\$75,000	Huntingdon/Mifflin/Juniata	\$107,645
Berks	\$130,248	Lackawanna/Susquehanna	\$40,866
Blair	\$54,118	Lancaster	\$223,501
Bucks	\$335,810	Lawrence	\$67,750
Butler	\$205,037	Lebanon	\$49,199
Cambria	\$108,302	Lehigh	\$83,790
Cameron/Elk/McKean	\$17,485	Luzerne/Wyoming	\$159,586
Carbon/Monroe/Pike	\$20,928	Lycoming/Clinton	\$41,082
Centre	\$45,202	Mercer	\$28,180
Chester	\$74,817	Montgomery	\$22,401
Clearfield/Jefferson	\$89,651	Northampton	\$69,480
Columbia/Montour/Snyder/Union	\$12,462	Philadelphia	\$840,273
Crawford	\$107,457	Schuylkill	\$18,000
Cumberland/Perry	\$57,535	Venango	\$41,917
Dauphin	\$98,376	Washington	\$94,193
Delaware	\$220,043	Wayne	\$20,184
Erie	\$313,526	Westmoreland	\$90,750

Forty SCAs submitted proposals (funding initiative) detailing their plans to provide a wide array of problem gambling prevention services for SFY 2013-14. Funds provided to the SCAs were used to develop and implement a comprehensive system of problem gambling resources, prevention strategies, and programs. These problem gambling prevention services were provided either directly by the SCAs or their contracted provider(s).

Problem gambling prevention activities were provided in a variety of settings to high-risk populations and, when appropriate, communities affected by risk factors associated with problem gambling. The SCAs utilized the Pennsylvania's Performance Based Prevention System (PBPS) to plan, monitor, evaluate and analyze all problem gambling prevention services in order to identify effective prevention programs/services and direct prevention-related policy and funding.

Thirty-one problem gambling prevention evidence-based programs, evidence-informed programs, and state-approved strategies were provided throughout the fiscal year. The following are examples of some of the programs and strategies that were implemented.

Evidence-Based Program:

***Stacked Deck: A Program To Prevent Problem Gambling*** is a school-based prevention program that provides information about the myths and realities of gambling and guidance on making good choices, with the objective of modifying attitudes, beliefs, and ultimately gambling behavior. The program is designed for students in 9th through 12th grade. Lessons cover the history and realities of gambling, risk factors for and signs of problem gambling, fallacies about gambling, calculated risk and the assessment of situations involving risk, and barriers to good decision-making and problem solving. In SFY 2013-14, eight SCAs (Allegheny, Armstrong/Indiana/Clarion, Cambria, Carbon/Monroe/Pike, Crawford, Greene, Lebanon, and Washington) provided this program, serving a total of 746 individuals.

Evidence-Informed Program:

***Kids Don't Gamble... Wanna Bet?*** is an interdisciplinary curriculum for grades 3 through 8, developed by the North American Training Institute. It is designed to discourage underage gambling through improved critical thinking and problem solving skills. It also includes access to an interactive online magazine designed by teens for teens. In SFY 2013-14, ten SCAs (Cambria, Cameron/Elk/McKean, Centre, Chester, Delaware, Erie, Forest/Warren, Huntingdon/Mifflin/Juniata, Lycoming/Clinton, and Philadelphia) provided this service to a total of 8,024 individuals.

State-Approved Strategy:

***Gambling Away The Golden Years*** is an educational kit which explores the possibility of gambling turning from entertainment to addiction, especially in the retirement years. The program targets the older adult population and has been provided in a variety of settings including community senior centers. In SFY 2013-14, twelve SCAs (Allegheny, Armstrong/Indiana/Clarion, Berks, Butler, Carbon/Monroe/Pike, Clearfield/Jefferson, Crawford, Greene, Huntingdon/Mifflin/Juniata, Venango, Washington, and Westmoreland) provided this program serving a total of 1,765 participants.

Student Assistance Program (SAP)

The Student Assistance Program (SAP) is designed to assist school personnel in identifying issues including gambling, use of alcohol, tobacco and other drugs, and mental health issues, all of which pose barriers to a student's health and success. The primary goal of SAP is to help students overcome these barriers. Elements of SAP include 1) the construction of a well-trained SAP core team that meets regularly to discuss students who have been referred to SAP, 2) incorporation of parents and caregivers into the SAP process through meetings with parents to review student needs and to discuss potential referrals and intervention plan for the student, 3) a system of school based and community based support services to which students can be referred for assistance in addressing their needs, and 4) the provision of educational and support group services tailored to the needs of SAP referred students.

In SFY 2013-14, through the problem gambling funding initiative, the SCAs had the option to support the expansion of SAP services beyond what they had previously provided through other funding sources. During SFY 2013-14, a total of 19 SCAs utilized their problem gambling prevention funds to support expanded SAP services. These services included SAP consultations, core team meetings, parent/consultant/teacher meetings and educational groups, as well as core team member training.

<b>State Totals</b>	
<b>Type of SAP Service</b>	<b>Number of Services</b>
SAP Consultation	1,885
SAP Core Team Meetings	1,874
SAP Parent/Consultant/Teacher Meeting	1,443
SAP Groups	29
SAP Core Team Member Training	224
<b>Total</b>	<b>5,455</b>

See **Appendix B** for additional information about the programs and strategies implemented by the SCAs and their providers.

## **CONCLUSION**

Problem gambling is, and will continue to be, a compelling public health concern affecting Pennsylvanians of all ages, races and ethnic backgrounds in communities across the Commonwealth. The societal and economic costs can be significant, but they can be countered by targeted treatment and prevention aimed at minimizing harm to both the individual and society as a whole. The Department has worked to develop and implement a comprehensive, coordinated and effective compulsive and problem gambling program. In continuing to serve the Commonwealth, the Department will continue to work with the Pennsylvania Gaming Control Board, the Council on Compulsive Gambling of Pennsylvania, relevant stakeholders and others who are committed to helping those with a gambling problem.
