## Compulsive and Problem Gambling Annual Report

# 2015

Dear Members of the General Assembly:

The Department of Drug and Alcohol Programs is pleased to present the *2015 Compulsive and Problem Gambling Annual Report* to the Governor and the members of the General Assembly on the impact of the programs funded by the Compulsive and Problem Gambling Treatment Fund. You may also access this document electronically by visiting <http://www.ddap.pa.gov/treatment/Pages/Problem-Gambling.aspx#.VjOxOpjD-M8> and clicking on the link for our 2015 Compulsive and Problem Gambling Annual Report.

Please feel free to contact me if you have any questions. Thank you.

Sincerely,

A handwritten signature in dark ink, appearing to read "Gary Tennis", with a long, sweeping horizontal flourish extending to the right.

Gary Tennis

Secretary, Pennsylvania Department of Drug and Alcohol Programs

## **MISSION**

The mission of the Compulsive and Problem Gambling Program is to increase public awareness of services available for problem and compulsive gamblers and their family members, ensure the widespread availability of treatment programs for problem and compulsive gamblers and their families, and implement problem gambling prevention programs based upon findings throughout Pennsylvania.

## **COMPULSIVE AND PROBLEM GAMBLING TREATMENT FUND OVERVIEW**

The Department of Drug and Alcohol Programs (Department) implements a comprehensive, coordinated, and effective compulsive and problem gambling program for the Commonwealth. As stated in Act 2010-01, the sum of \$2 million or an amount equal to .002 multiplied by the total gross terminal revenue of all active and operating licensed gaming entities (whichever is greater) shall be transferred annually into the Compulsive and Problem Gambling Treatment Fund for the Compulsive and Problem Gambling Program.

From these funds, the Department annually distributes 50 percent of the monies to the Single County Authorities (SCA) to be expended solely for problem gambling needs assessment, prevention programs, outreach programs, educational programs, and other Department approved services.

Additionally, Act 2010-01 created a requirement to transfer \$3 million annually from the State Gaming Fund for treatment. Specifically, the full amount of these funds are allocated to the SCAs solely for financing drug and alcohol addiction assessments, including drug and alcohol addiction assessments associated or related to compulsive and problem gambling, as well as for the related addiction treatment in non-hospital residential detoxification facilities, non-hospital residential rehabilitation facilities and halfway houses licensed by the Department to provide addiction treatment.

## **HELPLINE**

The Department contracts with the Council on Compulsive Gambling of Pennsylvania (CCGP) to administer the Pennsylvania Gambling Helpline. Calls can be answered in English, Spanish and more than 60 other languages utilizing the American Telephone and Telegraph (AT&T) language service. The helpline provides crisis counseling and referral services to problem and compulsive gamblers and their families who may be experiencing difficulty as a result of problem or compulsive gambling. The helpline employs professionally-trained operators to take calls 24 hours a day, seven days a week, in a free and confidential manner. The operators collect as much data from each caller as the context of the call allows. Each call is assessed for the most appropriate referral information, and the caller is given names, phone numbers, descriptors, etc., for the resources being suggested.

Helpline resources include referrals to Pennsylvania gambling treatment providers and Gamblers Anonymous (GA) and Gam-Anon meetings. The helpline is also able to provide GA and Gam-Anon meeting information for New Jersey, Ohio, New York, West Virginia and Maryland that may be helpful and convenient for each caller. These meeting lists are updated no less than quarterly and often on a per change basis, meaning that as soon as the CCGP becomes aware of a change in meeting schedule(s), an update is sent to the helpline. Pennsylvania gambling treatment providers are licensed/certified behavioral health care specialists (psychiatrists, psychologists, social workers, counselors, etc.).

The gambling helpline information on the following charts (Figure A through Figure H below) reflects values over a 12-month span (July 1, 2014 through June 30, 2015). Note: Not all callers answer each and every question.

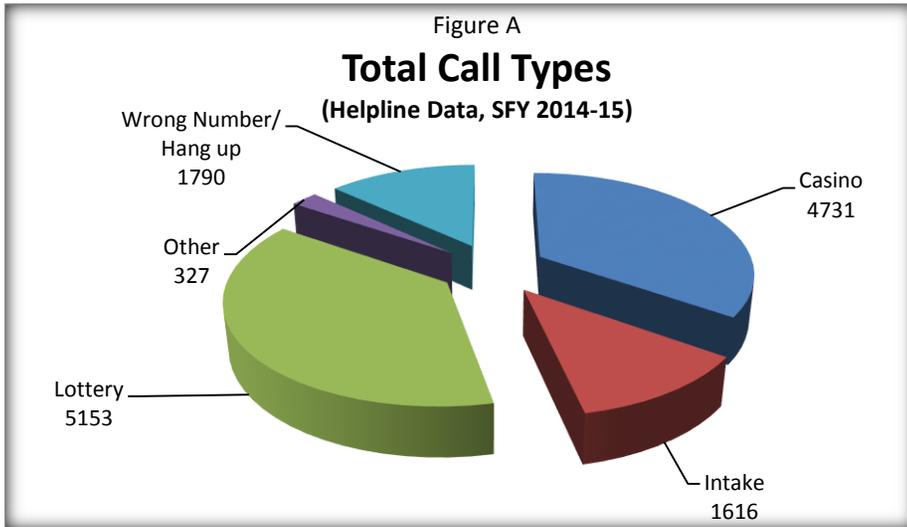

Figure A, left, identifies the total of all incoming call types. Calls to the helpline are identified and recorded in one of five categories. Calls pertaining to “Intake” identify callers seeking treatment, or general questions regarding the treatment process. Figure B through Figure H will reflect calls from the “Intake” category.

Figure B, right, displays the *precipitating event* of the caller who contacted the Gambling Helpline. Some callers identified more than one event.

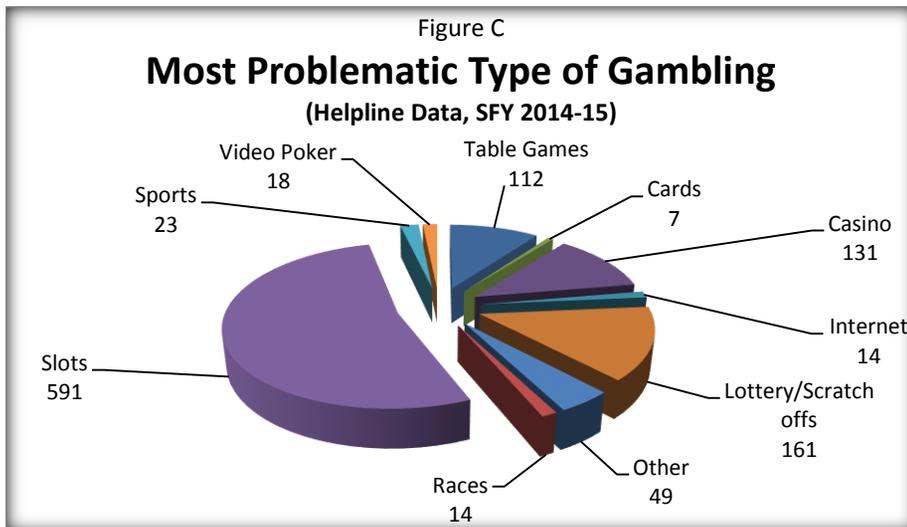

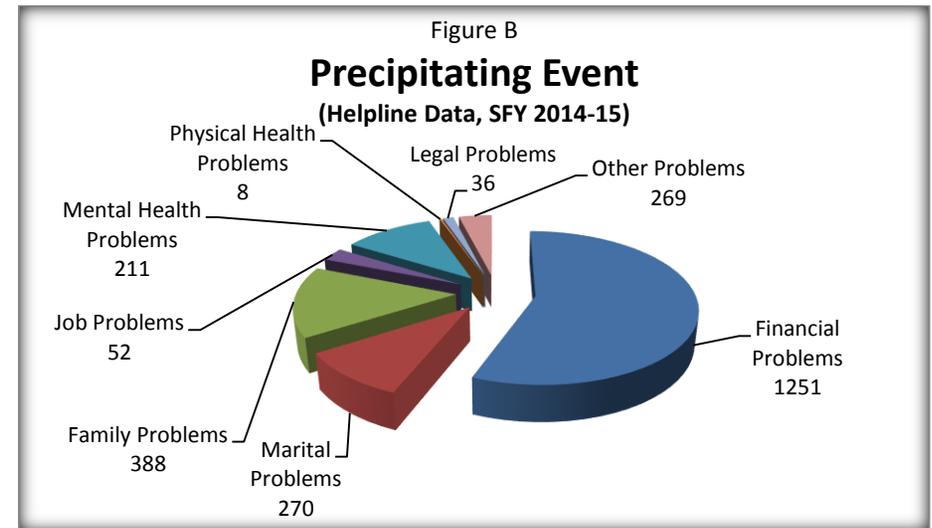

Figure C, left, displays the *most problematic type of gambling*. This data is gathered to identify games of preference. The majority of helpline callers identified slot machines as being most problematic.

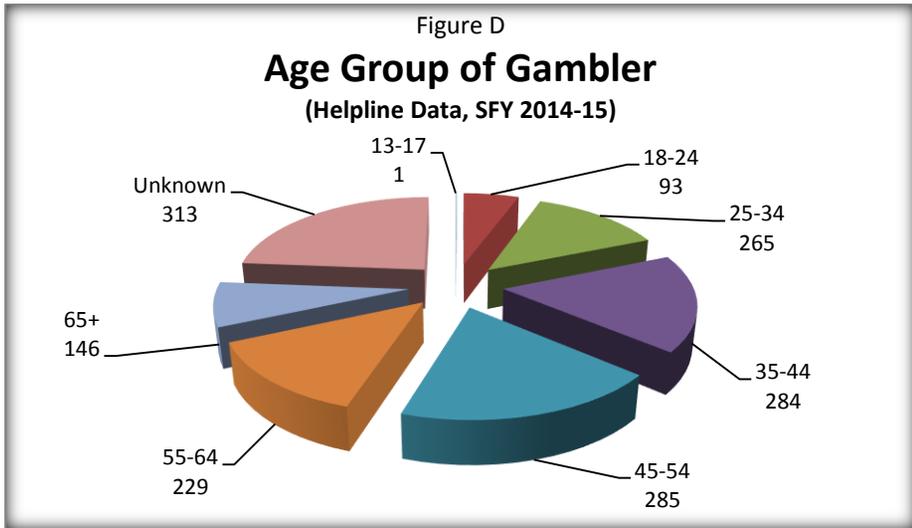

Figure D, left, displays the *age group* of the gambler. The top values denote the age (years) group, with the number of calls received noted below each age group.

Figure E, right, breaks down the *other problems identified* by the caller. It is important to note that a caller can answer “yes” to more than one question. In some cases, the caller may not present other problems.

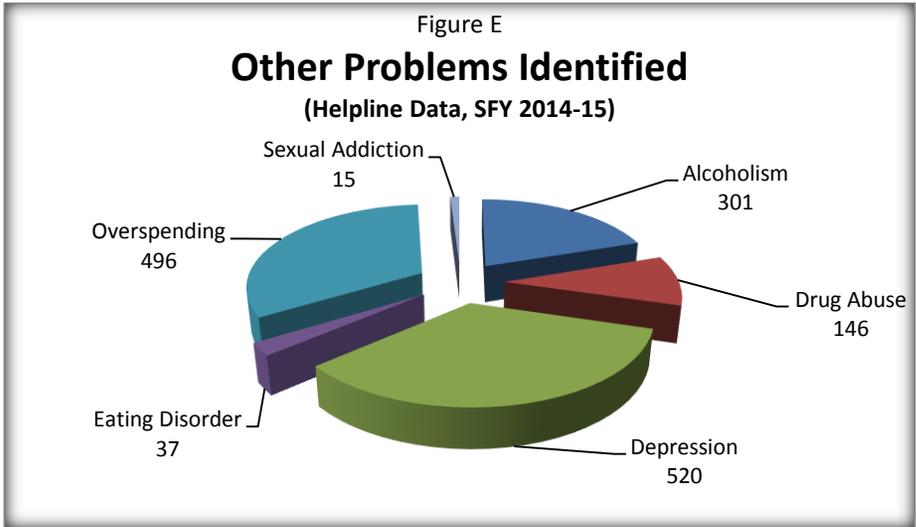

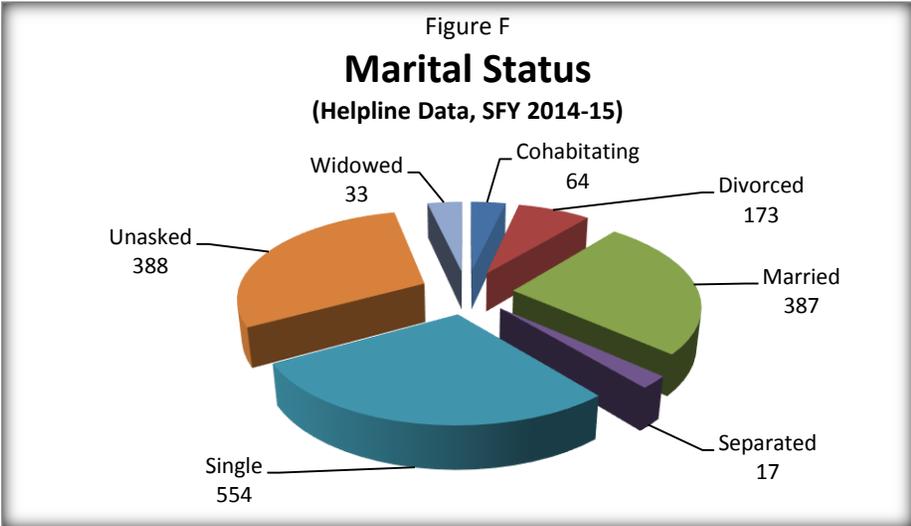

Figure F, left, displays the *marital status* of the gambler. Seven choices are identified, and the numeric value below each choice indicates the number of helpline callers selecting that option.

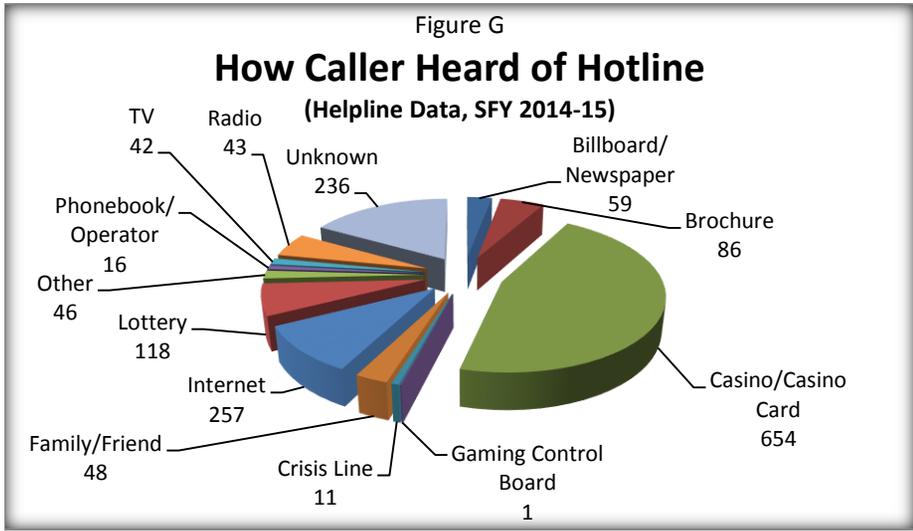

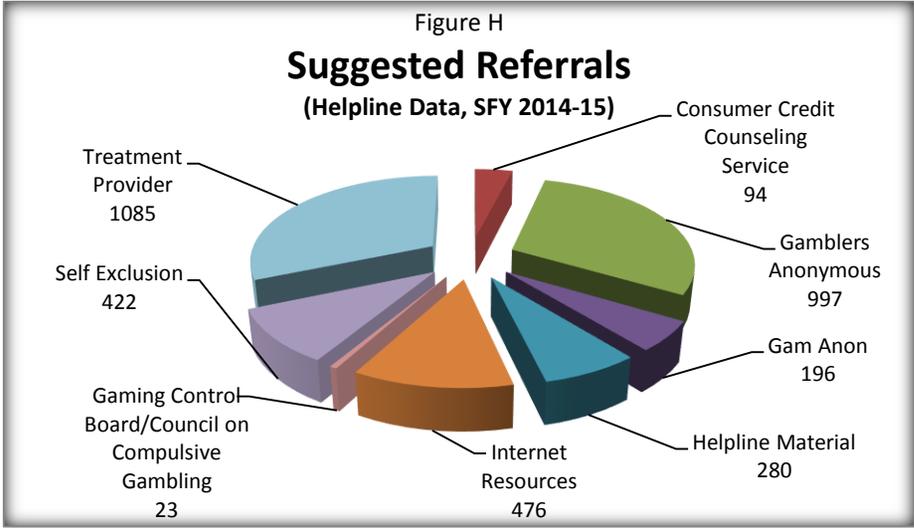

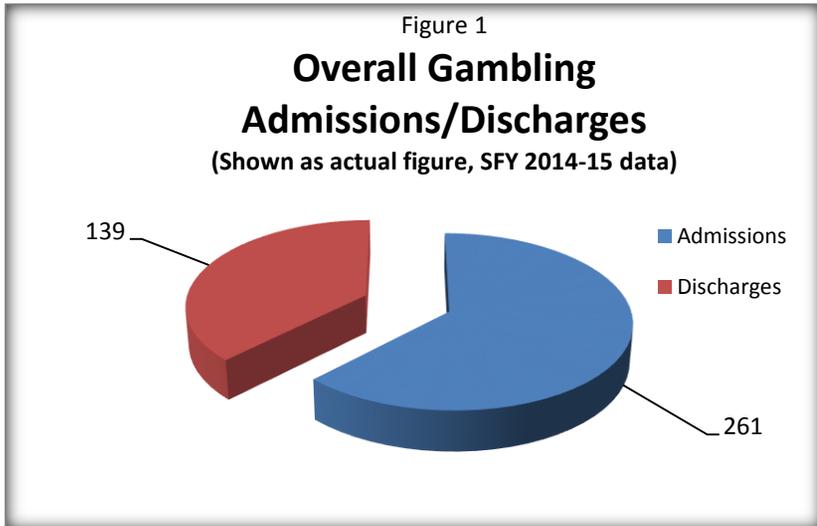

Figure G, left, reveals *different sources* through which the caller was informed of the helpline. Each response is listed under the corresponding category name.

Figure H, right, breaks down the *suggested referrals* provided to the caller. The majority of callers (1,085) were referred to a treatment provider. Callers often receive *multiple referral options*, as indicated by the data shown.

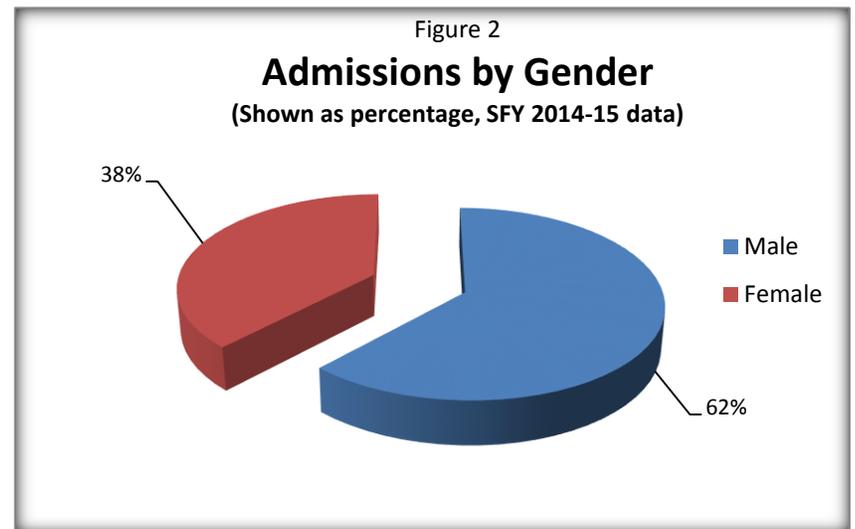

# STATUS OF GAMBLING ADDICTION TREATMENT IN PENNSYLVANIA

Outpatient problem gambling counseling services have been made available within the Commonwealth since September 2008. Providers who have been approved under the Department’s Participating Provider Agreement (PPA) have been receiving reimbursement for these services since that date. As of September 1, 2015, the Department has PPAs with 114 providers. During SFY 2014-15, there were 261 unique DDAP-funded admissions to compulsive and problem gambling treatment (Figure 1). The total amount invoiced for services provided in SFY 2014-15 was \$385,385.00.

The data in this section is based on clients who were admitted to, or discharged from, the Department’s gambling addiction treatment system. An admission occurs when a client presents to receive gambling addiction treatment with a provider. Figure 2, right, displays the percentage of unique admissions by gender. When a client has completed a particular type of treatment or changes providers, a discharge record is submitted with an associated discharge status.

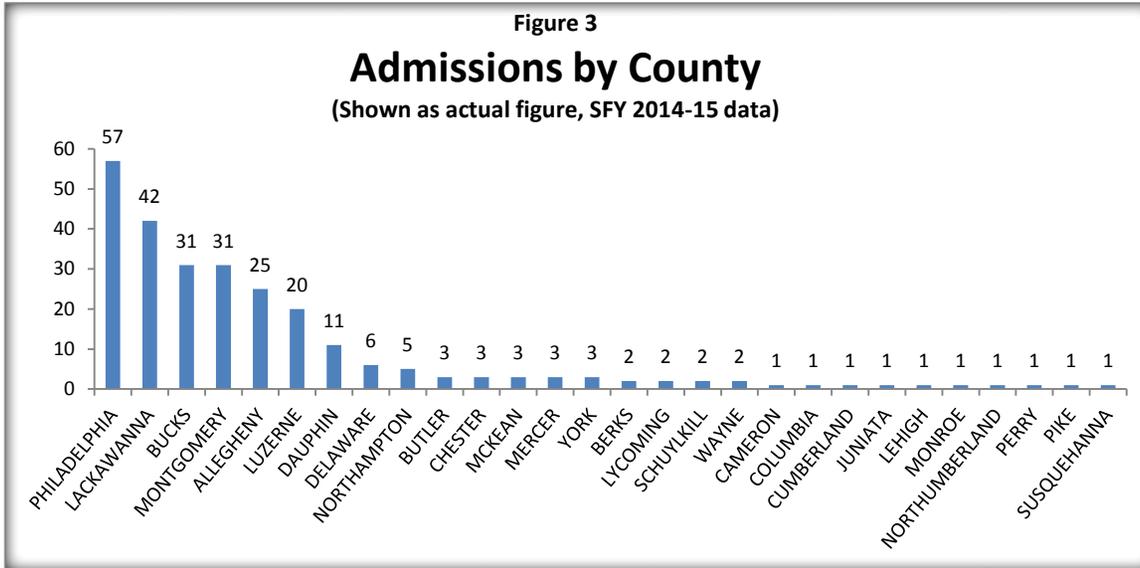

Figure 3, *Admissions by County*, depicts each County that had a client admitted for treatment (aka admission) and the number of admissions per county. There were 261 admissions for SFY 2014-15. Philadelphia, Lackawanna, Bucks, and Montgomery Counties accounted for 62% of the admissions.

The number of *discharges by County* that occurred during the fiscal year is shown in Figure 4. There were 139 discharges this fiscal year. Philadelphia, Lackawanna, and Bucks Counties accounted for 60% of the discharges statewide.

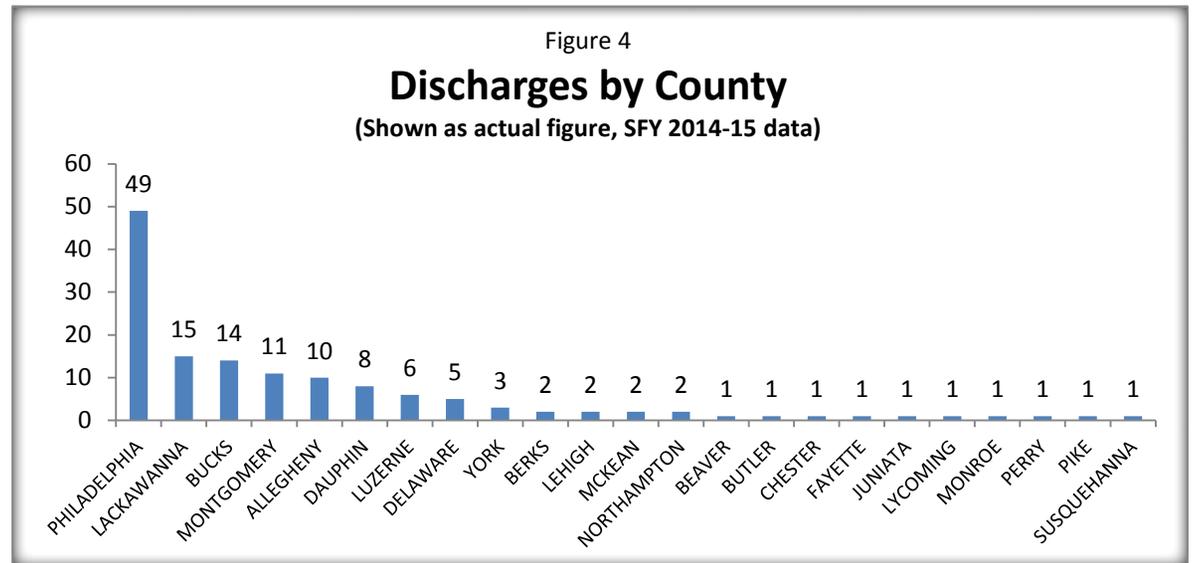

Figure 5

### Preferred Gambling Methods by Males

(Count of admissions reporting method, SFY 2014-2015 data)

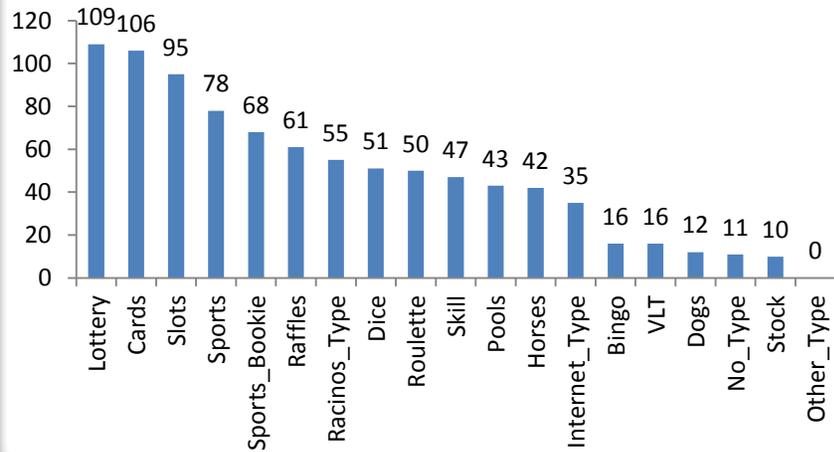

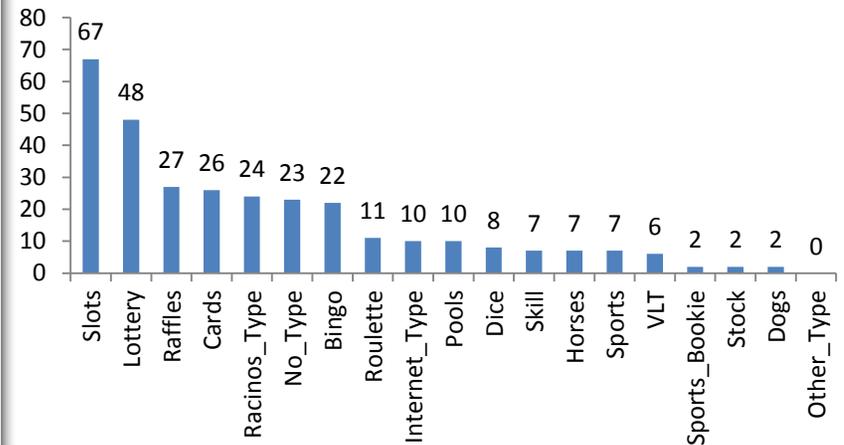

Figure 6

### Preferred Gambling Methods by Females

(Count of admissions reporting method, SFY 2014-2015 data)

The *preferred methods of gambling* reported by those who have used the services offered via the Compulsive and Program Gambling Program are displayed above in Figures 5 and 6. It is important to note that a client can report more than one preferred method. The Commonwealth uses this information to make decisions as to where we focus our advertising efforts.

## **COMPULSIVE AND PROBLEM GAMBLING TREATMENT OUTCOMES**

Pennsylvania's Department of Drug and Alcohol Programs utilizes a number of performance measures to determine the effectiveness of treatment services. The following pages provide information on the outcomes of the following performance measures:

- Employment status on admission and discharge (Figures 7-11)
- Average length of stay (Figure 12)
- Goals met or unmet upon discharge from treatment (Figure 13)
- Change in gambling frequency from admission to discharge (Figure 14)

The Department measures a client's employment status on admission and discharge because studies have shown that problem gambling may have negative effects on one's employment. We look at statistical data regarding average length of treatment (average length of stay) to determine if there is a correlation between length of stay and recovery from compulsive and problem gambling. An ultimate goal is to see a decrease in the frequency of gambling as a result of receiving treatment.

For purposes of these performance measures, an admission occurs when a client presents to receive gambling addiction treatment with a provider. A discharge is recorded when a client has completed a particular type of treatment or changes providers.

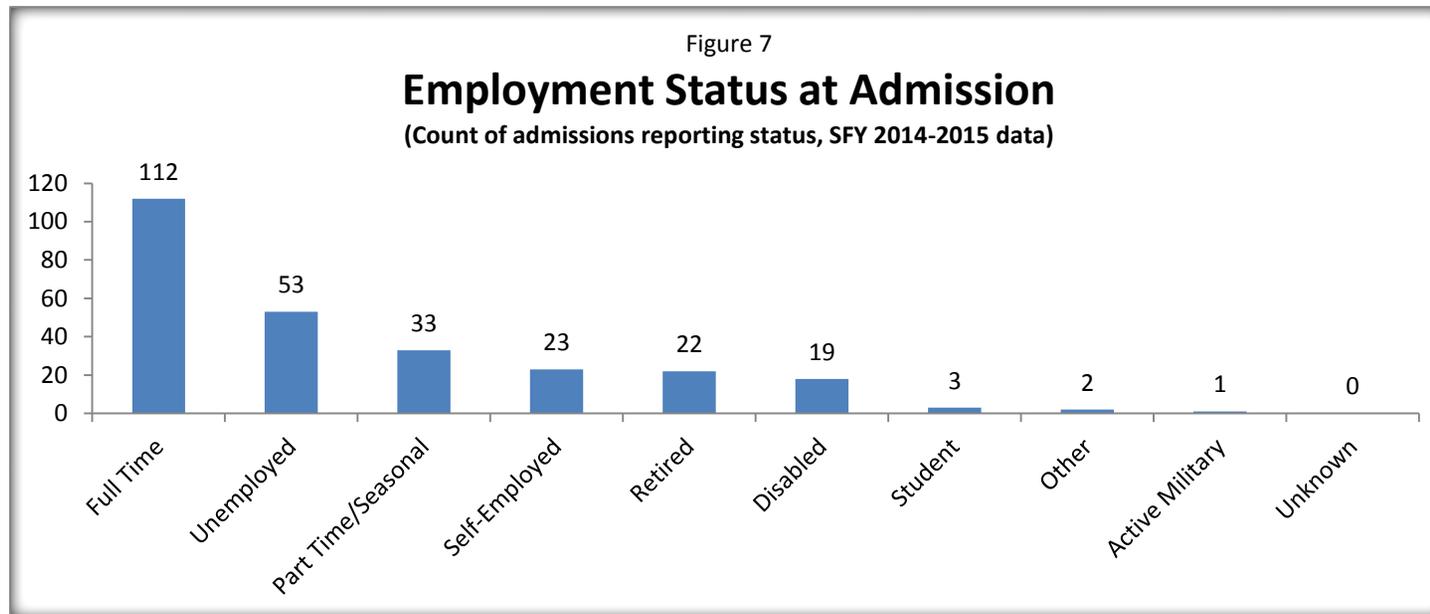

Figure 7 displays the *employment status at the time admission* to treatment. Of the 267 clients, the majority (168, or 62%) reported being employed in some fashion. Of those, 112 were employed full time. Fifty-three (53, or 20%) reported being unemployed, 22 (8%) were retired, 19 (7%) were disabled, 3 (1%) were students, 1 (<1%) was in active military status, and 2 (<1%) reported his/her employment status as “other”.

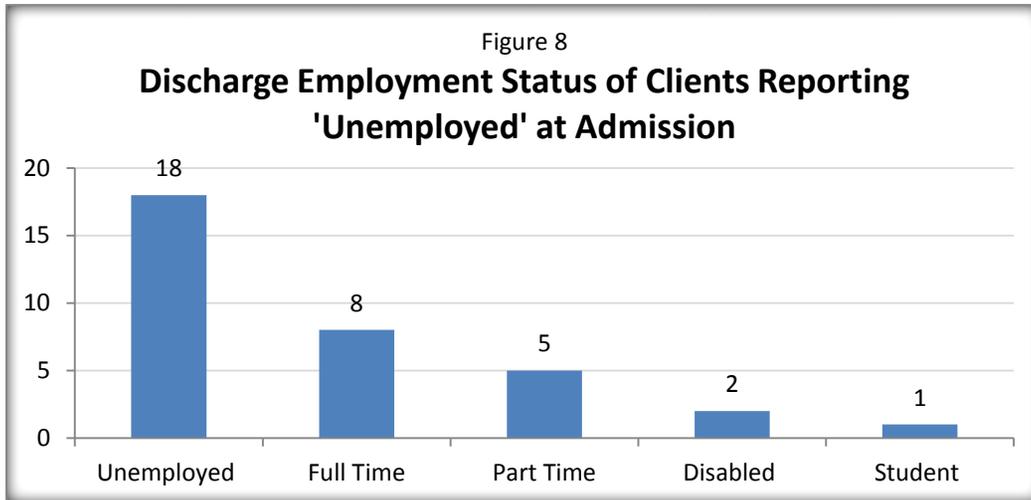

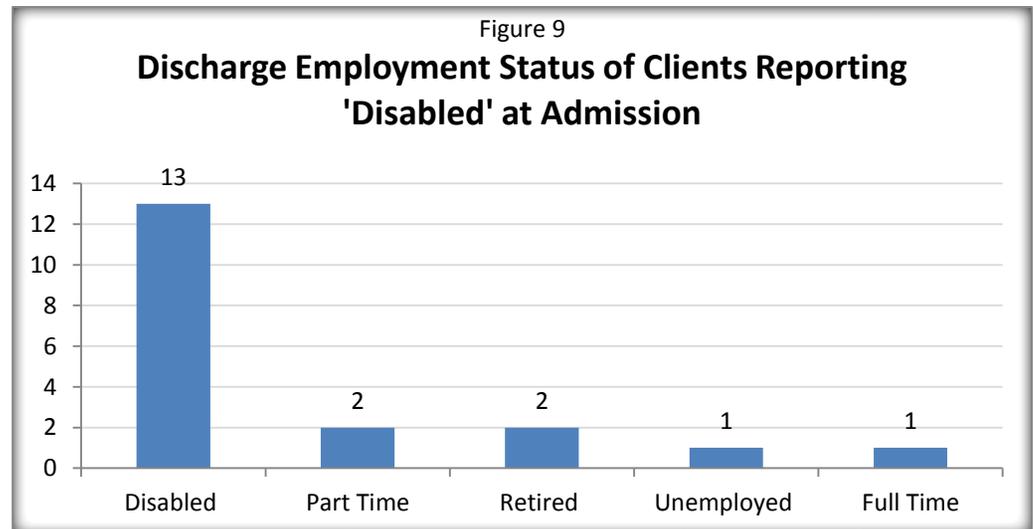

Figure 8 represents the *discharge employment status of clients who reported being unemployed at that the time of admission*. Of those reporting, 13 (38%) were gainfully employed either full time or part time upon discharge.

Similarly, Figure 9 shows the *discharge employment status of those who reported being disabled at the time of admission*. Of the 19 clients, 3 reported being gainfully employed either full time or part time, 13 were disabled, 2 were retired, and 1 was unemployed.

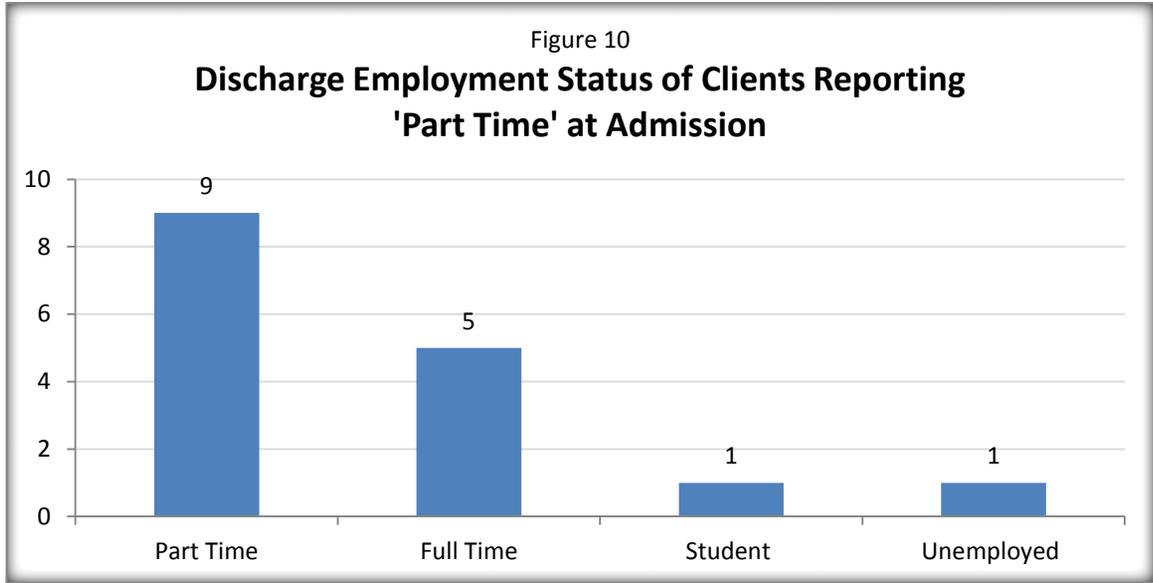

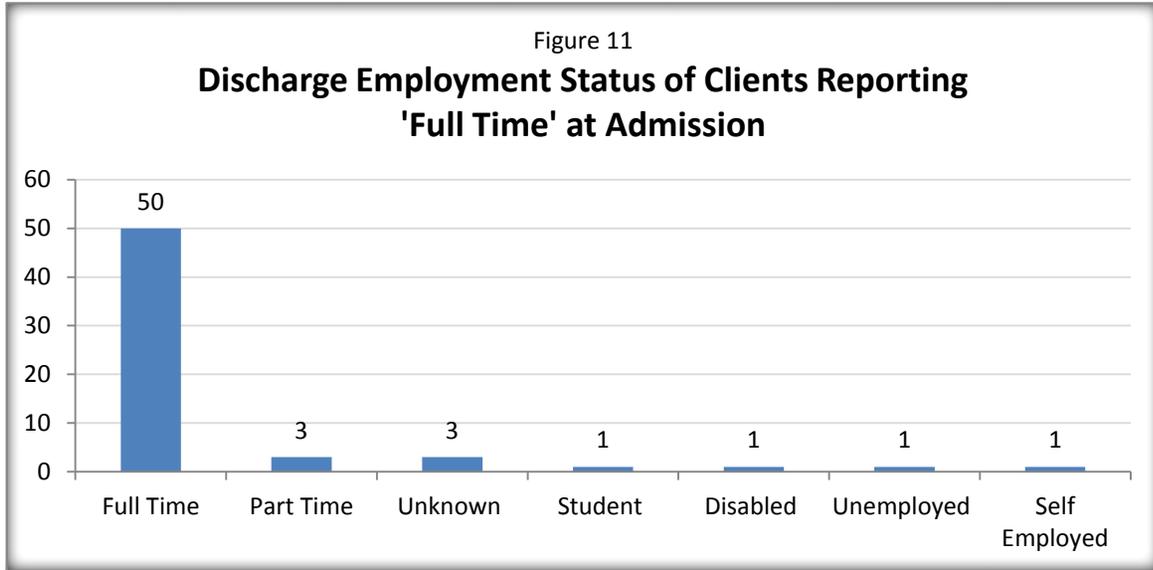

Figure 10 shows the *discharge employment status of those clients who reported being employed part time at the time of admission*. Nine (9) of the 16 reported being employed part time on discharge, 5 were full time, 1 was a student, and 1 was unemployed.

Likewise, Figure 11 shows the *discharge employment status of those who reported being employed full time when admitted*. Fifty (50) reported they remained employed full time, 1 became self-employed, 3 began working part time, 1 a student, 1 disabled, and 1 unemployed.

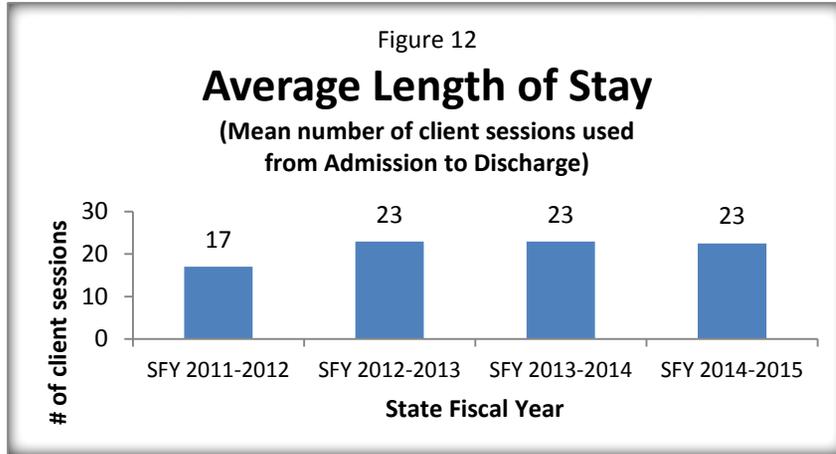

Figure 12 shows the *average lengths of stay* for the last four years. Clients have been utilizing an average of 23 sessions over the past three years.

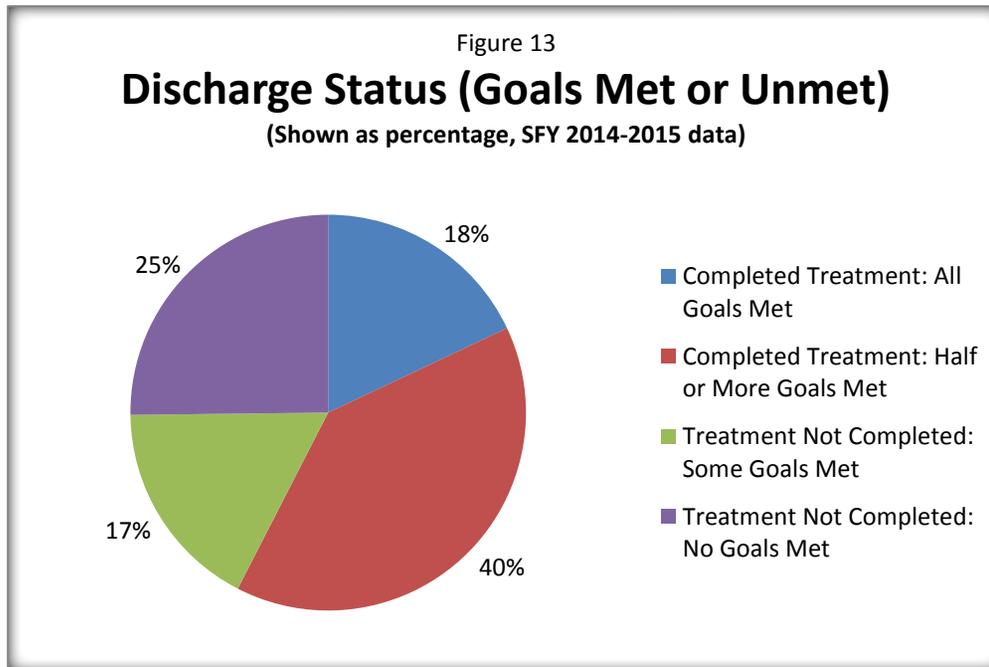

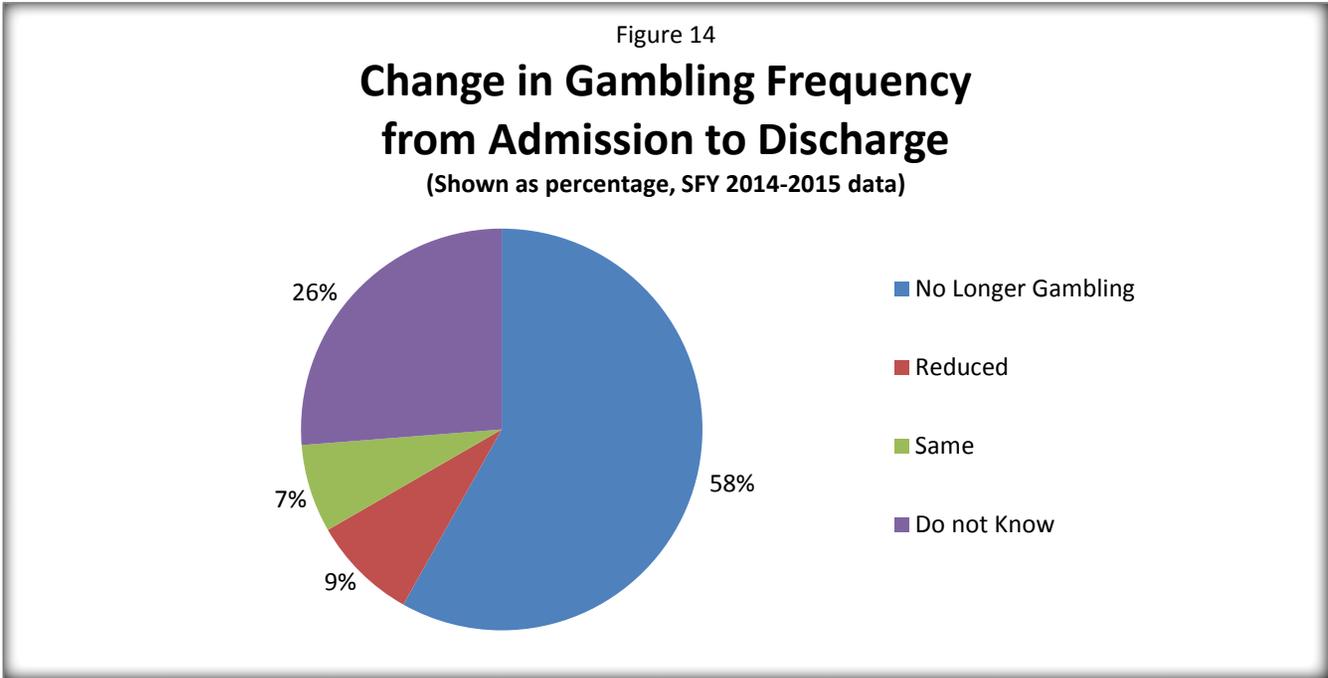

Figure 13 shows the *percentages of goals met at the time of discharge*, as well as if treatment was completed or not. Seventy-five percent (75%) of the clients are meeting at least some of their goals; 58% completed treatment, and of that 58%, 18% met all of their goals and 40% met at least half of their goals. Of the 42% that did not complete treatment, 17% met some of their goals.

Compulsive and problem gambling can be harmful as it can affect the personal, social and financial aspects of one’s life, as well as the lives of those connected to that person.

Figure 14 displays the *change in gambling frequency* resulting from gambling addiction treatment. For SFY 2014-15, 58% of those who were discharged reported they are no longer gambling; 9% reported they have reduced their gambling frequency; and 7% have had no change in gambling frequency. Twenty-six percent (26%) reported they did not know if their frequency had changed or not as a result of treatment.

## **PREVENTION**

Act 2010-01 created a requirement to transfer dollars in the sum of \$2 million or an amount equal to .002 multiplied by the total gross terminal revenue of all active and operating licensed gaming entities (whichever is greater) into the Compulsive and Problem Gambling Treatment Fund for the Compulsive and Problem Gambling Program.

From these funds, the Department annually distributes a minimum of 50 percent (50%) of the monies to the Single County Authorities (SCA) through the Problem Gambling Funding Initiative (detailed below) to be expended solely for problem gambling needs assessment, prevention programs, outreach, educational programs, and other Department approved services.

## PROBLEM GAMBLING FUNDING INITIATIVE

Forty (40) SCAs submitted proposals (funding initiative) detailing their plans to provide a wide array of problem gambling prevention services for SFY 2014-15. These SCAs were awarded a total of \$4,690,990 for SFY 2014-2015. Below is a breakdown of each of the 40 SCAs and their respective award amounts.

Allegheny	\$372,514	Fayette	\$57,955
Armstrong/Indiana/Clarion	\$133,664	Forest/Warren	\$74,550
Beaver	\$46,753	Greene	\$3,547
Bedford	\$75,000	Huntingdon/Mifflin/Juniata	\$108,660
Berks	\$132,243	Lackawanna/Susquehanna	\$41,204
Blair	\$49,067	Lancaster	\$226,154
Bucks	\$334,917	Lawrence	\$67,750
Butler	\$215,052	Lebanon	\$52,558
Cambria	\$106,123	Lehigh	\$73,692
Cameron/Elk/McKean	\$17,253	Luzerne/Wyoming	\$159,586
Carbon/Monroe/Pike	\$26,429	Lycoming/Clinton	\$41,175
Centre	\$46,719	Mercer	\$31,605
Chester	\$74,817	Montgomery	\$22,401
Clearfield/Jefferson	\$112,293	Northampton	\$69,480
Columbia/Montour/Snyder/Union	\$12,462	Philadelphia	\$849,898
Crawford	\$107,951	Schuylkill	\$18,000
Cumberland/Perry	\$59,126	Venango	\$41,553
Dauphin	\$85,768	Washington	\$94,193
Delaware	\$224,322	Wayne	\$20,280
Erie	\$313,526	Westmoreland	\$90,750

Funds provided to the SCAs were used to develop and implement a comprehensive system of problem gambling resources, prevention strategies, and programs. These problem gambling prevention services were provided either directly by the SCAs or their contracted provider(s).

Problem gambling prevention activities were provided in a variety of settings to high-risk populations and, when appropriate, communities affected by risk factors associated with problem gambling. The SCAs utilized the Pennsylvania's Performance Based Prevention System (PBPS) to plan, monitor, evaluate and analyze all problem gambling prevention services in order to identify effective prevention programs/services and direct prevention-related policy and funding.

Twenty-seven problem gambling prevention evidence-based programs, evidence-informed programs, and state-approved supplemental strategies were provided throughout the fiscal year. The following are examples of some of the programs and strategies that were implemented.

Evidence-Based Program:

***Stacked Deck: A Program To Prevent Problem Gambling*** is a school-based prevention program that provides information about the myths and realities of gambling and guidance on making good choices, with the objective of modifying attitudes, beliefs, and ultimately gambling behavior. The program is designed for students in 9th through 12th grade. Lessons cover the history and realities of gambling, risk factors for and signs of problem gambling, fallacies about gambling, calculated risk and the assessment of situations involving risk, and barriers to good decision-making and problem solving. In SFY 2014-15, nine SCAs (Allegheny, Armstrong/Indiana/Clarion, Bedford, Cambria, Carbon/Monroe/Pike, Clearfield/Jefferson, Crawford, Greene, and Luzerne/Wyoming) provided this program, serving a total of 722 individuals.

Evidence-Informed Program:

*Kids Don't Gamble... Wanna Bet?* is an interdisciplinary curriculum for grades 3 through 8, developed by the North American Training Institute. It is designed to discourage underage gambling through improved critical thinking and problem solving skills. It also includes access to an interactive online magazine designed by teens for teens. In SFY 2014-15, ten SCAs (Cambria, Cameron/Elk/McKean, Centre, Clearfield/Jefferson, Crawford, Delaware, Erie, Lycoming/Clinton, Philadelphia, and Venango) provided this service to a total of 6,160 students.

State-Approved Supplemental Strategy:

*Gambling Away The Golden Years* is an educational kit which explores the possibility of gambling turning from entertainment to addiction, especially in the retirement years. The program targets the older adult population and has been provided in a variety of settings including community senior centers. In SFY 2014-15, twelve SCAs (Allegheny, Armstrong/Indiana/Clarion, Bedford, Berks, Butler, Carbon/Monroe/Pike, Clearfield/Jefferson, Greene, Huntingdon/Mifflin/Juniata, Venango, Washington, and Westmoreland) provided this program serving a total of 1,824 participants.

Student Assistance Program (SAP)

**The Student Assistance Program (SAP)** is designed to assist school personnel in identifying issues including gambling, use of alcohol, tobacco and other drugs, and mental health issues, all of which pose barriers to a student's health and success. The primary goal of SAP is to help students overcome these barriers. Elements of SAP include: 1) the construction of a well-trained SAP core team that meets regularly to discuss students who have been referred to SAP; 2) incorporation of parents and caregivers into the SAP process through meetings with parents to review student needs and to discuss potential referrals and intervention plan for the student; 3) a system of school based and community based support services to which students can be referred for assistance in addressing their needs; and 4) the provision of educational and support group services tailored to the needs of SAP referred students.

In SFY 2014-15, through the Problem Gambling Funding Initiative, the SCAs had the option to support the expansion of SAP services beyond what they had previously provided through other funding sources. During SFY 2014-15, a total of 16 SCAs utilized their problem gambling prevention funds to support expanded SAP services. These services included SAP consultations, core team meetings, training, parent/consultant/teacher meetings and educational groups.

<b>State Totals</b>	
<b>Type of SAP Service</b>	<b>Number of Services Provided</b>
SAP Consultation	2,184
SAP Core Team Meeting	1,677
SAP Parent/Consultant/Teacher Meeting	1,874
SAP Group	174
SAP Training	111
<b>Total</b>	<b>6,020</b>

See **Appendix B** for additional information about the programs and strategies implemented by the SCAs and their providers.

## **CONCLUSION**

Problem gambling is, and will continue to be, a compelling public health concern affecting Pennsylvanians of all ages, races and ethnic backgrounds in communities across the Commonwealth. The societal and economic costs can be significant, but they can be countered by targeted treatment and prevention aimed at minimizing harm to both the individual and society as a whole. The Department has worked to develop and implement a comprehensive, coordinated and effective Compulsive and Problem Gambling Program. In continuing to serving the Commonwealth, the Department will continue to work with the Pennsylvania Gaming Control Board, the Council on Compulsive Gambling of Pennsylvania, relevant stakeholders and others who are committed to helping those with a gambling problem.

## APPENDIX A

### SUPPLEMENTAL PROGRAM ACTIVITY/EXPENDITURE REPORT

Per Act 2010-01, \$3 million is transferred annually from the State Gaming Fund for drug and alcohol treatment. The information below displays the allocation of expenditures of those funds for this state fiscal year (7/1/14 to 6/30/15).

<u>Activity Name and Number</u>	<u>Adult Clients</u>	<u>Adolescent Clients</u>	<u>Expenditures</u>
Assessments	3,889	67	\$499,340
Inpatient Non-Hospital Detoxification	822	0	\$674,174
Inpatient Non- Hospital Short-Term Rehab	658	0	\$1,253,118
Inpatient Non-Hospital Long-Term Rehab	21	5	\$124,161
Inpatient Non-Hospital Co-occurring Rehab	144	1	\$343,865
Halfway House	46	0	\$104,695
<b>Grand Total Expenditures</b>	<b>5,580</b>	<b>73</b>	<b>\$2,999,353</b>

## STATE GAMING FUND: SCA SPECIFIC FUNDING FOR DRUG AND ALCOHOL TREATMENT SERVICES

The number of Adult and Adolescent clients receiving services courtesy of the \$3 million transfer from the State Gaming Fund can be found in the Supplemental Program Activity/Expenditure Report, as part of Appendix A.

### EXPENDITURES - Reporting Period: 7/1/14 - 6/30/15

Single County Authority	Expenditures	SCA	Expenditures	SCA	Expenditures
Allegheny	\$351,144	Erie	\$104,188	Somerset	\$17,993

## APPENDIX C

### MEDIA CAMPAIGN ACTIVITIES

- Objective
  - Educate and inform Pennsylvanians about services available to prevent and treat problem/pathological gambling.
  - Generate calls to the helpline and drive traffic to the website.
- Target Audience
  - General Market
    - Men 18-54
  - African Americans
    - Men 25-54
  - Asians
    - Men 25-49
  - Latinos
    - Men 25 +
- Timing
  - November 2014 - March 2015
- Budget
  - \$1 million

## SUMMARY OF MEDIA ACTIVITIES

### Contracted Budget

- Over 99% of the budget was spent, leaving a small credit of less than 1% mainly from ad-serving fees.

### Mobile & Video Performance:

- Total Impressions: **31.7 million**
- Total Clicks: **174.3 thousand**
- Total Video Completions: **9.3 million**

### Paid Search Performance:

- Total Impressions: **145.7 thousand**
- Total Clicks: **1.1 thousand**

### Key Results:

- **Video Completion Rate= 44%:** Among the 21K+ users who chose to begin our video, 9,368,791 completed the spot in its entirety (44% completion rate).
- **Banner Click through Rate (CTR) = 0.51%:** Out of every 10,000 users who saw our display banners, 51 chose to click through to [PAProblemGambling.com](http://PAProblemGambling.com).

Rapid Eye Movement	Pittsburgh - I-70 New Stanton Interchange

## DIGITAL BILLBOARDS

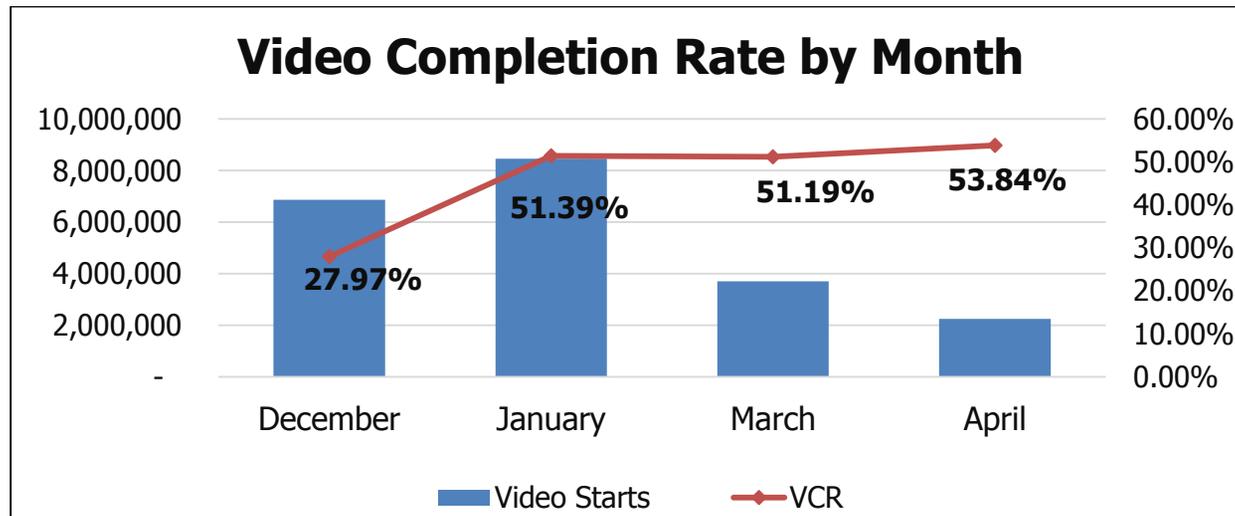

Dec/08/2014 11:17:50

## MOBILE & VIDEO PERFORMANCE

### Video Completion Rate

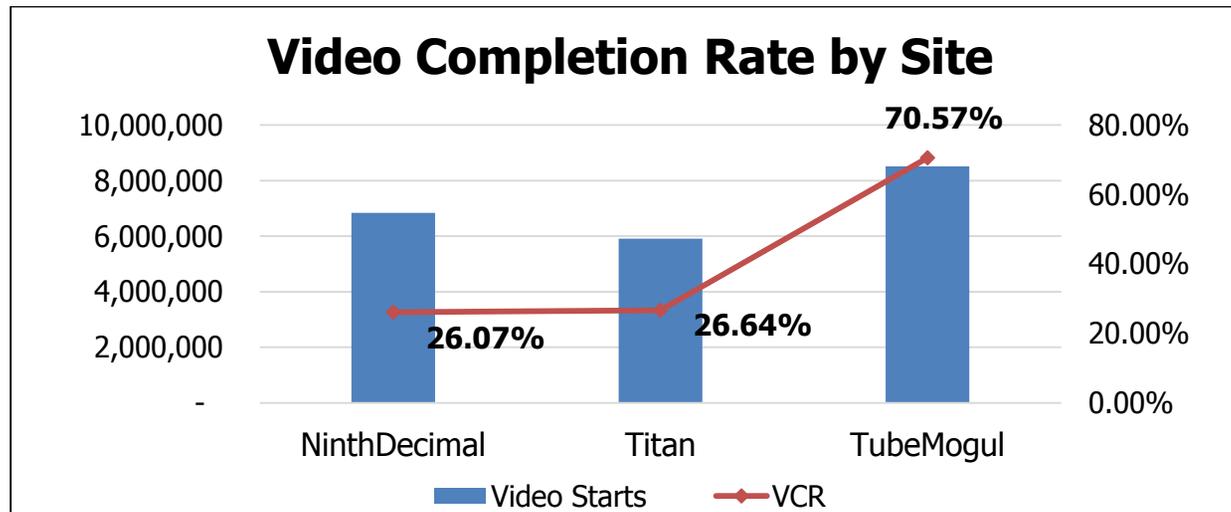

- Our key performance indicator with online video was **video completion rate** (VCR), as this metric reveals the percent of users who were engaged with our commercials and watched them through the end.
- Our average VCR increased throughout the campaign. The vendors optimized towards our ideal audience as more data was collected over time.

## MOBILE & VIDEO PERFORMANCE

### Video Completion Rate

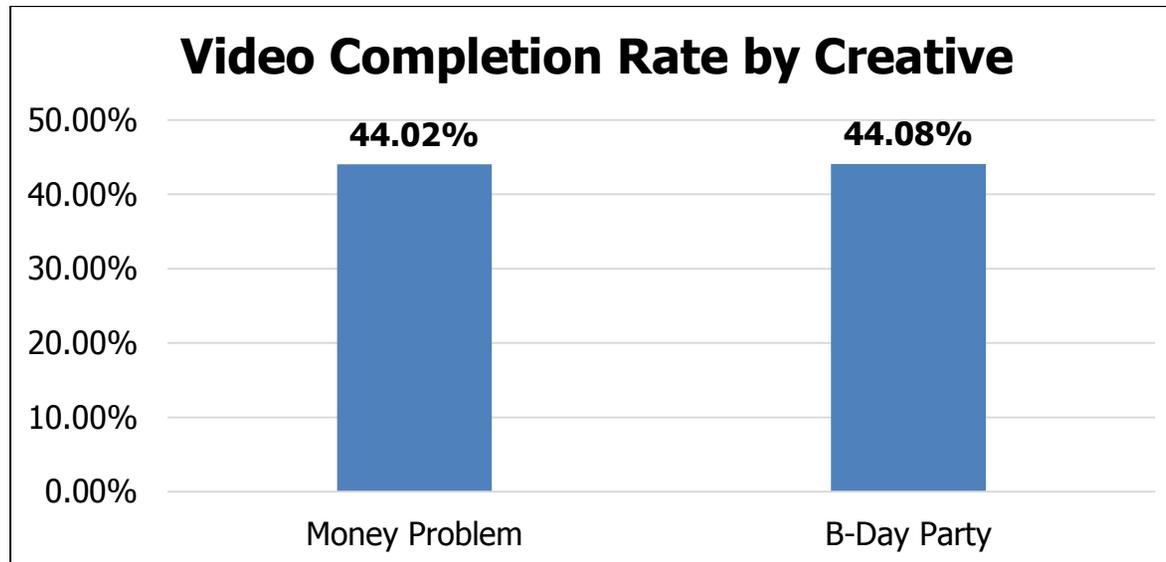

- The chart below portrays the video completion rate performance by vendor.
  - **NinthDecimal** and **Titan** had similar metrics, as these were our two mobile partners. We are not surprised to see the lower VCR's with mobile since our spot was 30 seconds. Fifteen (15) second spots typically perform better, as users lose interest when consuming video on a phone.
  - While **TubeMogul** delivered a much stronger VCR and more impressions, the mobile videos were extremely targeted to specific locations (stadiums, casinos, etc.), so it is possible these users were more qualified.

## MOBILE & VIDEO PERFORMANCE

### Video Completion Rate

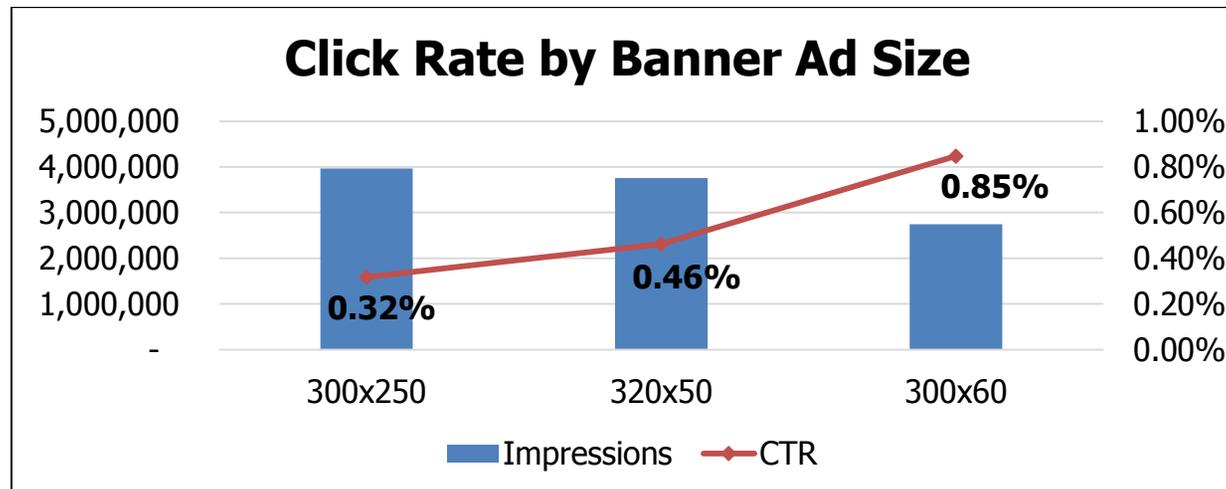

- The chart below breakouts the video completion rate by the two creative versions: **Money Problem** and **B-Day Party**.
  - It is interesting to see the rates were so similar and were without fluctuation. This reveals that each spot was equally engaging for users.

## MOBILE & VIDEO PERFORMANCE

### Banner Ad Size

- To supplement our online videos, we ran desktop and mobile banners. When analyzing the three companion banner ad sizes below, our primary KPI was **Click Rate**. This reveals the percent of users who saw our banners and chose to click through to the landing page to learn more.
- Industry benchmarks are around 0.09%. All three of our banners delivered significant metrics above this standard rate.
- It is no surprise the 300x600 delivered the strongest CTR, as that was the largest and most high-impact unit.

## MOBILE & VIDEO PERFORMANCE Banner Ad Size

300 X 250 Banner

300 X 60 Banner (mobile)

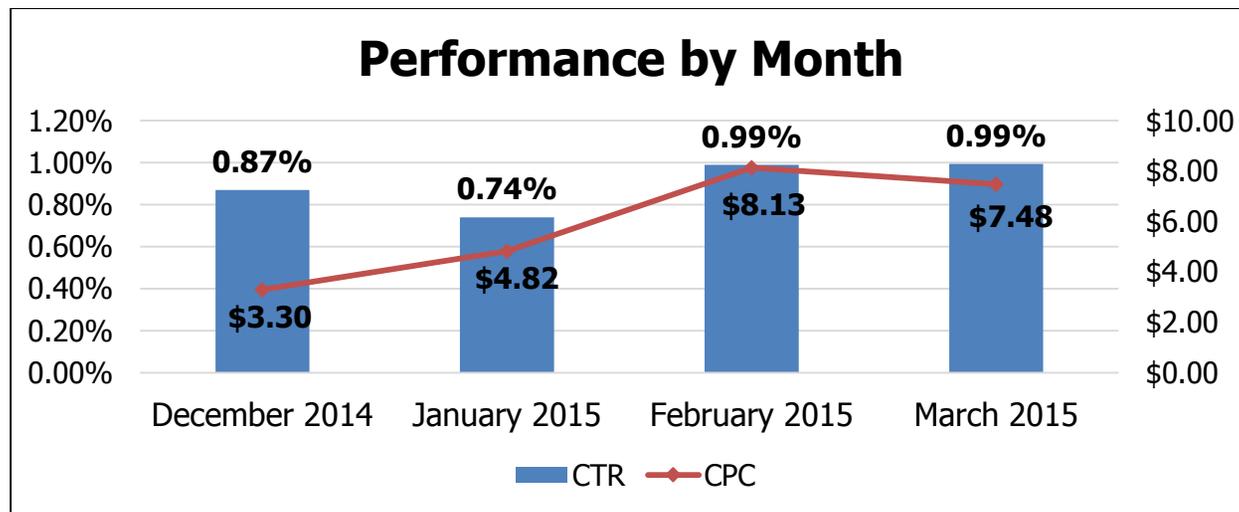

320 X 50 Banner (mobile)

## PAID SEARCH OVERVIEW

### Cost Per Click vs. Click through Rate

- The campaign ran in three increments on Google AdWords from December 8th to February 1st and again from March 16th to March 29th.
- We drove **1,194 clicks** from **145,744 impressions** at an average **Cost Per Click (CPC) of \$4.78** and a **Click Through Rate (CTR) of 0.82%**.
- The campaign earned the most clicks from December through early February, totaling 1,000 clicks (or 84% of overall clicks).
- The CTR performed the best during February and March, with a CTR of 0.99%.

## PAID SEARCH OVERVIEW

### Ad Groups

- The Ad Groups that performed the best overall were **Problem Gambling** and **Get Help**, driving in **1,173 clicks, or 98% of all clicks overall**.
- Each ad group maintained a prominent search presence, with an average position of 1.5.

Ad Group	Impressions	Clicks	CTR	CPC	Cost	Avg. Position
Problem Gambling	111,185	647	0.58%	\$ 5.55	\$ 3,590.00	1.3
Get Help	33,731	526	1.56%	\$ 3.71	\$ 1,952.02	1.7
Preventing Relapses	511	14	2.74%	\$ 10.17	\$ 142.35	1.1
Friends and Family	163	7	4.29%	\$ 4.03	\$ 28.23	1.2
Are You At Risk	154	-	0.00%	\$ -	\$ -	1.1
<b>Grand Total</b>	<b>145,744</b>	<b>1,194</b>	<b>0.82%</b>	<b>\$ 4.78</b>	<b>\$ 5,712.60</b>	<b>1.5</b>
