DEPARTMENT OF DRUG AND
ALCOHOL PROGRAMS

Commonwealth of Pennsylvania

**Compulsive and
Problem Gambling
Annual Report**

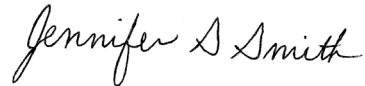

2017

Dear Members of the General Assembly,

The Department of Drug and Alcohol Programs is pleased to present the 2017 Compulsive and Problem Gambling Annual Report to the Governor and Members of the General Assembly regarding the impact of the programs funded by Compulsive and Problem Gambling Treatment Fund (Act 1 of 2010). This report will also be available electronically by visiting <http://www.ddap.pa.gov/>.

Please contact me if you have any questions. Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Jennifer S. Smith".

Jennifer S. Smith
Acting Secretary,
Pennsylvania Department of Drug and Alcohol Programs

Mission

The mission of the Compulsive and Problem Gambling Program is to increase public awareness of services available for problem and compulsive gambling, ensure the widespread availability of treatment programs for problem and compulsive gamblers, their family members, and significant others, and implement problem gambling prevention programs based upon findings throughout Pennsylvania.

Department Overview of Gaming Revenue

The Department of Drug and Alcohol Programs (Department) implements a comprehensive, coordinated, and effective compulsive and problem gambling program for the Commonwealth. As stated in Act 1 of 2010 (Act 2010-01), the sum of \$2 million or an amount equal to .002 multiplied by the total gross terminal revenue of all active and operating licensed gaming entities (whichever is greater) shall be transferred annually into the Compulsive and Problem Gambling Treatment Fund for the Compulsive and Problem Gambling Program.

From these funds, the Department annually distributes approximately 66 percent of the monies to its county-level grantees called Single County Authorities (SCAs) to be expended solely for problem gambling needs assessment, prevention programs, outreach programs, educational programs, and other Department-approved services. An additional ten percent is provided to licensed Gambling Treatment Providers to provide outpatient gambling treatment services throughout the Commonwealth of Pennsylvania. The remaining portion covers operating costs associated with the administration and oversight of the program.

Additionally, Act 2010-01 created a requirement to transfer \$3 million annually from the State Gaming Fund for treatment (see page 25 for more details). Specifically, the full amount of these funds is allocated to the SCAs solely for financing drug and alcohol addiction assessments, including drug and alcohol addiction assessments associated or related to compulsive and problem gambling, as well as for the related addiction treatment.

Problem Gambling Helpline

The Department contracts with the Council on Compulsive Gambling of Pennsylvania, Inc. (CCGP) to manage its toll-free Pennsylvania Gambling Helpline, 1-877-565-2112 and a 24-hour internet chatline found at:
<http://www.ddap.pa.gov/treatment/Pages/Problem-Gambling.aspx>.

The helpline provides confidential crisis counseling and referral services to problem and compulsive gamblers and family members or significant others who may be experiencing difficulty as a result of problem or compulsive gambling. Calls to the helpline are answered 24 hours a day, seven days a week, by professionally-trained operators in a free and confidential manner.

Calls can be answered in English, Spanish and more than 60 other languages utilizing the American Telephone and Telegraph (AT&T) language service. The operators collect as much data from each caller as the context of the call allows, given not all callers answer every question. In addition, callers may provide more than one answer to any given question. Each call is assessed for the most appropriate referral information, and the caller is given names, phone numbers, addresses, etc., for the resources suggested.

Helpline resources include referrals to Pennsylvania gambling treatment providers, Gamblers Anonymous (GA) and Gam-Anon meetings, and informational brochures. Pennsylvania gambling treatment providers are licensed/certified behavioral health care specialists (psychiatrists, psychologists, social workers, professional counselors, etc.). The helpline is able to provide current meeting information for GA and Gam-Anon meetings in Pennsylvania, New Jersey, Ohio, New York, West Virginia and Maryland.

The Problem Gambling Helpline information on the following charts (Figures 1 through 8 below) reflects values over a 12-month, State Fiscal Year (SFY) span, from July 1, 2016 through June 30, 2017.

Figure 1, above, identifies the total of all incoming calls. Helpline call types are identified and recorded in one of five categories. Calls pertaining to “Intake” identify callers seeking treatment, or general questions regarding the treatment process totaled 1,173 (11 percent). The remainder of the helpline data presented below (Figures 2 through 8) is reflective of calls from the “Intake” category. In some instances, callers may choose more than one presented option or choice, and that is reflected in the data shown in Figures 2, 5, and 8.

Figure 2
Precipitating Problem(s)
(Intake Calls SFY 2016-17)

Figure 2, above, displays a breakdown of the precipitating problem(s) that Intake callers reported were a result of gambling. It is important to note that more than one problem can be reported by the caller.

Figure 3
Most Problematic Type of Gambling
(Intake Calls SFY 2016-17)

Figure 3, above, displays the most problematic type of gambling reported by the Intake caller. This data is gathered to identify gambling preference. As in past years, the majority of helpline callers identified slot machines as being most problematic.

Figure 4, above, displays the age group of the gambler as reported by the individual who called the helpline. The age groups are denoted below, and the number of calls received are noted in the pie chart. Unknown numbers include caller's unwillingness to disclose their age with no reason given.

Figure 5, above, breaks down the other problems identified by the caller. It is important to note that a caller can answer "yes" to more than one question. In some cases, the caller may not have presented any additional problems.

Figure 6, above, displays the marital status of the caller. Seven choices are identified, and the numeric values above each choice indicates the number of helpline callers selecting that option.

Figure 7, above, reveals how the caller heard of the helpline. Fourteen categories are listed, and the number (and percentages) of responses is listed above the corresponding category name.

Figure 8, above, breaks down the referrals suggested to the caller. The majority of callers (879) were referred to treatment providers. Callers may be provided more than one referral option, which is reflected in the data shown.

Status of Outpatient Gambling Addiction Treatment in Pennsylvania

Outpatient problem gambling treatment services have been available within the Commonwealth since late 2008. The data in this section is based on clients who were admitted to, or discharged from, the Department's gambling treatment system. For SFY 2016-17, 35 providers contracted with and invoiced the Department \$442,921 for payment of treatment services rendered to clients. An admission occurs when a client presents to receive gambling treatment services with a provider who is approved by the Department to be reimbursed for gambling treatment services. A discharge occurs at the conclusion of the client receiving funding by the Department for gambling treatment services, a client changing providers, or upon meeting clinical discharge criteria.

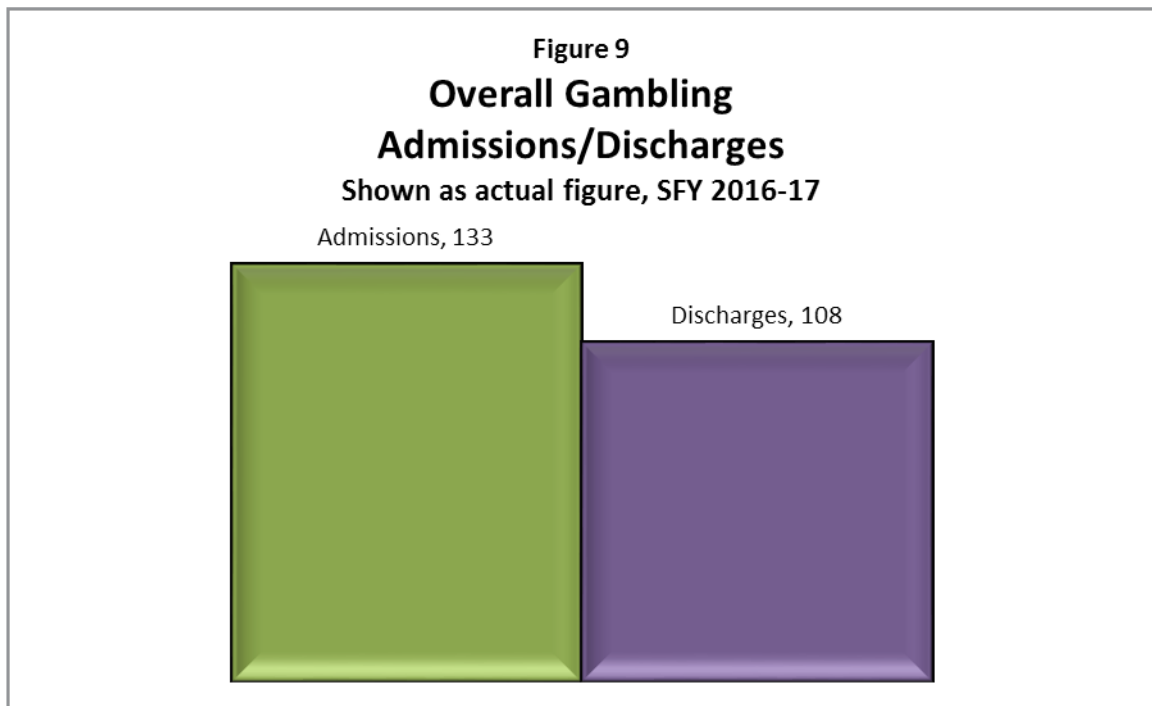

Figure 9, above, denotes the number of client admissions to, and discharges from, Department-funded gambling treatment services in SFY 2016-17. Note: A discharged client may have been admitted to treatment during a previous fiscal year.

Figure 10
Admissions by Gender
 Shown as actual figure, SFY 2016-17

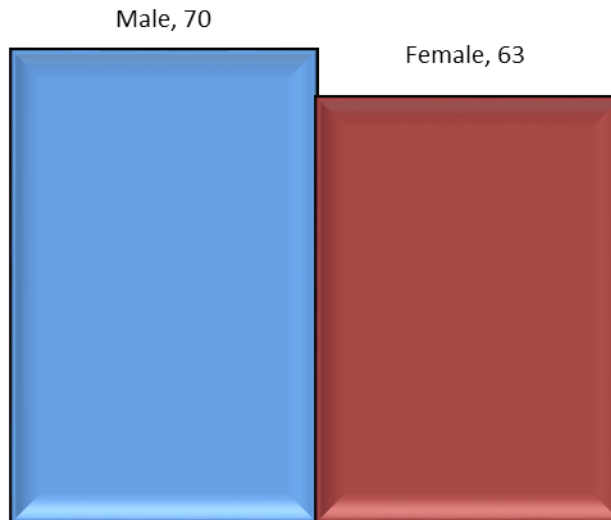

Figure 10, above, displays the number of unique client admissions by gender.

Figure 11
Admissions by County of Residence
 Shown as actual figure, SFY 2016-17

Figure 11, above, admissions by county of residence, displays the problem gambling treatment admissions by county. There were 133 admissions for SFY 2016-17. Philadelphia, Lackawanna, and Montgomery Counties accounted for 75 percent of the admissions.

Figure 12
Discharges by County of Residence
Shown as actual figure, SFY 2016-17

The number of discharges by county of residence that occurred during the fiscal year is shown in **Figure 12**, above. There were 108 discharges this fiscal year. Collectively, Philadelphia and Lackawanna Counties accounted for 56 percent of the discharges statewide.

The preferred methods of gambling were reported by those individuals who were admitted and received gambling addiction treatment from providers who contract with the Department.

Figure 13
Preferred Gambling Methods by Gender
Percentage of admissions for each gender reporting method, ordered by total admissions reporting method
SFY 2016-2017

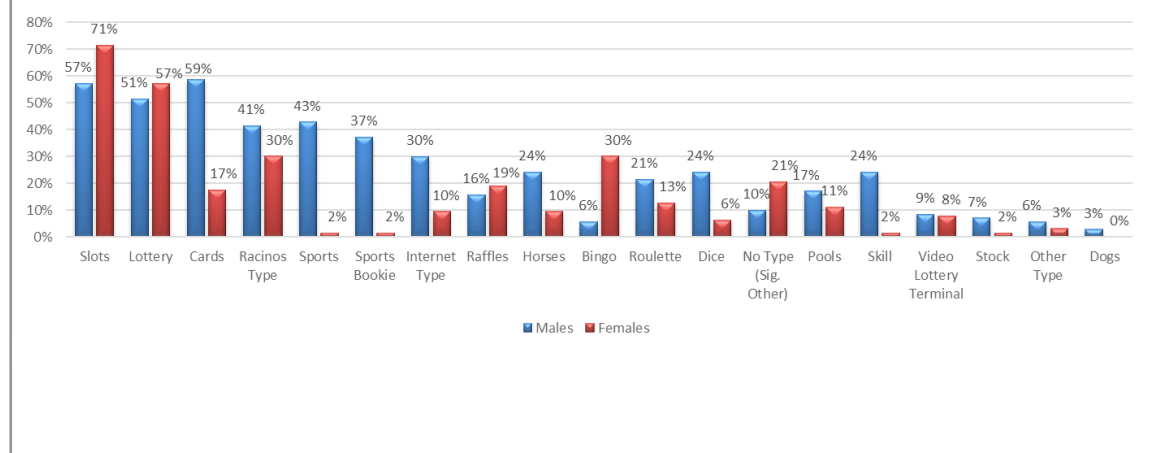

Figure 13, above, presents both female and male preferred gambling methods displayed together.

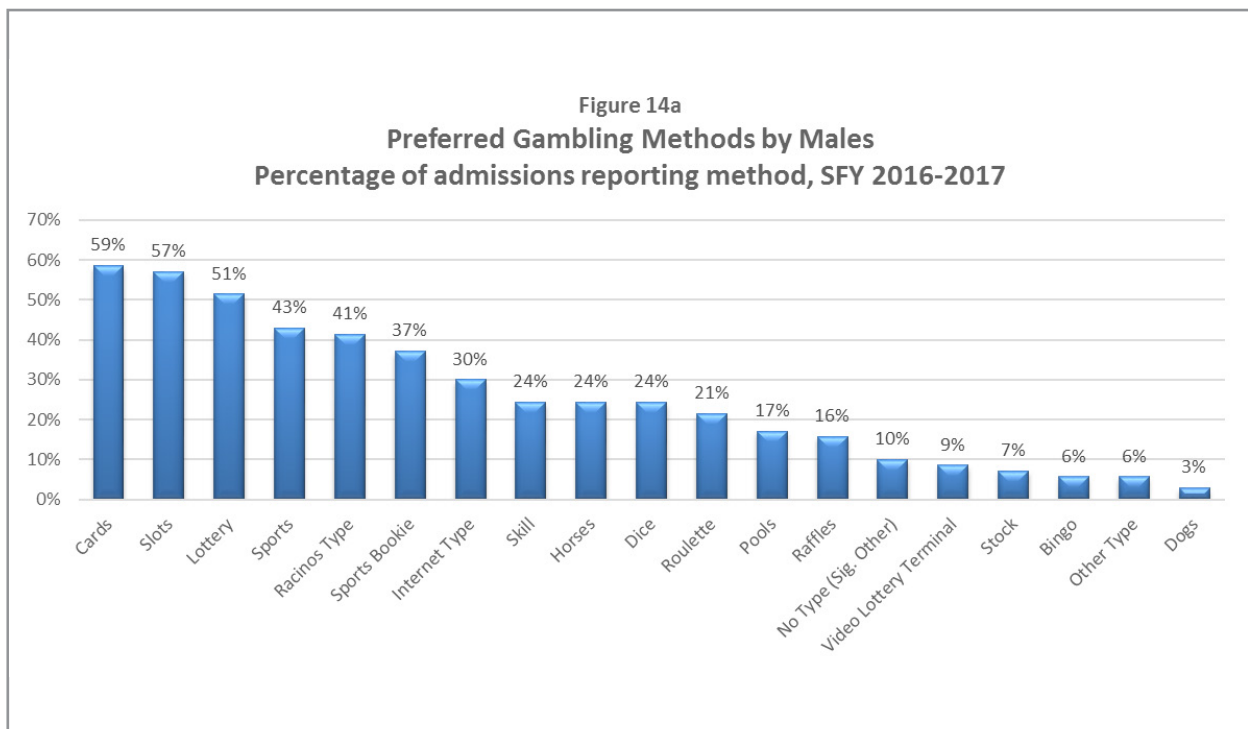

Figure 14a, above, shows a breakdown of preferred gambling methods by males.

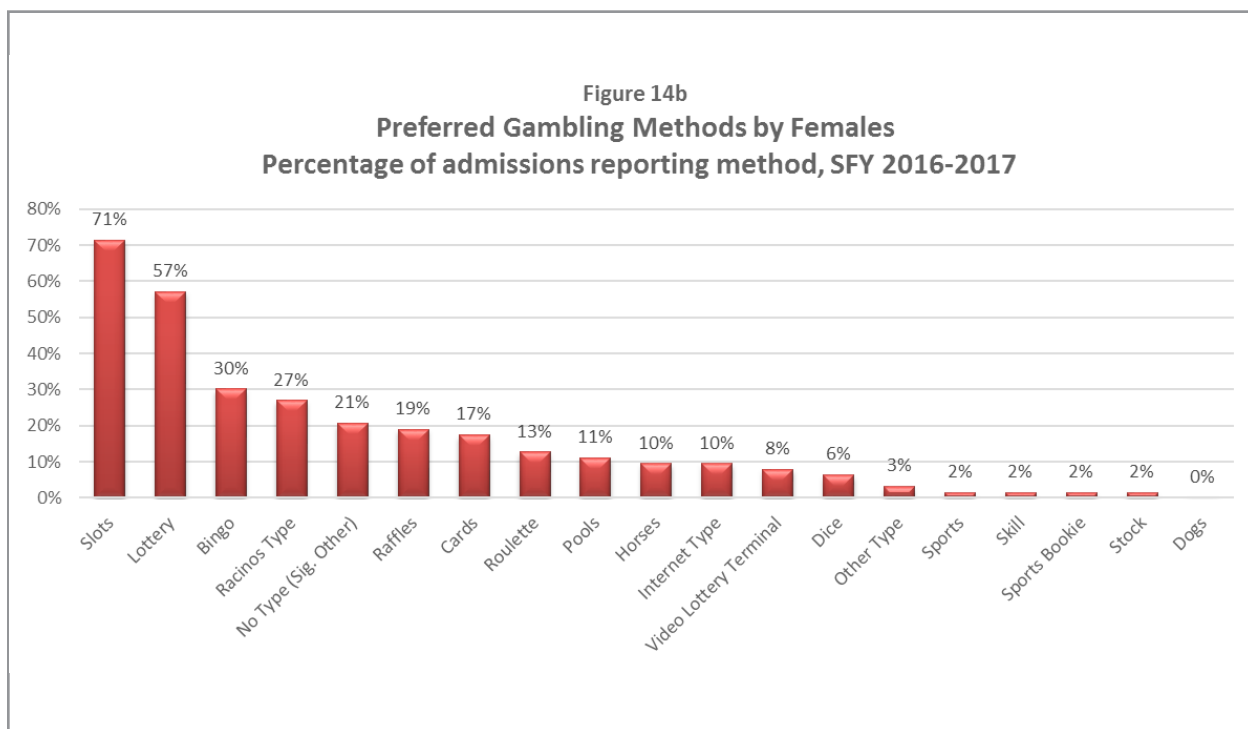

Figure 14b, above, shows a breakdown of preferred gambling methods by females.

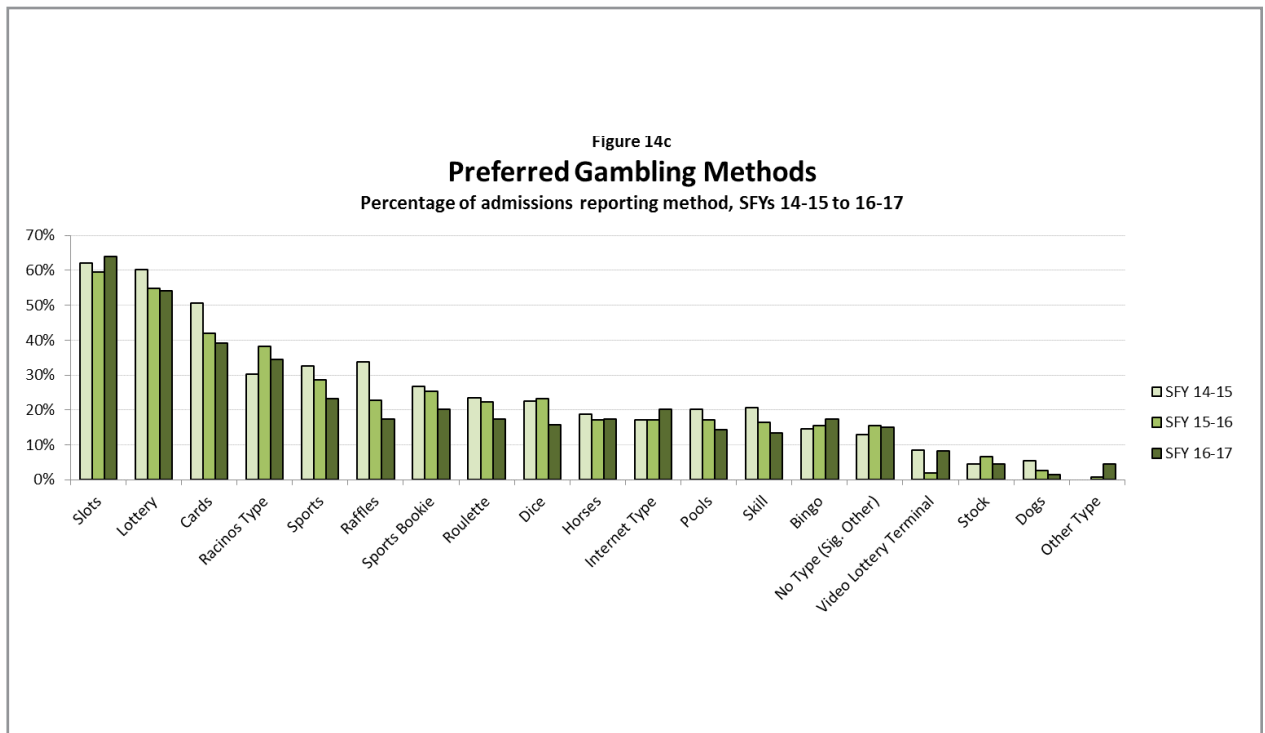

Figure 14c, above, shows the comparison of preferred gambling methods over a three-year period from SFY 14/15 – 16/17.

(Note: Any client can report more than one preferred method.)

Compulsive and Problem Gambling Treatment Outcomes

The Department utilizes a number of performance measures to determine the effectiveness of treatment services. The following pages provide information on the outcomes of the following performance measures:

- Employment status at admission and discharge (Figures 15-19)
- Average length of stay (Figure 20)
- Goals met or unmet upon discharge from treatment (Figures 21 & 22)
- Change in gambling frequency from admission to discharge (Figures 23 & 24)

The Department measures a client's employment status on admission and discharge because studies have shown that problem gambling may have negative effects on one's employment. The Department's statistical data regarding average length of an admission for treatment or average length of stay is to determine if there is a correlation between length of stay and recovery from compulsive and problem gambling. In addition, an ultimate goal is to see a decrease in the frequency of gambling as a result of receiving treatment.

For purposes of these performance measures, an admission occurs when a client presents to receive gambling addiction treatment with a provider. A discharge is recorded when a client has completed a particular type of treatment, changes providers, or at the conclusion of receiving Department funds for gambling treatment services.

Figure 15, above, displays the employment status at admission to treatment. Of the 133 admissions, the majority (92 clients or 70 percent) reported being employed in some fashion. Of those admitted, 65 (49 percent) were employed full time. Twenty-One (16 percent) were disabled, 16 (12 percent) reported part time/seasonal employment, and six (5 percent) were retired, five (4 percent) reported more than one type of employment, zero (0 percent) were students, other, or unknown, status.

(Note: A client can report more than one employment status type at time of admission.)

Figures 16-19, on the following pages, represents *discharge employment status* only for clients who were discharged during SFY 2016-17.

(Note: Any client can report more than one preferred method.)

Figure 16
Discharge Employment Status
 SFY '16-'17

Figure 16, above, shows the *discharge employment status of those who reported being employed full-time at admission*. Seventy-eight percent reported they remained employed full-time, 15 percent began working part-time, 2 percent became self-employed, while the remaining 5 percent make up all other categories of becoming a student, unemployed, and/or unknown.

Figure 17
Discharge Employment Status
 SFY '16-'17

Figure 17, above, shows the *discharge employment status of those clients who reported being employed part-time at the time of admission*. Thirty-four percent of those part-time employed clients were able to gain full-time employment between the time of admission and discharge from treatment. Thirty-three percent were able to maintain their part-time employment status throughout treatment. Eleven percent, reported being a student at discharge, 11 percent were retired, and the remaining 11 percent were unemployed.

Figure 18
Discharge Employment
 SFY '16-'17

Figure 18, above, represents the *discharge employment status of clients who reported being unemployed at that the time of admission*. Of clients reporting, 46 percent were gainfully employed part-time and 9 percent were employed full-time or self-employed upon discharge. Eighteen percent remained unemployed, an additional 18 percent reported being retired or disabled.

Figure 19
Discharge Employment Status
 SFY '16-'17

Similarly, Figure 19, above, shows the *discharge employment status of those who reported being disabled at the time of admission*. Seventy-three percent of clients reported still being disabled, 18 percent reported retirement, 9 percent reported being unemployed.

Figure 20
Average Number of Client Sessions Utilized
 (Mean number of client sessions used from Admission to Discharge)

Figure 20, above, displays the average number of sessions utilized by a client. The *average number of client sessions utilized* increased from 29 to 34 sessions during the last fiscal year.

Figure 21
Treatment Goals Status at Discharge
 (Goals Met or Unmet)
 SFY 2016-2017

Figure 21, above, shows the *treatment goals status at discharge*, as well as if treatment was completed or not. Eighty-eight percent of clients are meeting at least some of their goals, 72 percent completed treatment. Of that 72 percent, 23 percent met all of their goals and 49 percent met at least half of their goals. Of the 28 percent that did not complete treatment, 16 percent met some of their goals.

Figure 22, above, shows a three-year comparison of *treatment goals status at discharge* and, if treatment was completed or not. Over the three-year period an average of 83 percent of the clients have met at least some of their goals and, an average of 65 percent completed treatment. Of that 65 percent, an average of 20 percent met all of their goals and an average of 45 percent met at least half of their goals. Of the 35 percent that did not complete treatment, an average of 18 percent met some of their goals.

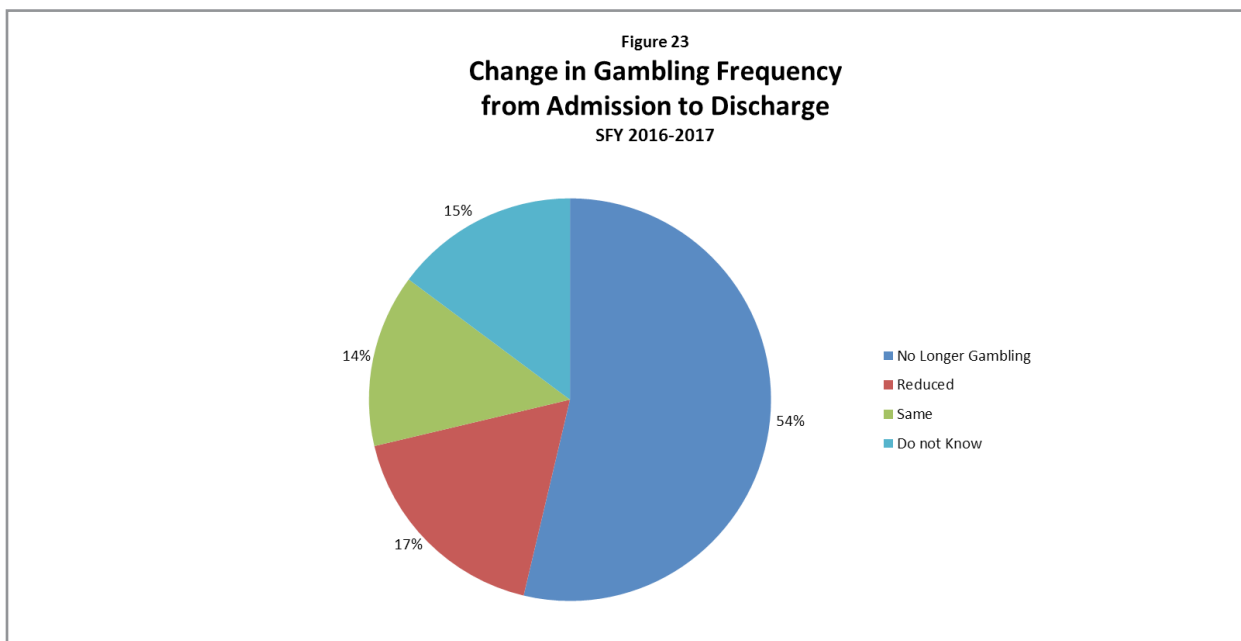

Figure 23, above, displays the *change in gambling frequency* resulting from gambling addiction treatment. For SFY 2016-17, 54 percent of those who were discharged reported that they are no longer gambling, 17 percent reported they have reduced their gambling frequency; and 14 percent have had no change in gambling frequency. Fifteen percent reported that they did not know if their frequency had changed or not as a result of treatment.

Figure 24
**Change in Gambling Frequency
 from Admission to Discharge**
 Percentage, SFYs 14-15 to 16-17

Figure 24, above, displays the *change in gambling frequency* resulting from gambling addiction treatment over a three-year period for comparison. For the three-year period, an average of 54 percent of those who were discharged reported that they are no longer gambling; an average of 16 percent reported that they have reduced their gambling frequency, and an average of 7 percent have had no change in gambling frequency. An average of 22 percent reported that they did not know if their frequency had changed or not as a result of treatment. In SFY 15-16 only 1 percent stated they had seen an increase in gambling.

Prevention of Compulsive and Problem Gambling

As previously described, Act 2010-01 created the Compulsive and Problem Gambling Program, which is managed by the Department. Act 2010-01 requires public education, awareness and training regarding compulsive and problem gambling and the treatment and prevention of compulsive and problem gambling for which the Department is responsible.

With the increased availability of legalized gambling in Pennsylvania comes increased concern regarding the individual and social costs of problem gambling. The Department is addressing this concern by providing problem gambling prevention, education, and outreach efforts. Problem gambling prevention activities are intended to increase awareness of problem gambling within the general public, inform teachers, policy makers, and other professionals about the impact of problem gambling on the family unit, schools, and communities, and educate at-risk populations such as college students, youth, and older adults about risk and protective factors in an effort to prevent problem gambling.

The Department seeks Problem Gambling Funding Initiative Applications (FIAs) from SCAs to provide a wide array of problem gambling services. The opportunity

to apply for funds under this initiative is available to all SCAs regardless of whether SCAs were and were not funded under prior Problem Gambling Funding Initiative Applications.

Allowable activities that can be provided with these funds include:

- Problem gambling prevention activities that include evidence-based, evidence-informed, and state-approved supplemental problem gambling prevention programs,
- Problem gambling training, including travel to training as well as hosting training,
- Problem gambling prevention media dissemination (with the exception of radio and TV media created for DDAP's media campaign),
- Outreach and referral efforts in the community intended to identify individuals and families struggling with problem or compulsive gambling and refer those individuals to Department funded treatment providers,
- Expanded Student Assistance Program (SAP) services beyond those already provided and funded through other funding sources.

Problem Gambling Funding Initiative

Forty SCAs submitted proposals (funding initiative applications) detailing their plans to provide a wide array of problem gambling prevention services for SFY 2015-16 and SFY 2016-17. The SCAs listed below were awarded a total of \$4,358,916 for SFY 2016-17.

Allegheny	\$339,118	Fayette	\$107,880
Armstrong/Indiana/Clarion	\$81,513	Forest/Warren	\$51,349
Beaver	\$50,226	Greene	\$3,403
Bedford	\$75,000	Lackawanna/Susquehanna	\$80,754
Berks	\$173,233	Lancaster	\$219,097
Blair	\$51,270	Lawrence	\$51,739
Bucks	\$268,408	Lebanon	\$61,013
Butler	\$152,108	Lehigh	\$118,516
Cambria	\$91,961	Luzerne/Wyoming	\$103,420
Cameron/Elk/McKean	\$20,846	Lycoming/Clinton	\$30,553
Carbon/Monroe/Pike	\$31,585	Mercer	\$29,352
Centre	\$61,134	Montgomery	\$17,257
Chester	\$61,897	Northampton	\$44,312
Clearfield/Jefferson	\$87,794	Philadelphia	\$835,078
Columbia/Montour/Snyder/Union	\$19,662	Schuylkill	\$19,147
Crawford	\$80,788	Venango	\$36,402
Cumberland/Perry	\$52,338	Washington	\$84,424
Dauphin	\$98,379	Wayne	\$19,248
Delaware	\$229,236	Westmoreland	\$60,307
Erie	\$309,169	York/Adams	\$50,000

Funds provided to the SCAs were used to assess community needs as well as to develop and/or implement a comprehensive system of problem gambling resources, prevention strategies, and programs. These problem gambling prevention services were provided either directly by the SCAs or their contracted provider(s).

Problem gambling prevention activities were provided in a variety of settings to high-risk populations and, when appropriate, communities affected by risk factors associated with problem gambling. The SCAs utilized the Pennsylvania's Performance Based Prevention System (PBPS) to plan, monitor, evaluate, and analyze all problem gambling prevention services in order to identify effective prevention programs and services and to direct prevention-related policy and funding.

Twenty-eight problem gambling prevention evidence-based programs, evidence-informed programs, and supplemental programs were provided throughout the fiscal year. A few innovative strategies and programs were developed specifically to meet the needs of youth. The following are examples of some of the programs and strategies that were implemented:

Evidence-Based Programs:

Stacked Deck: A Program To Prevent Problem Gambling is a school-based prevention program that provides information about the myths and realities of gambling and guidance for making good choices with the objective of modifying attitudes, beliefs, and, ultimately, gambling behavior. The program is designed for students in 9th through 12th grades. Lessons cover the history and realities of gambling, risk factors for and signs of problem gambling, fallacies about gambling, calculated risk and the assessment of situations involving risk, and barriers to good decision-making and problem solving. In SFY 2016-17, eleven SCAs (Allegheny, Armstrong/Indiana/Clarion, Butler, Carbon/Monroe/Pike, Clearfield/Jefferson, Crawford, Greene, Lackawanna/Susquehanna, Luzerne/Wyoming, Venango, and Wayne) provided this program, serving a total of 1,456 students.

Evidence-Informed Programs:

Kids Don't Gamble... Wanna Bet? is an interdisciplinary curriculum for grades 3rd through 8th, developed by the North American Training Institute. It is designed to discourage underage gambling through improved critical thinking and problem-solving skills. It also includes access to an interactive online magazine designed by teens for teens. In SFY 2016-17, eight SCAs (Cameron/Elk/McKean, Carbon/Monroe/Pike, Erie, Lawrence, Lycoming/Clinton, Philadelphia, Venango and York/Adams) provided this service to a total of 7,432 students.

We Know BETter is an interactive problem gambling prevention curriculum targeting youth in 4th through 9th grades. This innovative program, developed by a prevention provider, helps youth learn about addiction as well as decision-making

skills, ways to increase their resiliency, improved coping strategies, and refusal skills. Interest in this program continues to increase since it has a strong focus on addiction and skill-building and is appropriate for school classrooms, after-school programs, and summer groups. Youth learn to identify possible consequences of gambling and draw parallels with substance dependency. The lessons enhance problem solving skills and feelings of self-confidence by improving coping strategies and refusal skills. An updated version of the program has been developed and a formal evaluation is being conducted through the funding initiative. In SFY 2016-17, nine SCAs (Armstrong/Indiana/Clarion, Centre, Crawford, Delaware, Fayette, Forest-Warren, Lancaster, Lebanon and Westmoreland) participated in the program training and were able to provide program services to a total of 2,041 students.

Supplemental Programs

Gambling Away The Golden Years is an educational kit which explores the possibility of gambling turning from entertainment to addiction, especially in the retirement years. The program targets the older adult population and has been provided in a variety of settings including community senior centers. In SFY 2016-17, twelve SCAs (Allegheny, Butler, Carbon/Monroe/Pike, Clearfield/Jefferson, Crawford, Greene, Luzerne/Wyoming, Mercer, Venango, Washington, Westmoreland, and York/Adams) provided this program, serving a total of 4,222 participants.

Student Assistance Program (SAP)

The Student Assistance Program (SAP) is designed to assist school personnel in identifying issues including gambling, use of alcohol, tobacco and other drugs, and mental health issues, all of which pose barriers to a student's health and success. The primary goal of SAP is to help students overcome these barriers. Elements of SAP include:

- The construction of a well-trained SAP core team that meets regularly to discuss students who have been referred to SAP;
- Incorporation of parents and caregivers into the SAP process through meetings with parents to review student needs and to discuss potential referrals and an intervention plan for the student;
- A system of school-based and community-based support services to which students can be referred for assistance in addressing their needs;
- The provision of educational and support group services tailored to the needs of SAP-referred students.

Through the Problem Gambling Funding Initiative, the SCAs had the option to support the expansion of SAP services beyond what they had previously provided through other funding sources.

During SFY 2016-17, a total of twenty-one SCAs (Allegheny, Beaver, Berks, Blair, Bucks, Butler, Cameron/Elk/McKean, Clearfield/Jefferson, Columbia/Montour/Snyder/Union, Cumberland/Perry, Delaware, Fayette, Forest-Warren, Lackawanna/Susquehanna, Lancaster, Lawrence, Lebanon, Philadelphia, Schuylkill, Washington and Westmoreland) utilized their problem gambling prevention funds to support expanded SAP services. These services included SAP consultations, core team meetings, training, parent/teacher meetings, and educational groups.¹

Student Assistance Program (SAP) SFY 2016-17 Totals¹	
Type of SAP Service	Number of Services Provided
SAP Consultation	3,121
SAP Core Team Meeting	710
SAP Parent/Teacher Meeting	3,444
SAP Group	64
SAP Training	47
Total	7,328

¹Through the Problem Gambling Funding Initiative, the SCAs had the option to support the expansion of SAP services beyond what they had previously provided through other funding sources.

CONCLUSION

Problem gambling is, and will continue to be, a compelling public health concern affecting Pennsylvanians of all ages, genders, races, and ethnic backgrounds in communities across the Commonwealth. The societal and economic costs can be significant, but they can be countered by targeted treatment and prevention aimed at minimizing harm to both the individual and society as a whole. The Department has worked to develop and implement a comprehensive, coordinated, and effective Compulsive and Problem Gambling Program. In continuing to serve the Commonwealth, the Department will continue to work with the Pennsylvania Gaming Control Board, the Council on Compulsive Gambling of Pennsylvania, the National Council on Problem Gambling, relevant stakeholders, and others who are committed to helping those with a gambling problem.
