DEPARTMENT OF DRUG AND
ALCOHOL PROGRAMS

Commonwealth of Pennsylvania

**Compulsive &
Problem Gambling
Annual Report**

2018

November 27, 2018

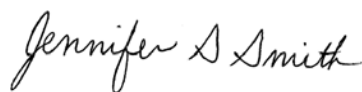

Fellow Pennsylvanians,

Educating individuals on the services available for problem gambling is a critical part of our mission at the Department of Drug and Alcohol Programs (Department). To that end, the Department is committed to ensuring Pennsylvanians are aware of available treatment options, while taking preventative actions for future generations based upon evidence-based findings.

This report provides a picture of how the Department is utilizing funding by the Compulsive and Problem Gambling Treatment Fund to support problem gamblers. The report is also available electronically by visiting www.ddap.pa.gov.

If yourself or a loved one are in need of help, I encourage you to call the toll-free Pennsylvania Gambling Helpline at 1-877-565-2112 or the 24-hour internet chatline found at www.ddap.pa.gov/treatment/pages/problem-gambling.aspx.

Sincerely,

A handwritten signature in black ink that reads "Jennifer S. Smith". The signature is written in a cursive, flowing style.

Jennifer S. Smith
Secretary
Pennsylvania Department of
Drug and Alcohol Programs

Mission

The mission of the Compulsive Problem Gambling Program is to increase public awareness of services available for problem gambling; ensure the widespread availability of treatment programs for problem gamblers, their family members, and significant others; and implement problem gambling prevention programs based upon findings throughout Pennsylvania.

Department Overview of Gaming Revenue

The Department of Drug and Alcohol Programs (Department) implements a comprehensive, coordinated, and effective problem gambling program for the Commonwealth. This program was originally created from the requirements of Act 71 of 2004. This law was amended under Act 1 of 2010 and increases the amount received for the Compulsive and Problem Gambling Program to a minimum of \$2 million or an amount equal to .002 multiplied by the total gross terminal revenue of all active and operating licensed gaming entities (whichever is greater). These funds are transferred annually into the Compulsive & Problem Gambling Treatment Fund for the Compulsive & Problem Gambling Program. Over \$4.6 million was transferred to the Fund in State Fiscal Year (SFY) 2017/18.

The Department expended over \$4 Million under the Compulsive and Problem Gambling Treatment Appropriation in SFY 2017/18. Slightly over eighty-five percent (85%) of the monies was expended by the Single County Authorities (SCAs), the county-level administrative entities responsible for addiction services, for problem gambling needs assessments, prevention programs, outreach programs, educational programs, and other Department-approved services. In excess of six percent was expended by gambling treatment providers to provide outpatient gambling counseling services throughout the Commonwealth of Pennsylvania. A little under seven percent (7%) was utilized for administration and oversight of the program, with the remaining portion covering training and hotlines services associated with compulsive and problem gambling.

Act 1 of 2010 also contained a new requirement to transfer \$3 million annually from the State Gaming Fund to the Department for substance use disorder (SUD) treatment (see page 28 for more details). These funds are captured under the Drug and Alcohol Treatment Services Appropriation. Specifically, the full amount of these funds is allocated to the SCAs solely for financing drug and alcohol addiction assessments, including drug and alcohol addiction assessments associated or related to compulsive and problem gambling, as well as for the related addiction treatment in a licensed non-hospital detoxification, rehabilitation or halfway house setting.

In October 2017 there was a significant expansion to gambling in Pennsylvania under Act 42 of 2017, which amended and expanded Act 1 of 2010 to include Interactive Gaming, Sports Wagering and Fantasy Contests. While the language of this legislation allows for additional revenues to the Department as a result of these newly legalized activities, no new revenues have been realized at the time of this report due to the process required for the State Gaming Board to review and approve facilities conducting these activities. The Department of Drug and Alcohol Programs coordinates closely with the State Gaming Board to monitor the progress of that agency and adjust programming accordingly.

Problem Gambling Helpline

The Department contracts with the Council on Compulsive Gambling of Pennsylvania, Inc. (CCGP) to manage its toll-free Pennsylvania Gambling Helpline, 1-877-565-2112 and a 24-hour internet chatline found at: <http://www.ddap.pa.gov/treatment/Pages/Problem-Gambling.aspx>.

The helpline provides confidential crisis counseling and referral services to problem gamblers and family members or significant others who may be experiencing difficulty as a result of problem gambling. Calls to the helpline are answered 24 hours a day, seven days a week, by professionally-trained operators in a free and confidential manner.

Calls can be answered in English, Spanish and more than 60 other languages utilizing the American Telephone and Telegraph (AT&T) language service. The operators collect as much data from each caller as the context of the call allows, given not all callers answer every question. In addition, callers may provide more than one answer to any given question. Each call is assessed for the most appropriate referral information, and the caller is given names, phone numbers, addresses, etc., for the suggested resources.

Helpline resources include referrals to Pennsylvania contracted gambling treatment providers, Gamblers Anonymous (GA) and Gam-Anon meetings, and informational brochures. Pennsylvania gambling treatment providers are licensed/certified behavioral health care specialists (psychiatrists, psychologists, social workers, professional counselors, etc.). The helpline is able to provide current meeting information for GA and Gam-Anon meetings in Pennsylvania, New Jersey, Ohio, New York, West Virginia and Maryland.

The Problem Gambling Helpline information on the following charts (Figures 1 through 7 below) reflects values over a 12-month, State Fiscal Year (SFY) span, from July 1, 2017 through June 30, 2018. A total of 1,069 callers to the Helpline became intakes for program gambling treatment.

Figure 1
Caller's Precipitating Problem(s)
 (Helpline Data, Intake Calls SFY 2017-18)

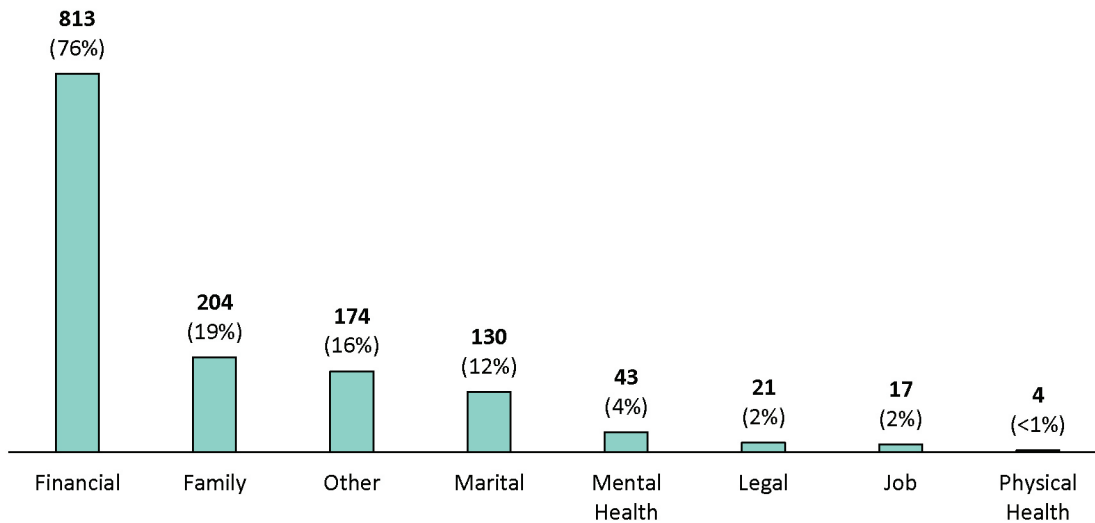

Figure 1, displays a breakdown of the precipitating problem(s) that Intake callers reported were a result of gambling. It is important to note that more than one problem can be reported by the caller.

Figure 2
Caller's Most Problematic Type of Gambling
 (Helpline Data, Intake Calls SFY 2017-18)

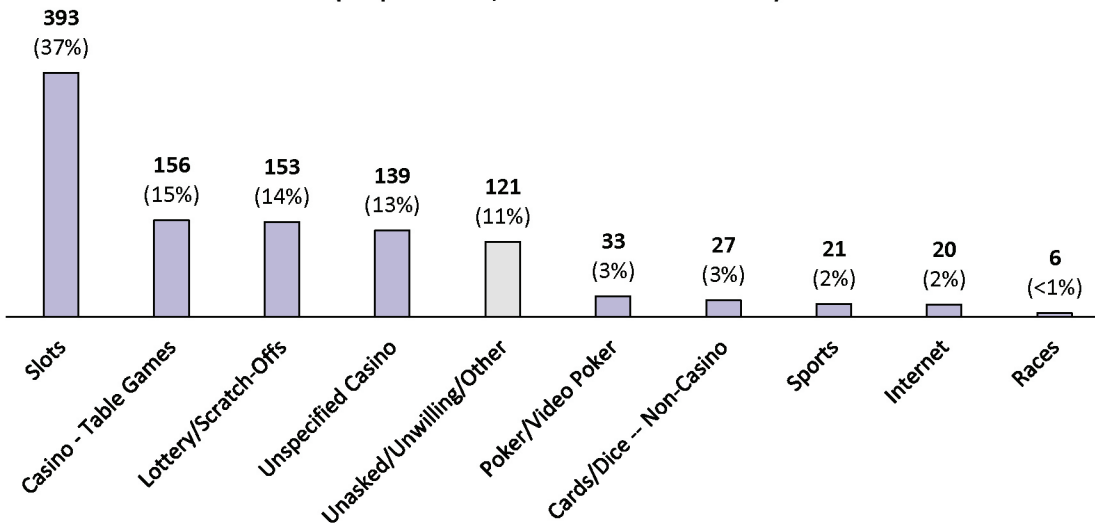

Figure 2, displays the most problematic type of gambling reported by the Intake caller. This data is gathered to identify gambling preference. As in past years, most helpline callers identified slot machines as being most problematic.

Figure 3
Age Group of Caller
 (Helpline Data, Intake Calls SFY 2017-18)

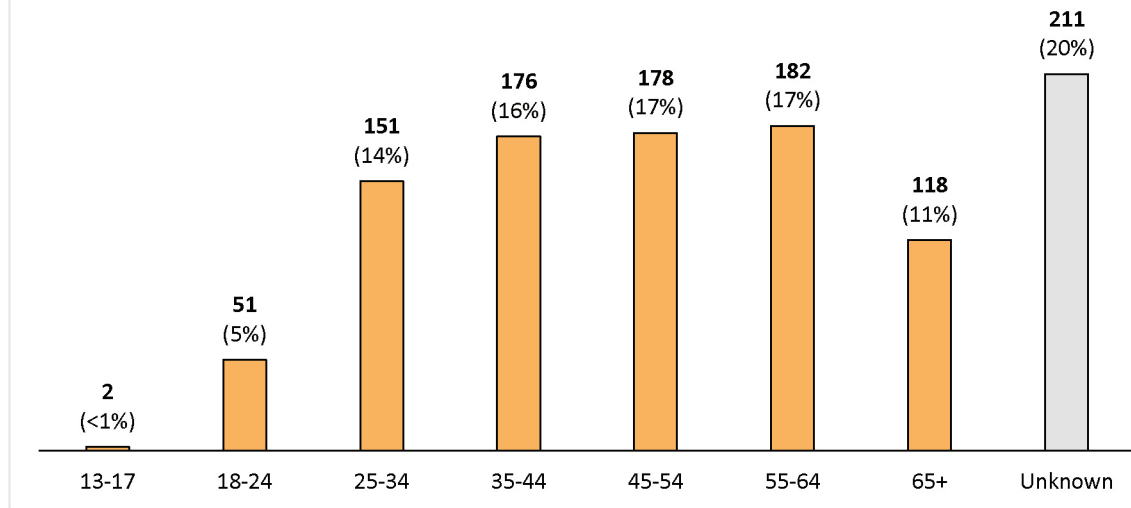

Figure 3, displays the age group of the gambler as reported by the individual who called the helpline. The chart shows that problem gambling is an issue across all ages. Unknown numbers include caller's unwillingness to disclose their age with no reason given.

Figure 4
Caller's Other Problem(s) Identified
 (Helpline Data, Intake Calls SFY 2017-18)

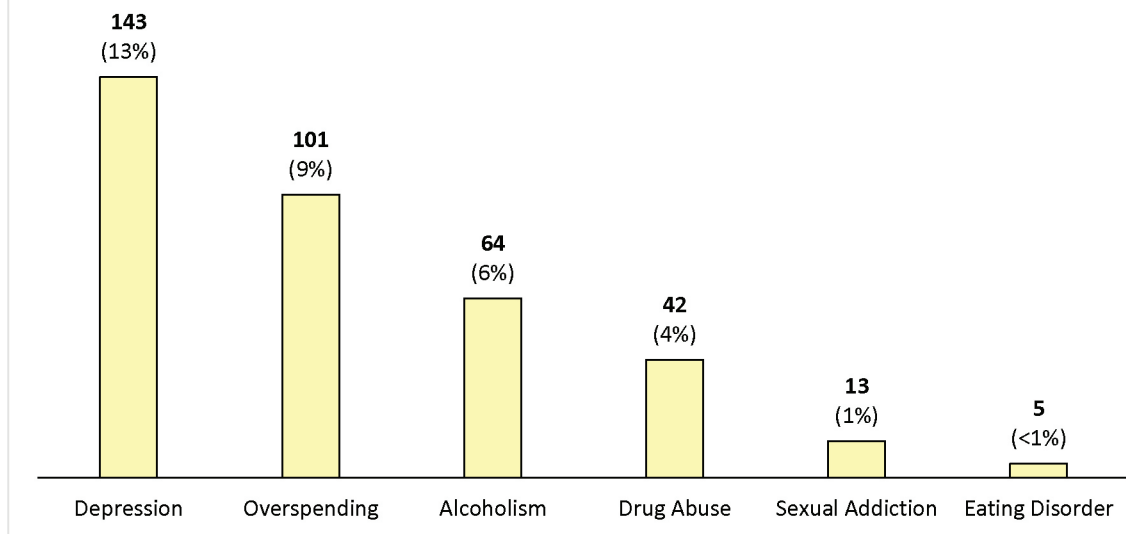

Figure 4, breaks down the other problems identified by the caller. It is important to note that a caller can answer "yes" to more than one question. In some cases, the caller may not have presented any additional problems.

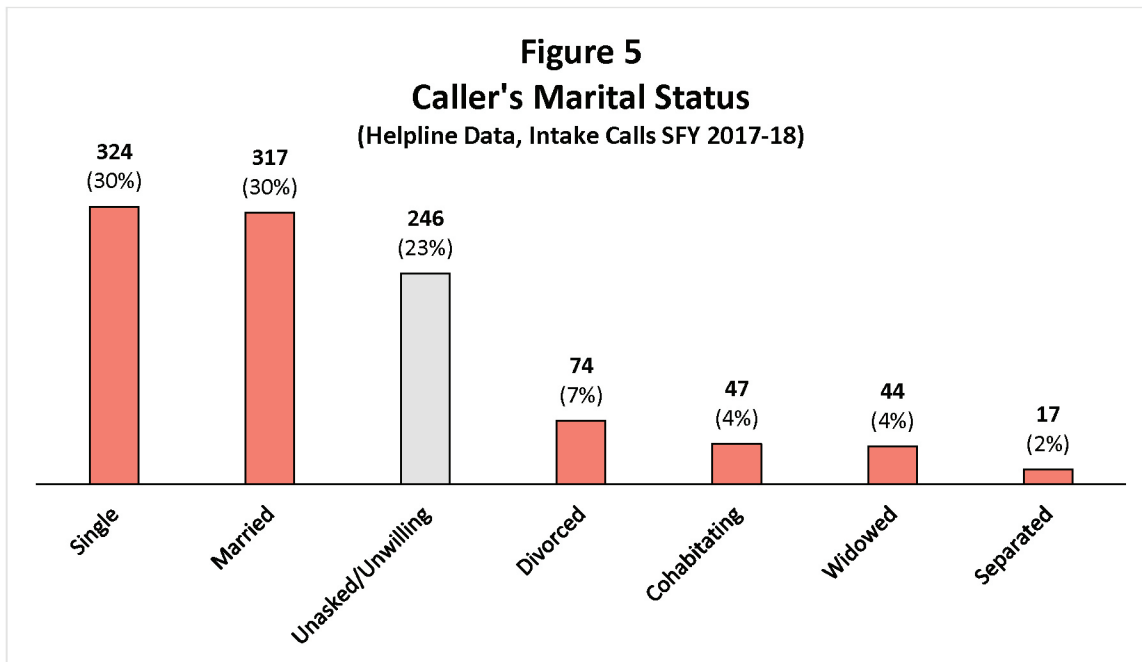

Figure 5, displays the marital status of the caller. Seven choices are identified, and the numeric values above each choice indicates the number of helpline callers selecting that option.

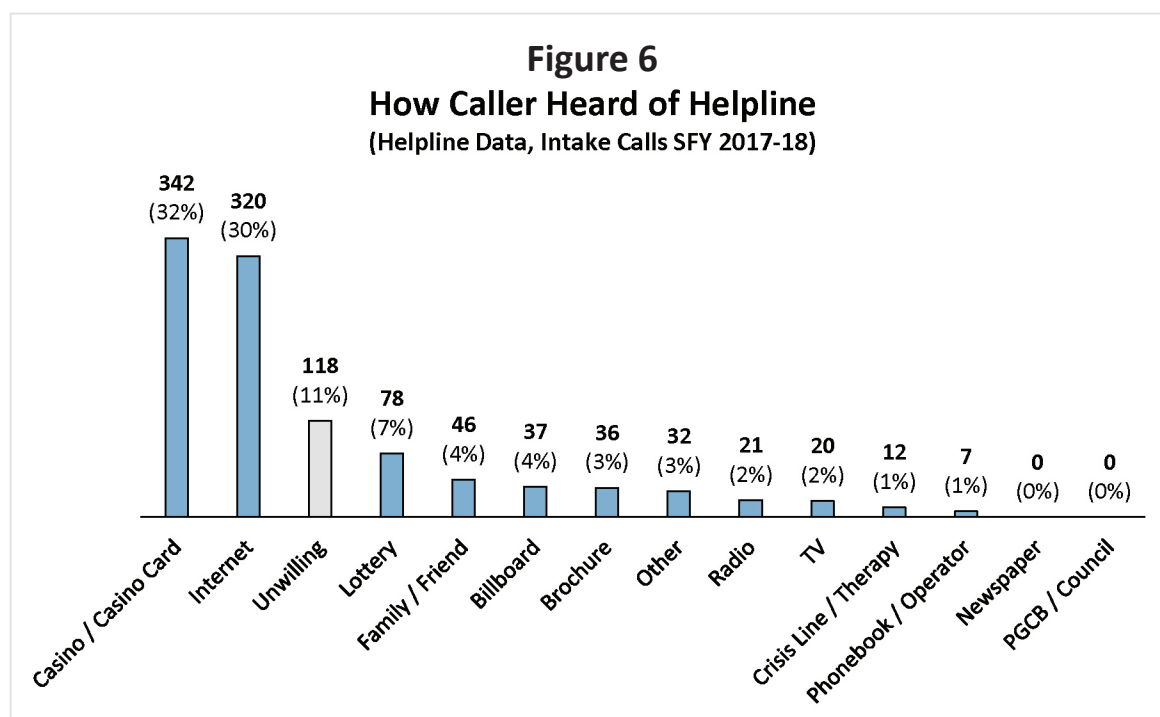

Figure 6, reveals how the caller heard of the helpline. Fourteen categories are listed, and the number (and percentages) of responses is listed above the corresponding category name.

Figure 7
Suggested Referral(s) for Caller
(Helpline Data, Intake Calls SFY 2017-18)

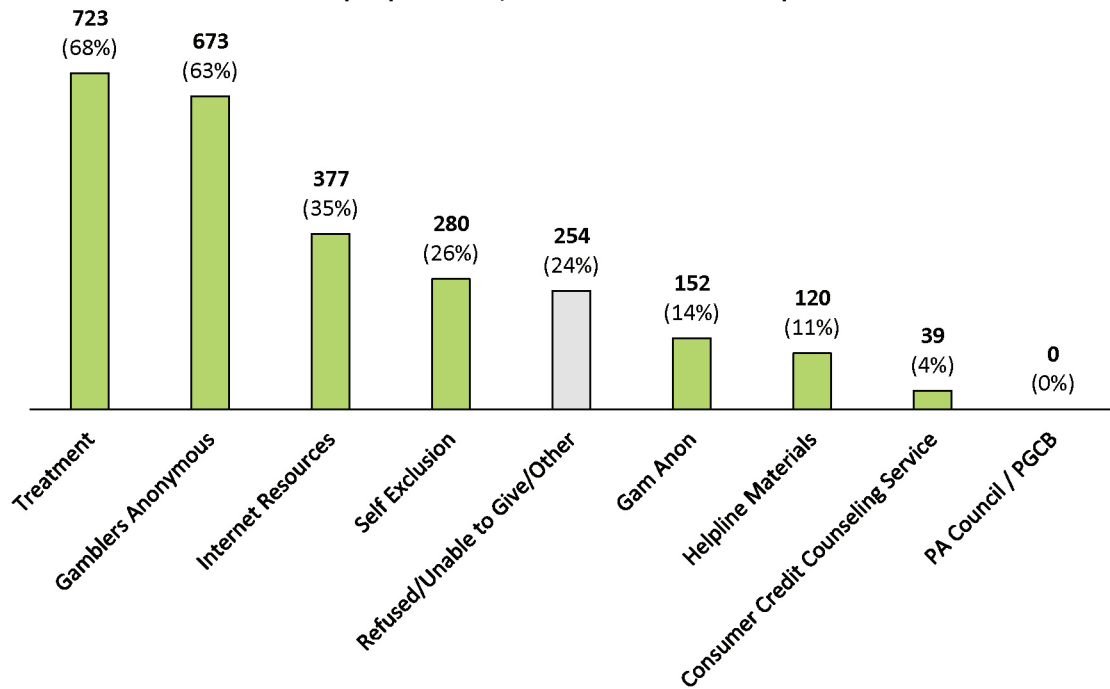

Figure 7, breaks down the referrals suggested to the caller. The majority of callers (723) were referred to treatment providers. Callers may be provided more than one referral option, which is reflected in the data shown.

Status of Outpatient Problem Gambling Treatment in Pennsylvania

Outpatient problem gambling treatment services have been available within the commonwealth since late 2008. The data in this section is based on clients who were admitted to, or discharged from, the Department's gambling treatment system. For SFY 2017-18, 23 providers contracted with and invoiced the Department a total of \$338,153.56 for payment of treatment services rendered to clients. An admission occurs when a client presents to receive gambling treatment services with a provider who is contracted with the Department to be reimbursed for gambling treatment services. A discharge occurs at the conclusion of the client receiving funding by the Department for gambling treatment services, a client changing providers, or upon meeting clinical discharge criteria.

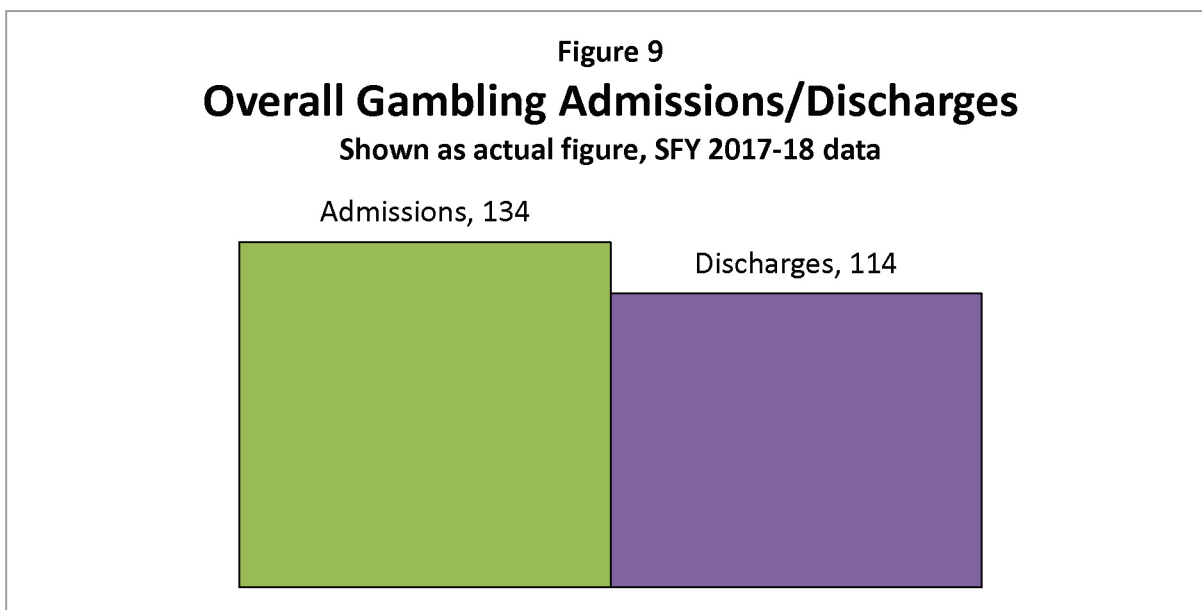

Figure 9, denotes the number of client admissions to, and discharges from, Department- funded gambling treatment services in SFY 2017-18 (*Note: A discharged client may have been admitted to treatment during a previous fiscal year*).

Figure 10
Admissions by Gender
Shown as actual figure, SFY 2017-18 data

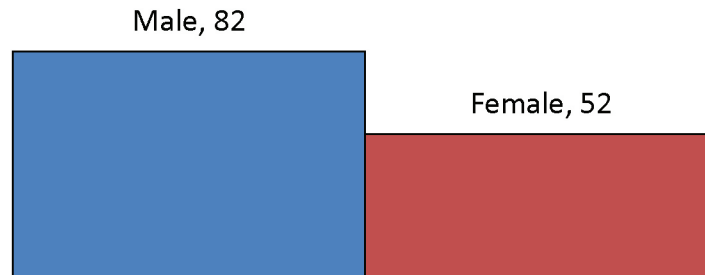

Figure 10, displays the number of unique client admissions by gender.

Figure 11
Admissions by Race
Shown as percentage, SFY 2017-18 data

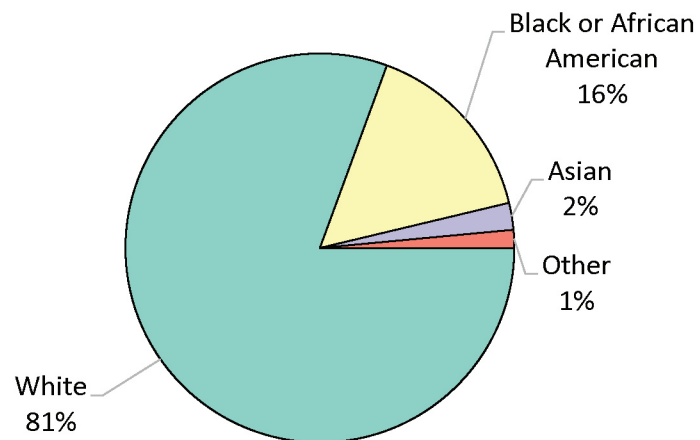

Figure 11, displays the percentage of client admissions by race.

Figure 12
Admissions by Ethnicity
 Shown as percentage, SFY 2017-18 data

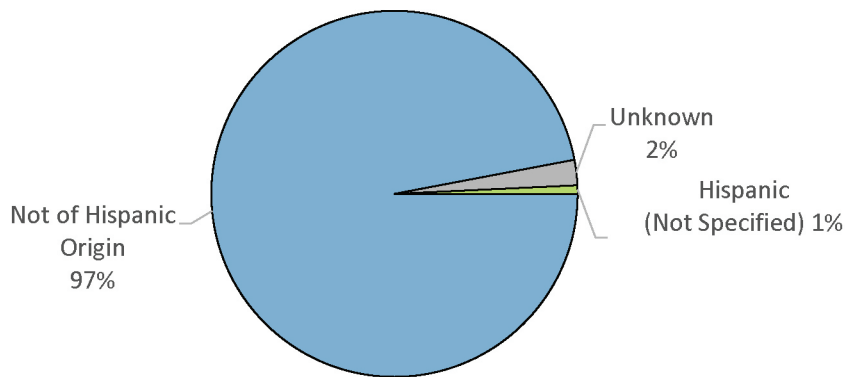

Figure 12, displays the percentage of client admissions by ethnicity.

Figure 13
Admissions by County of Residence
 Shown as actual figure, SFY 2017-18 data

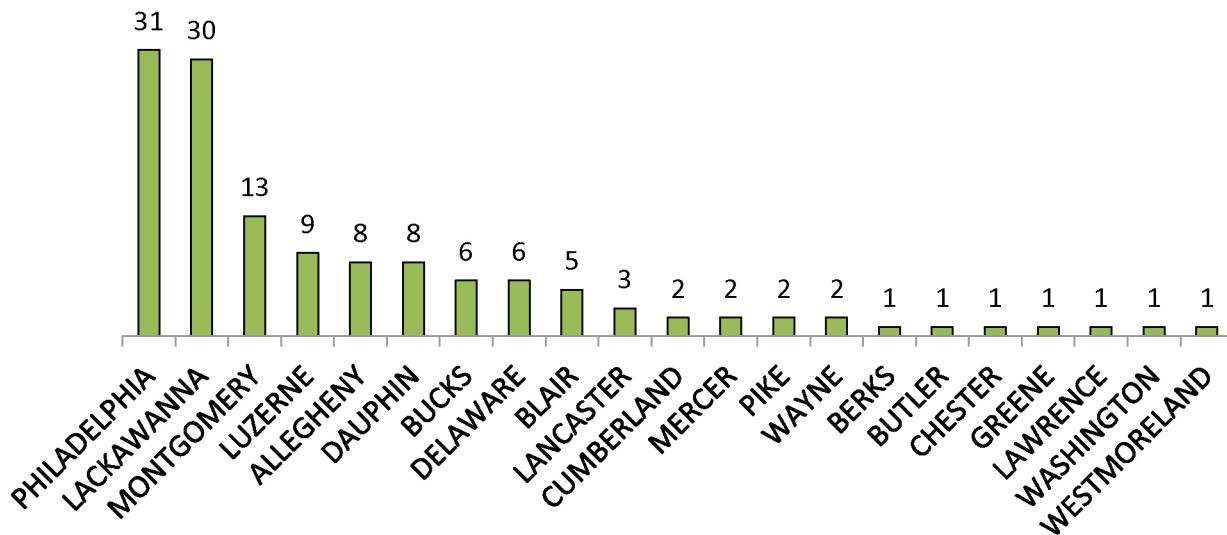

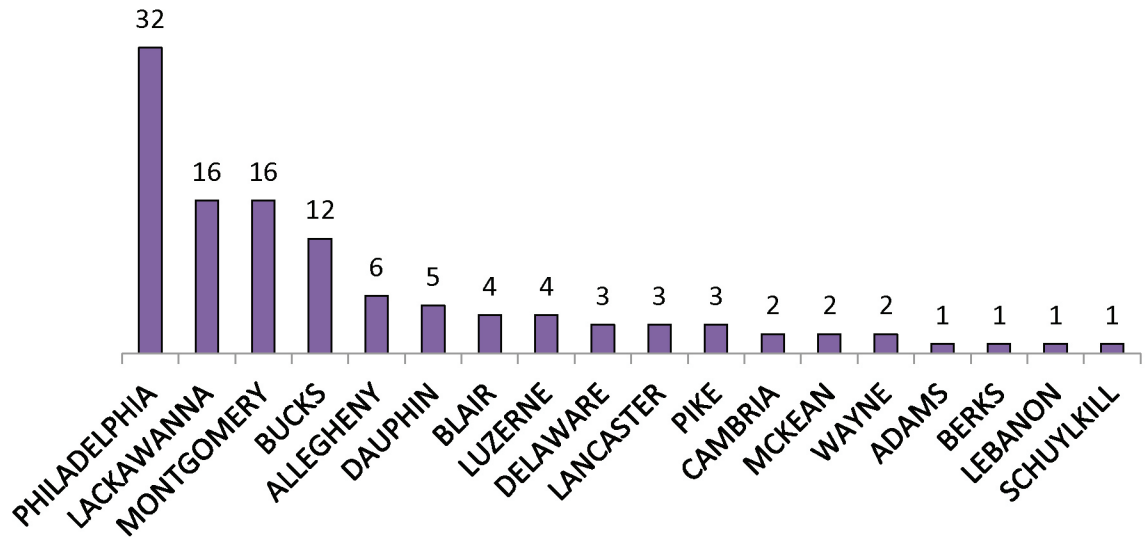

Figure 13, admissions by county of residence, displays the problem gambling treatment admissions by county. There were 134 admissions for SFY 2017-18. Philadelphia, Lackawanna, and Montgomery Counties accounted for almost 54 percent of the admissions.

Figure 14
Discharges by County of Residence

Shown as actual figure, SFY 2017-18 data

The number of discharges by county of residence that occurred during the fiscal year is shown in **Figure 14**. There were 114 discharges this fiscal year. Collectively, Philadelphia, Lackawanna, and Montgomery counties accounted for 56 percent of the discharges statewide.

Figure 15
Admissions by Income

Percentage of admissions reporting income level, SFY 2017-18 data

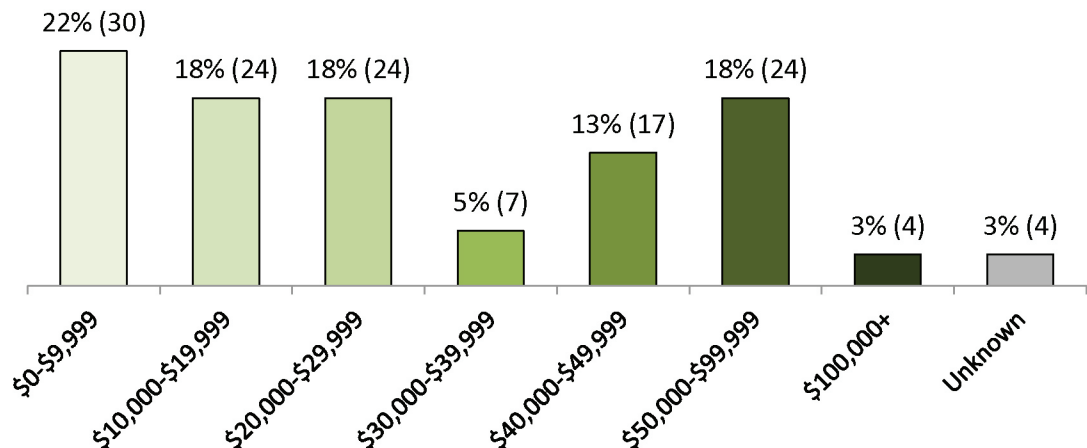

Figure 15, displays the number of client admissions by income.

Figures 16-18 reflect the preferred methods of gambling (fig. 16), including a breakdown by gender (fig. 17) and over the past three fiscal years (fig 18), that were reported by those individuals who were admitted and received problem gambling treatment from providers who contract with the Department.

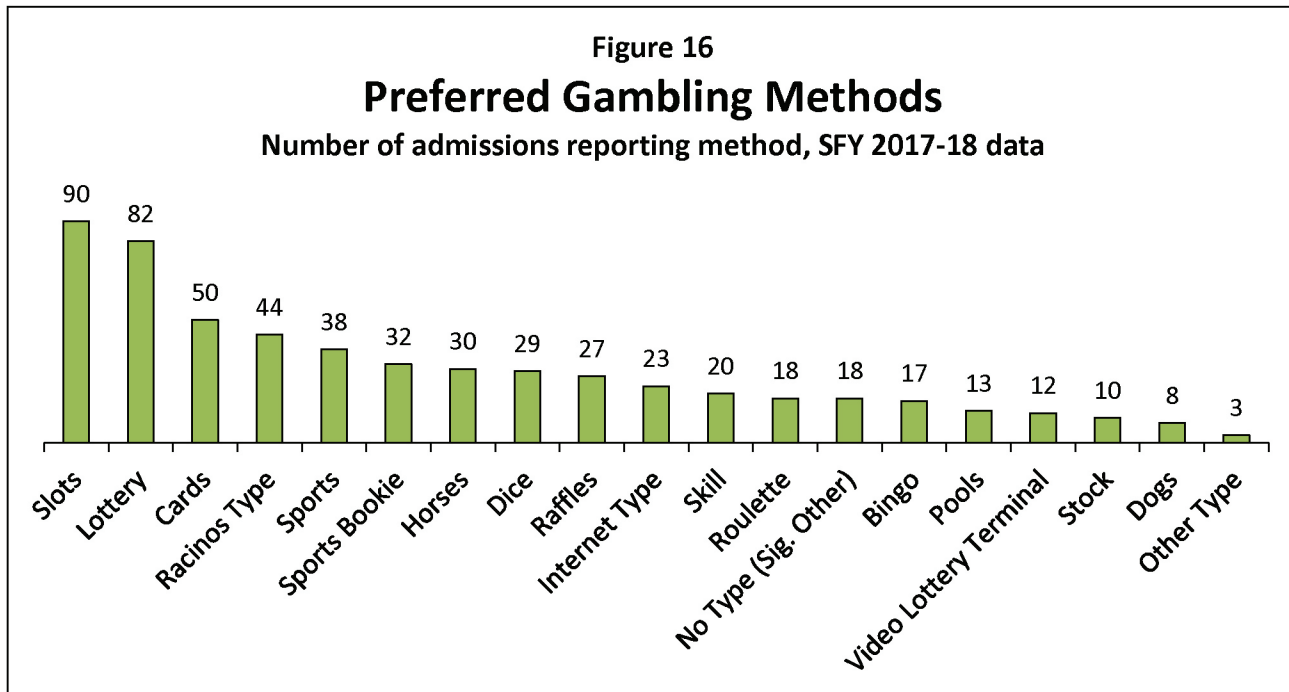

Figure 16, preferred gambling methods of individuals in treatment.

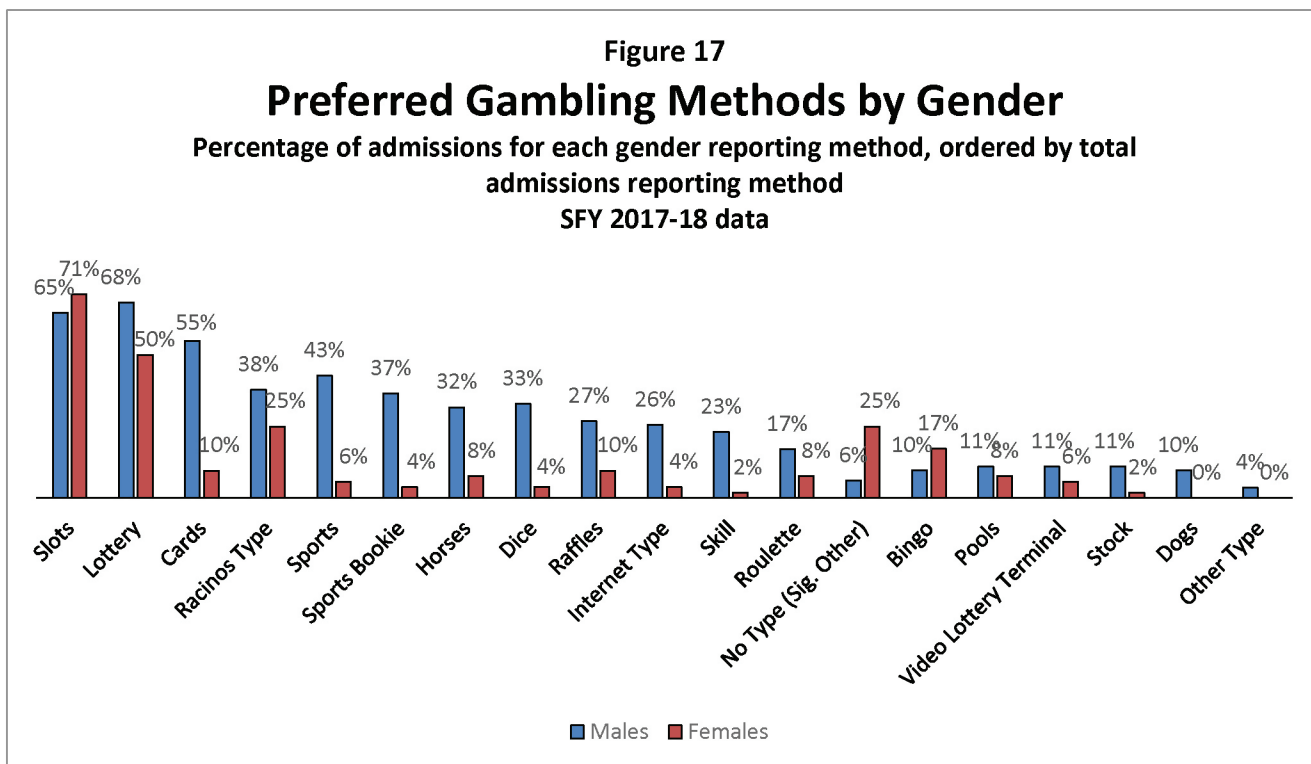

Figure 17, presents both female and male preferred gambling methods displayed together.

Figure 18
Preferred Gambling Methods
 Percentage of admissions reporting method, SFYs 15-16 to 17-18

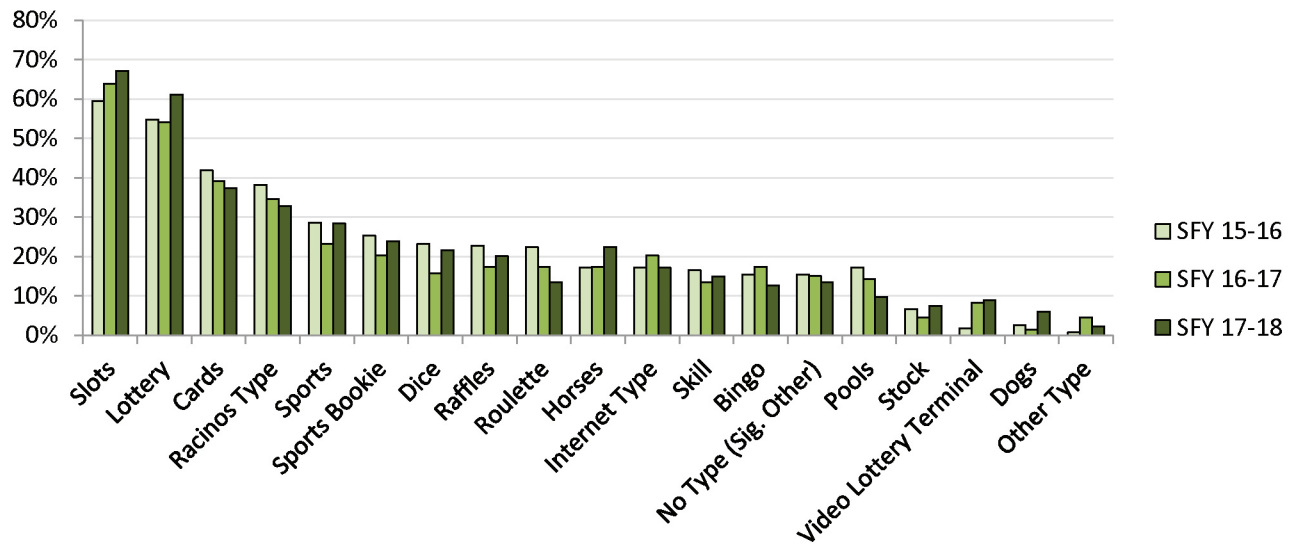

Figure 18, shows the comparison of preferred gambling methods over a three-year period from SFY 15/16 – 17/18. (Note: Any client can report more than one preferred method.)

Problem & Disordered Gambling Treatment Outcomes

The Department utilizes several performance measures to determine the effectiveness of treatment services. The following pages provide information on the outcomes of the following performance measures:

- Employment status at admission and discharge (Figures 19-23)
- Average length of stay (Figure 24)
- Goals met or unmet upon discharge from treatment (Figures 25 & 26)
- Change in gambling frequency from admission to discharge (Figures 27 & 28)

The Department measures a client's employment status on admission and discharge to measure if problem gambling has negative effects on one's employment. The Department's statistical data regarding the average length of treatment services is to determine if there is a correlation between length of stay and recovery from compulsive and problem gambling. In addition, an ultimate goal is to see a decrease in the frequency of gambling as a result of receiving treatment.

For purposes of these performance measures, an admission occurs when a client presents to receive problem gambling treatment with a provider. A discharge is recorded when a client has completed a particular type of treatment, changes providers, or at the conclusion of receiving Department funds for gambling treatment services.

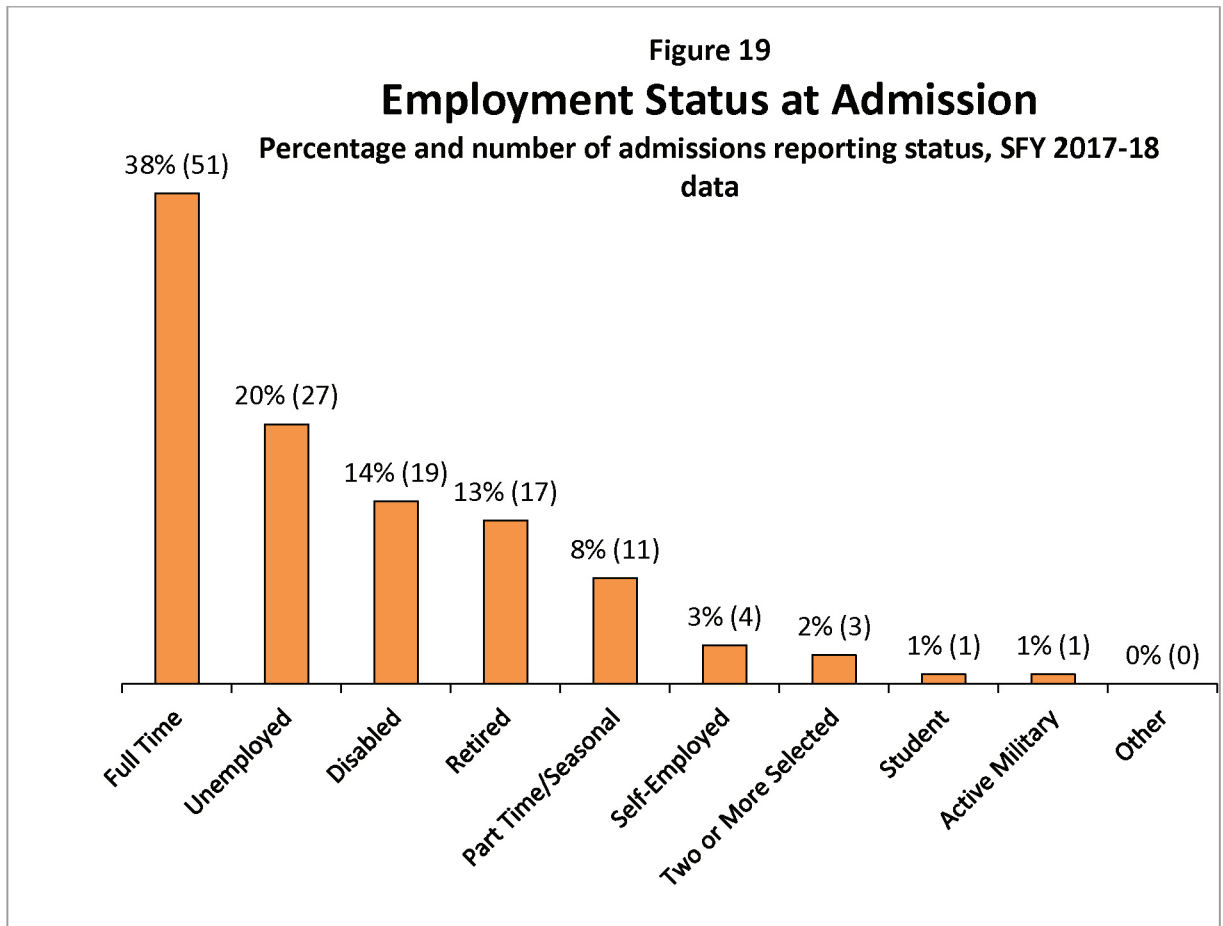

Figure 19, displays the employment status at admission to treatment. Of the 134 admissions, the majority reported being employed in some fashion (*Note: A client can report more than one employment status type at time of admission*).

Figures 20-23, on the following pages, represents discharge employment status only for clients who were discharged during SFY 2017-18. (Note: Any client can report more than one employment status.)

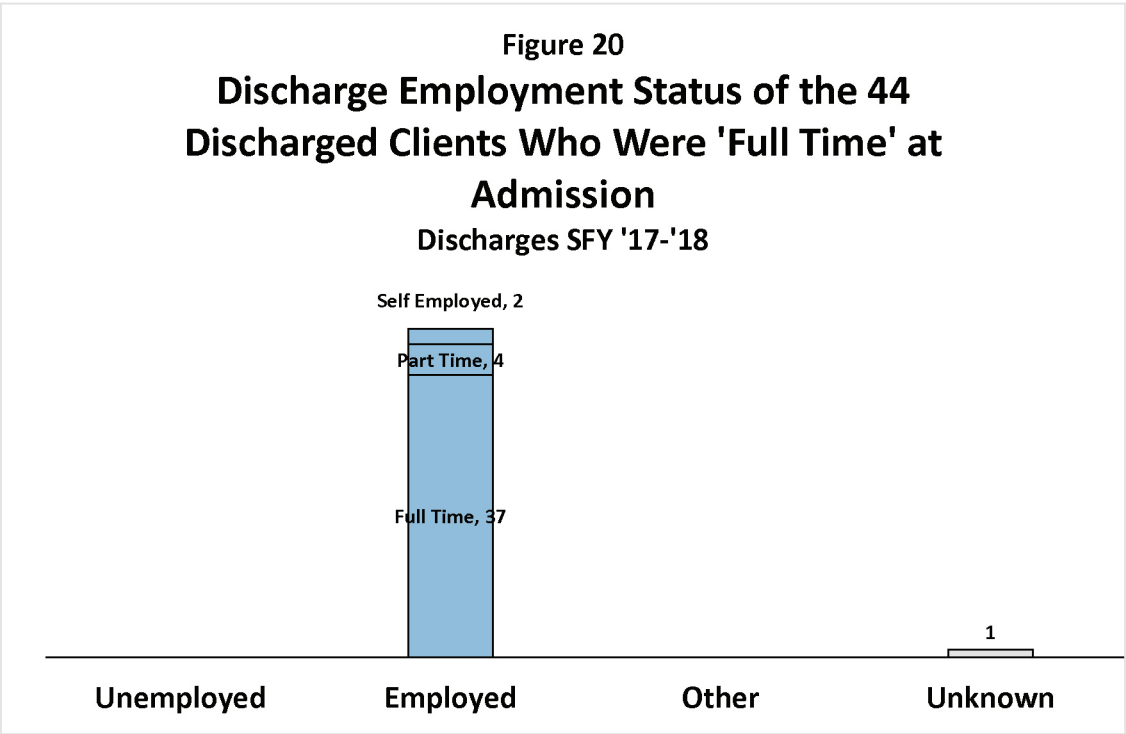

Figure 20, shows that thirty-seven clients reported they remained employed full-time, 4 clients began working part-time, 2 clients became self- employed, while the remaining 1 client was unknown.

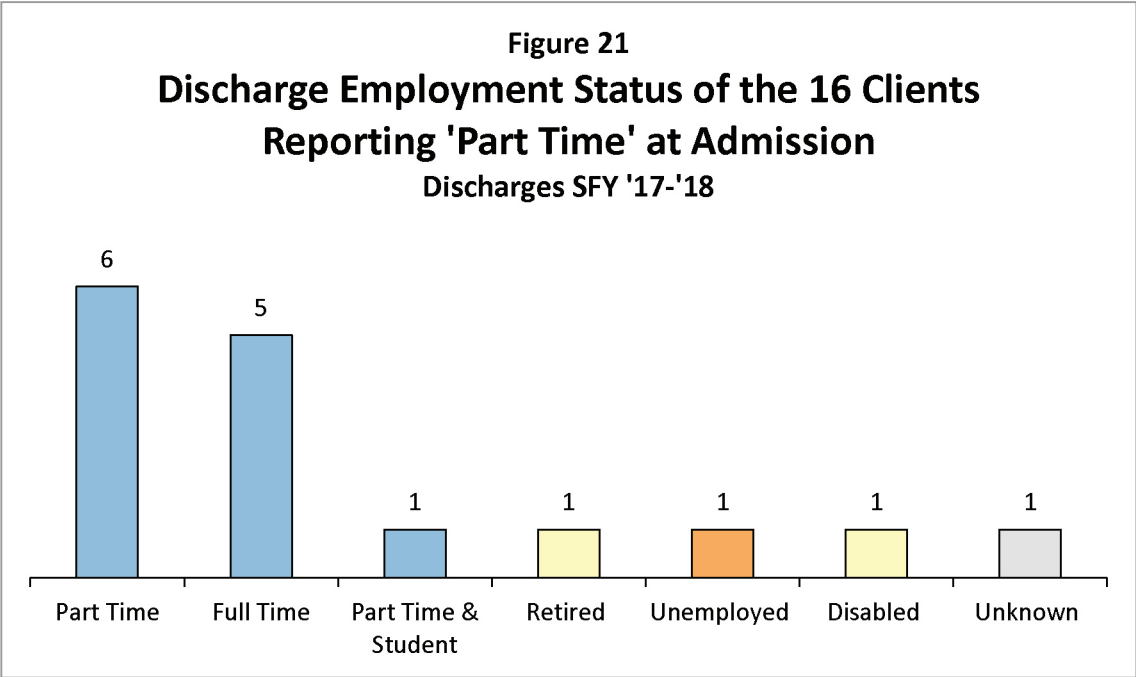

Figure 21, shows that five of those part-time employed clients were able to gain full-time employment between the time of admission and discharge from treatment. Seven clients were able to maintain their part-time employment status throughout treatment. The remaining four clients make up all other categories of becoming retired, unemployed or unknown.

Figure 22
Discharge Employment Status of the 14
Discharged Clients Who Were 'Unemployed'
at Admission
Discharges SFY '17-'18

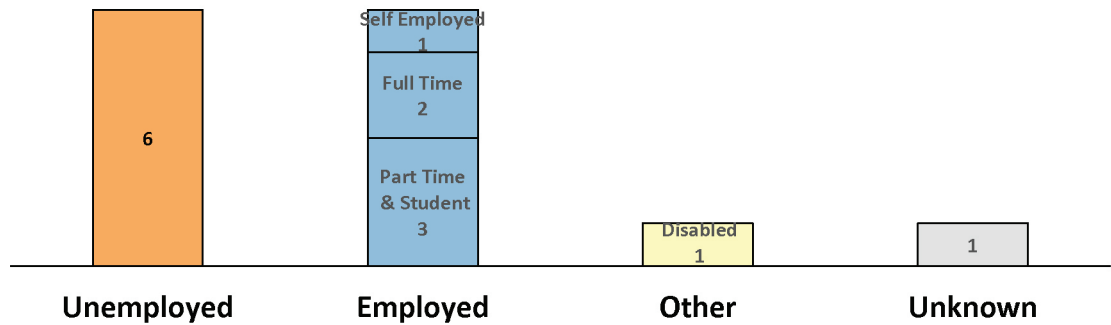

Figure 22, represents of clients reporting, 3 were gainfully employed part-time and a student, 2 were employed full-time, and 1 was self-employed upon discharge. Six clients remained unemployed, 1 client reported being disabled and 1 client was unknown.

Figure 23
Discharge Employment Status of the 19 Clients
Reporting 'Disabled' at Admission
Discharges SFY '17-'18

Similarly, Figure 23, shows that eleven clients reported still being disabled, 2 clients reported retirement, 4 clients reported being unemployed, 1 client reported being self-employed and 1 client reported being a student.

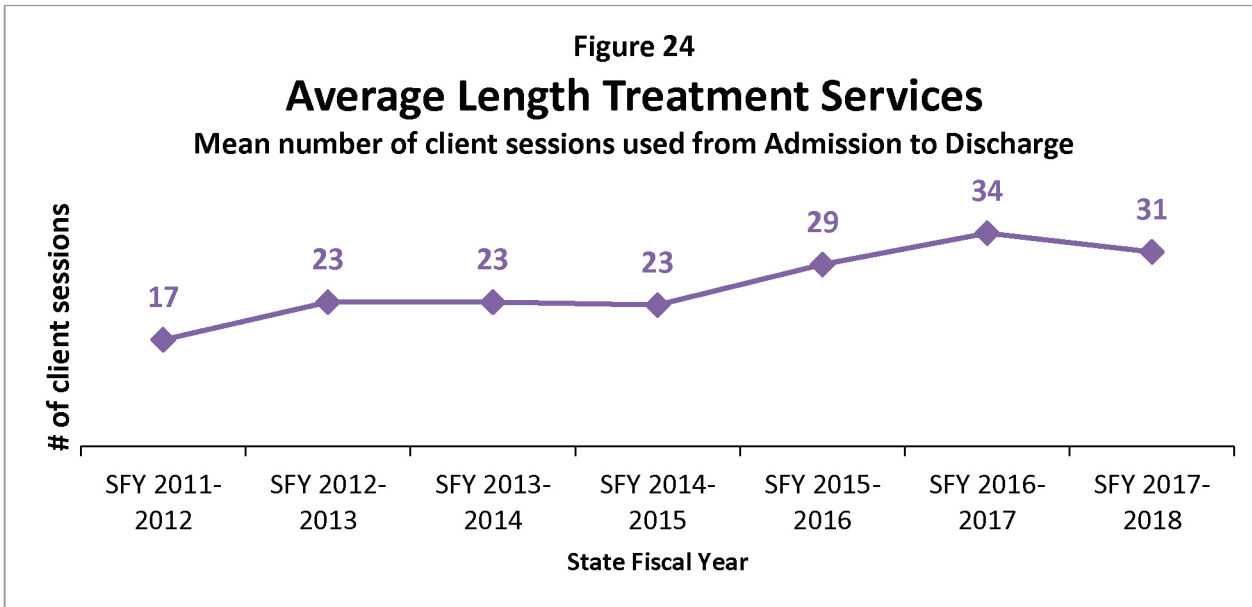

Figure 24, displays the average number of sessions utilized by a client which decreased from 34 to 31 sessions during the last fiscal year.

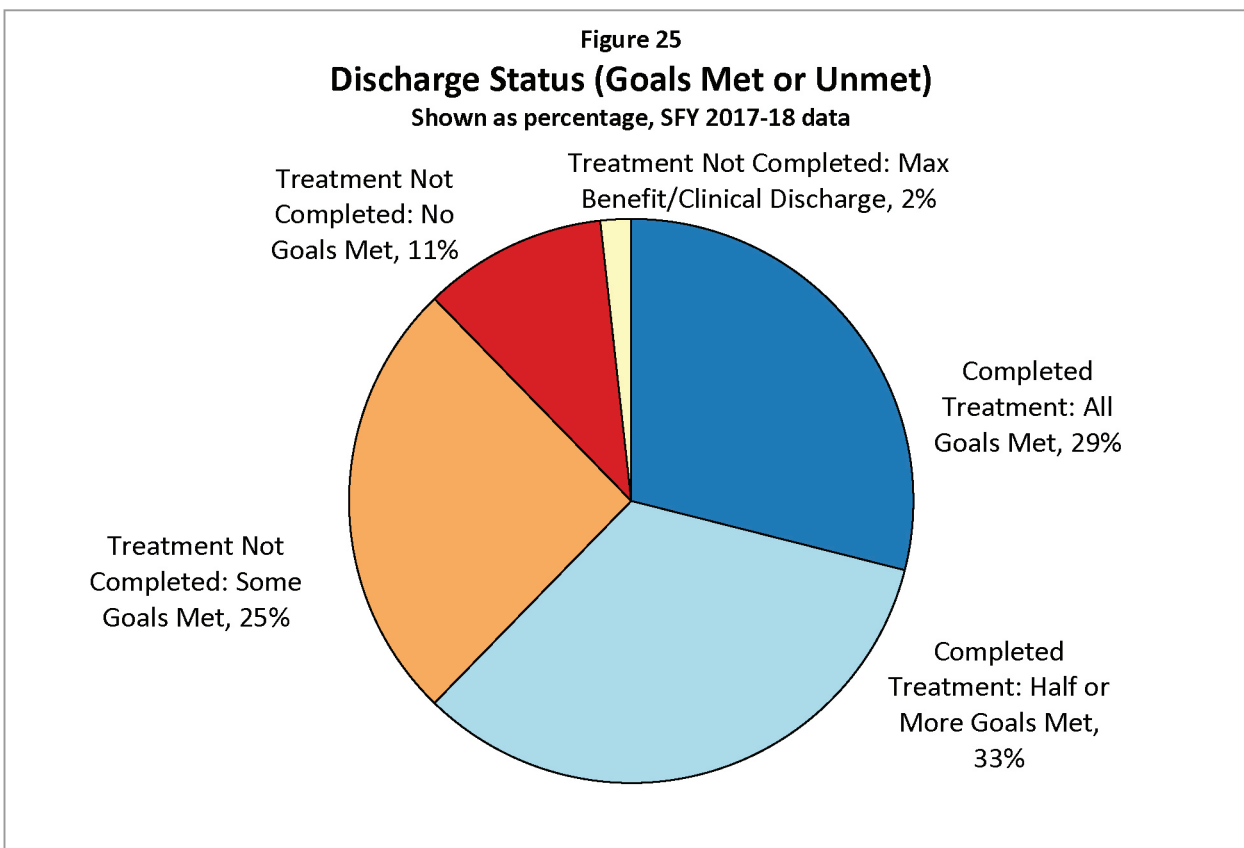

Figure 25, shows the treatment goals status at discharge, as well as if treatment was completed or not. Eighty-seven percent of clients are meeting at least some of their goals, 62 percent completed treatment. Of that 62 percent, 29 percent met all of their goals and 33 percent met at least half of their goals. Of the 38 percent that did not complete treatment, 25 percent met some of their goals.

Figure 26
Discharge Status (Goals Met or Unmet)
 Percentage of Discharges, SFYs 15-16 to 17-18

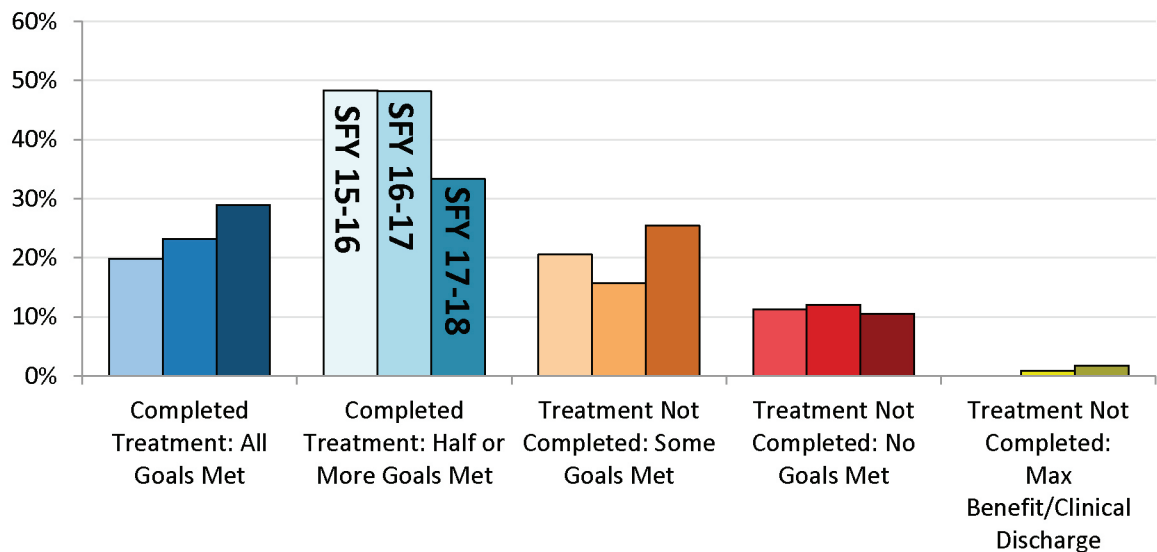

Figure 26, shows a three-year comparison of *treatment goals status at discharge* and, if treatment was completed or not. Over the three-year period, an average of 65 percent of the clients have met at least some of their goals and, an average of 68 percent completed treatment. Of that 68 percent, an average of 40 percent met all of their goals and an average of 44 percent met at least half of their goals. Of the 33 percent that did not complete treatment, an average of 21 percent met some of their goals.

Figure 27
Change in Gambling Frequency
from Admission to Discharge
 Shown as percentage, SFY 2017-18 data

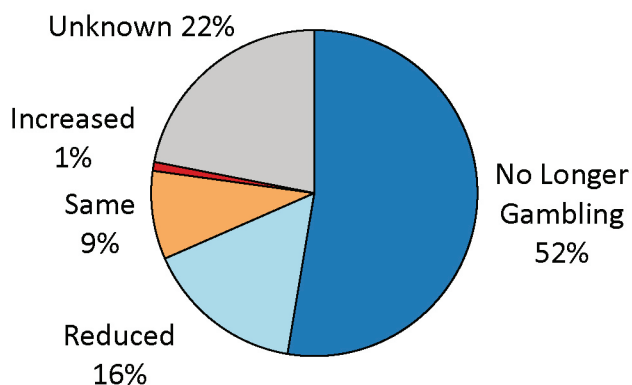

Figure 27, displays the *change in gambling frequency* resulting from problem gambling treatment. For SFY 2017-18, 52 percent of those who were discharged reported that they are no longer gambling, 16 percent reported they have reduced their gambling frequency; and 9 percent have had no change in gambling frequency. One percent reported their gambling as increasing since treatment. The outcome for 22 percent reported was unknown.

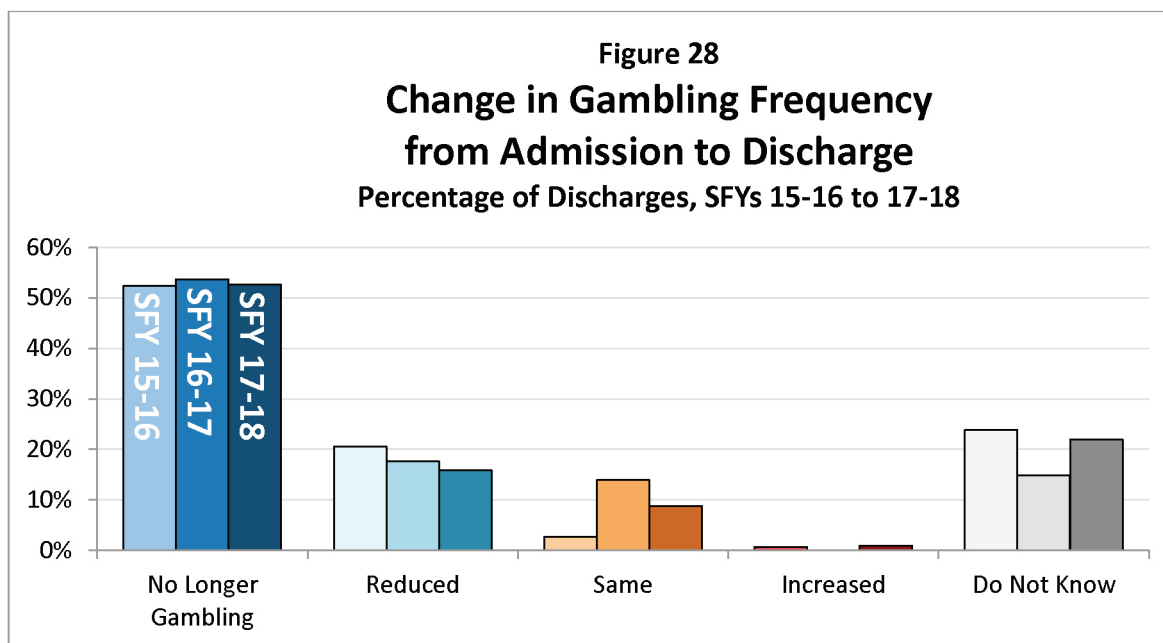

Figure 28, displays the *change in gambling frequency* resulting from problem gambling treatment over a three-year period for comparison. For the three-year period, an average of 53 percent of those who were discharged reported that they are no longer gambling; an average of 18 percent reported that they have reduced their gambling frequency, and an average of 8 percent have had no change in gambling frequency. An average of 1 percent increased their gambling, and an average of 21 percent was unknown.

Prevention of Underage and Problem Gambling

As previously described, Act 2010-01 created the Compulsive and Problem Gambling Program, which is managed by the Department. This requires public education, awareness and training regarding compulsive and problem gambling and the treatment and prevention of problem gambling for which the Department is responsible.

With the increased availability of legalized gambling in Pennsylvania comes increased concern regarding the individual and social costs of problem gambling. The Department is addressing this concern by providing problem gambling prevention, education, and outreach efforts. Problem gambling prevention activities are intended to increase awareness of underage and problem gambling within the general public, inform teachers, policy makers, and other professionals about the impact of problem gambling on the family unit, schools and communities, and educate at-risk populations such as college students, youth, and older adults about risk and protective factors in an effort to prevent underage and problem gambling.

The Department seeks Problem Gambling Funding Initiative Applications (FIAs) from SCAs to provide a wide array of problem gambling services. The opportunity

to apply for funds under this initiative is available to all SCAs regardless of whether SCAs were funded under prior Problem Gambling FIAs.

Allowable activities included:

- Evidence-based, evidence-informed, and supplemental problem gambling prevention programs;
- Problem gambling prevention related training;
- Problem gambling awareness campaigns and media dissemination;
- Outreach and referral efforts in the community intended to identify individuals and families struggling with problem gambling and refer those individuals to Department funded treatment providers;
- Expanded Student Assistance Program (SAP) services beyond those already provided and funded through other funding sources; and
- Establishing support for the PA Youth Survey (PAYS) and assisting school districts with survey administration in an effort to obtain data on underage and problem gambling among Pennsylvania youth.

Problem Gambling Funding Initiative

Thirty-eight SCAs covering fifty-five counties submitted FIAs detailing their plans to provide a wide array of problem gambling prevention services for SFY 2017-18 and SFY 2018-19. The SCAs listed below were awarded a total of \$4,035,883 for SFY 2017-18.

Allegheny	\$297,159	Fayette	\$141,025
Armstrong/Indiana/Clarion	\$94,942	Forest/Warren	\$51,202
Beaver	\$54,600	Franklin/Fulton	\$75,000
Bedford	\$36,260	Greene	\$29,267
Berks	\$112,839	Lackawanna/Susquehanna	\$41,165
Blair	\$50,252	Lancaster	\$213,352
Bucks	\$289,934	Lawrence	\$46,886
Butler	\$107,441	Lebanon	\$72,456
Cambria	\$69,235	Lehigh	\$108,064
Cameron/Elk/McKean	\$63,558	Luzerne/Wyoming	\$93,078
Carbon/Monroe/Pike	\$44,255	Lycoming/Clinton	\$37,373
Centre	\$57,619	Mercer	\$34,596
Clearfield/Jefferson	\$89,717	Montgomery	\$62,225
Columbia/Montour/Snyder/Union	\$27,926	Philadelphia	\$687,758
Crawford	\$48,445	Schuylkill	\$31,906
Cumberland/Perry	\$41,324	Venango	\$35,247
Dauphin	\$92,098	Washington	\$57,750
Delaware	\$174,057	Westmoreland	\$50,531
Erie	\$364,327	York/Adams	\$51,014

Funds provided to the SCAs were used to assess community needs as well as to develop and/or implement a comprehensive system of problem gambling resources, prevention strategies, and programs. These problem gambling prevention services were provided either directly by the SCAs or their contracted provider(s).

Problem gambling prevention activities were provided in a variety of settings to high-risk populations and, when appropriate, communities affected by risk factors associated with problem gambling. The SCAs utilized the Pennsylvania's Performance Based Prevention System (PBPS) to plan, monitor, evaluate, and analyze all problem gambling prevention services.

Twenty-eight evidence-based, evidence-informed, and supplemental problem gambling prevention programs were provided throughout the fiscal year. The following are a few examples of programs that were implemented:

Evidence-Based Programs:

Stacked Deck: A Program To Prevent Problem Gambling is a school-based prevention program that provides information about the myths and realities of gambling and guidance for making good choices with the objective of modifying attitudes, beliefs, and, ultimately, gambling behavior. The program is designed for students in 9th through 12th grades. Lessons cover the history and realities of gambling, risk factors for and signs of problem gambling, fallacies about gambling, calculated risk and the assessment of situations involving risk, and barriers to good decision-making and problem solving. In SFY 2017-18, nine SCAs (Allegheny, Armstrong/Indiana/Clarion, Butler, Carbon/Monroe/Pike, Delaware, Greene, Luzerne/Wyoming, Venango, and Westmoreland) provided this program, serving a total of 1,070 students.

Evidence-Informed Programs:

Kids Don't Gamble... Wanna Bet? is an interdisciplinary curriculum for students in 3rd through 8th grades, developed by the North American Training Institute. It is designed to discourage underage gambling through improved critical thinking and problem-solving skills. It also includes access to an interactive online magazine designed by teens for teens. In SFY 2017-18, nine SCAs (Armstrong/Indiana/Clarion, Cameron/Elk/McKean, Carbon/Monroe/Pike, Lawrence, Lycoming/Clinton, Philadelphia, Schuylkill, Venango and York/Adams) provided this service to a total of 4,926 students.

Too Much To Lose is a problem gambling prevention program with an elementary, middle and high school curriculum. It includes educational and interactive activities to be used with youth in the 3rd through 12th grade classrooms or small group settings. This primary prevention program covers topics such as defining gambling, addiction and risk taking, phases of gambling, refusal skills, consequences of gambling, recognizing problem gambling, coping skills, and getting help for addiction disorders. In SFY 2017-18, three SCAs (Berks, Cambria, and Dauphin) provided this program to 5,264 students.

We Know BETter is an interactive problem gambling prevention curriculum targeting youth in 4th through 9th grades. This innovative program, developed by a prevention provider, helps youth learn about addiction as well as decision-making skills, ways to increase their resiliency, coping strategies, and refusal skills. Interest in this program continues to increase since it has a strong focus on addiction and skill-building and is appropriate for school classrooms, after-school programs, and summer groups. Youth learn to identify possible consequences of gambling and draw parallels with substance dependency. The lessons enhance problem solving skills and feelings of self-confidence by improving coping strategies and refusal skills. An updated version of the program has been developed and a formal evaluation has been conducted through the funding initiative. In SFY 2017-18, seventeen SCAs (Armstrong/Indiana/Clarion, Beaver, Blair, Bucks, Butler, Carbon/Monroe/Pike, Centre, Clearfield/Jefferson, Crawford, Delaware, Erie, Fayette, Forest-Warren, Lancaster, Lebanon, Montgomery, and Westmoreland) participated in the program training and were able to provide program services to a total of 7,706 students.

Supplemental Programs

Gambling Away The Golden Years is an educational kit which explores the possibility of gambling turning from entertainment to addiction, especially in the retirement years. The program targets the older adult population and has been provided in a variety of settings including community senior centers. In SFY 2017-18, twelve SCAs (Allegheny, Armstrong/Indiana/Clarion, Carbon/Monroe/Pike, Crawford, Greene, Luzerne/Wyoming, Montgomery, Philadelphia, Venango, Washington, Westmoreland, and York/Adams) provided this program, serving a total of 1,801 participants.

Know Limits is a question and answer game played in teams which promotes social interaction and cooperation among middle and high school students while teaching problem gambling prevention. The program is designed to maximize player participation and engagement while increasing youth awareness about issues related to gambling and other high-risk behaviors. In SFY 2017-18, eight SCAs (Centre, Clearfield/Jefferson, Crawford, Delaware, Lawrence, Lycoming/Clinton, Montgomery, and Venango) provided this program to 811 students.

Student Assistance Program (SAP)

The Student Assistance Program (SAP) is designed to assist school personnel in identifying issues including gambling, use of alcohol, tobacco and other drugs, and mental health issues, all of which pose barriers to a student's health and success. The primary goal of SAP is to help students overcome these barriers. Elements of SAP include:

- The construction of a well-trained SAP core team that meets regularly to discuss students who have been referred to SAP;
- Incorporation of parents and caregivers into the SAP process through meetings with parents to review student needs and to discuss potential referrals and an intervention plan for the student;
- A system of school-based and community-based support services to which students can be referred for assistance in addressing their needs; and
- The provision of educational and support group services tailored to the needs of SAP-referred students.

Through the Problem Gambling Funding Initiative, the SCAs continue to have the option to support the expansion of SAP services beyond what they had previously provided through other funding sources.

During SFY 2017-18, a total of eighteen SCAs (Allegheny, Armstrong/Indiana/Clarion, Beaver, Berks, Blair, Bucks, Butler, Cameron/Elk/McKean, Columbia/Montour/ Snyder/Union, Dauphin, Fayette, Lackawanna/ Susquehanna, Lancaster, Lawrence, Lebanon, Schuylkill, Washington and Westmoreland) utilized their problem gambling prevention funds to support expanded SAP services. These services included SAP consultations, core team meetings, training, parent/teacher meetings, and educational groups.

Student Assistance Program (SAP) SFY 2017-18 Totals	
Type of SAP Service	Number of Services Provided
SAP Consultation	1,141
SAP Core Team Meeting	906
SAP Parent/Teacher Meeting	415
SAP Group	242
SAP Training	53
Total	2,757

Treatment of Problem Gambling

Supplemental Program Activity/Expenditure Report

Per Act 2010-01, \$3 million is transferred annually from the State Gaming Fund for drug and alcohol treatment. The information below displays the allocation of expenditures of those funds for this state fiscal year (7/1/17 to 6/30/18). ²

<u>Activity Name and Number</u>	<u>Adult Clients</u>	<u>Adolescent Clients</u>	<u>Expenditures</u>
9100 Case Management (Level of Care Assessments only)	2,844	14	\$483,737
823A Medically Monitored Inpatient Detoxification	385	0	\$358,006
823B Medically Monitored Short-Term Residential Treatment	517	0	\$1,597,651
823B Medically Monitored Short-Term Residential Treatment (Co-occurring)	169	0	\$284,749
823C Medically Monitored Long-Term Residential Treatment	77	0	\$216,212
852B Halfway House	55	0	\$118,906
Grand Total			\$3,059,262

²All Single County Authority expenditures information refers to the following program activities: 823A as Inpatient Non-Hospital Detoxification, 823B Short-term Non-Hospital Residential Treatment, 823B Short-term Non-Hospital Residential Treatment (Co-occurring), and 823C Long-term Non-Hospital Residential Treatment.

State Gaming Fund: SCA-Specific Funding for Drug and Alcohol Treatment Services

The number of adult and adolescent clients receiving services as a result of the \$3 million transfer from the State Gaming Fund can be found in the Supplemental Program Activity/ Expenditure Report.

Reporting Period: 7/1/17 - 6/30/18

Single County Authority	Expenditures	Single County Authority	Expenditures	Single County Authority	Expenditures

CONCLUSION

Problem gambling is, and will continue to be, a compelling public health concern affecting Pennsylvanians of all social economic classes, ages, genders, races, and ethnic backgrounds in communities across the commonwealth. The societal and economic costs can be significant, but they can be countered by targeted treatment and prevention aimed at minimizing harm to both the individual and society as a whole.

The number of Pennsylvanians who engage in gambling continues to increase while the number of clients entering treatment and their length of treatment services has declined. In addition, the number of Department contracted gambling treatment providers has decreased significantly since 2016. Over the next year the Department is working to increase public awareness regarding problem gambling through outreach and a media campaign. In addition, the Department is working with various organizations to expand the number of treatment providers across the commonwealth by offering trainings that are required to become certified in giving gambling treatment.

In continuing to serve the commonwealth, the Department is working with the Pennsylvania Gaming Control Board, the Council on Compulsive Gambling of Pennsylvania, the Pennsylvania Lottery, the National Council on Problem Gambling, Pennsylvania State Departments, relevant stakeholders, and others who are committed to helping those with a gambling problem.
